Sommario/riassunto	This book systematically introduces the Brain in Traditional Chinese Medicine (TCM) and its acupuncture treatments. It discusses the origin and development of the TCM Brain theory, and presents current research on brain and acupuncture, the unique brain related techniques such as scalp acupuncture and Dao-qi technique, the new developing acupuncture treatment methods for brain-related conditions, such as stroke, Parkinson's, dementia, Alzheimer's disease, multiple sclerosis,

traumatic brain injury, autism, cerebral palsy and depression, anxiety, bipolar disorder among others. This book is of interest to TCM and acupuncture practitioners in the West, as well as acupuncture researchers and lecturers. It gives a new understanding of the brain and treatments for brain-related conditions from a complementary medicine point of view.
