

1. Record Nr.	UNINA9910485000003321
Titolo	Encyclopedia of Clinical Neuropsychology [[electronic resource] /] / edited by Jeffrey Kreutzer, John DeLuca, Bruce Caplan
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Springer, , 2011
ISBN	0-387-79948-6
Edizione	[1st ed. 2011.]
Descrizione fisica	1 online resource (LXIII, 2747p. eReference. In 4 volumes, not available separately.)
Disciplina	612.8
Soggetti	Neuropsychology Neurology Child psychology School psychology Cognitive psychology Health psychology Neurology Child and School Psychology Cognitive Psychology Health Psychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographic references.
Nota di contenuto	Assessment strategies -- Behavioral syndromes and disorders -- Biographies of leading professionals in the field -- Care systems -- Diagnosis and diagnostic labels -- Educational and vocational issues -- Accommodations. - Forensic issues -- General issues -- Imaging modalities and techniques -- -Medical issues -- Medications -- Movement disorders -- Neurological disorders and injuries -- Neurological syndromes -- Professional issues -- Rehabilitation interventions -- Test batteries -- Tests and assessment tools.
Sommario/riassunto	Clinical neuropsychology is a rapidly evolving specialty whose practitioners serve patients with traumatic brain injury, stroke and other vascular impairments, brain tumors, epilepsy and nonepileptic seizure disorders, developmental disabilities, progressive neurological disorders, HIV- and AIDS-related disorders, and dementia. . Services

include evaluation, treatment, and case consultation in child, adult, and the expanding geriatric population in medical and community settings. The clinical goal always is to restore and maximize cognitive and psychological functioning in an injured or compromised brain. Most neuropsychology reference books focus primarily on assessment and diagnosis, and to date none has been encyclopedic in format. Clinicians, patients, and family members recognize that evaluation and diagnosis is only a starting point for the treatment and recovery process. During the past decade there has been a proliferation of programs, both hospital- and clinic-based, that provide rehabilitation, treatment, and treatment planning services. This encyclopedia will serve as a unified, comprehensive reference for professionals involved in the diagnosis, evaluation, and rehabilitation of adult patients and children with neuropsychological disorders.
