1. Record Nr.   UNINA9910485030903321

   Titolo   Advances in Databases and Information Systems [[electronic resource]]
                        : 20th East European Conference, ADBIS 2016, Prague, Czech Republic,
                        August 28-31, 2016, Proceedings / / edited by Jaroslav Pokorný,
                        Mirjana Ivanovi, Bernhard Thalheim, Petr Šaloun

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, ,
                        2016

   ISBN   3-319-44039-X

   Edizione   [1st ed. 2016.]

   Descrizione fisica   1 online resource (XV, 354 p. 123 illus.)

   Collana   Information Systems and Applications, incl. Internet/Web, and HCI ; ;
                        9809

   Disciplina   005.74

   Soggetti   Database management
                        Application software
                        Data mining
                        Information storage and retrieval
                        Database Management
                        Information Systems Applications (incl. Internet)
                        Data Mining and Knowledge Discovery
                        Information Storage and Retrieval

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di bibliografia   Includes bibliographical references and index.

   Nota di contenuto   Keynote papers -- Data quality, mining, analysis and clustering --
                        Model-driven engineering, conceptual modeling -- Data warehouse
                        and multidimensional modeling, recommender systems -- Spatial and
                        temporal data processing -- Distributed and parallel data processing
                        -- Internet of things and sensor networks.

   Sommario/riassunto   This book constitutes the thoroughly refereed proceedings of the 20th
                        East European Conference on Advances in Databases and Information
                        Systems, ADBIS 2016, held in Prague, Czech Republic, in August 2016.
                        The 21 full papers presented together with two keynote papers and one
                        keynote abstract were carefully selected and reviewed from 85
                        submissions. The papers are organized in topical sections such as data
                        quality, mining, analysis and clustering; model-driven engineering,

conceptual modeling; data warehouse and multidimensional modeling, recommender systems; spatial and temporal data processing; distributed and parallel data processing; internet of things and sensor networks.
