

1. Record Nr.	UNINA9910485037203321
Autore	Jastrzemska Zdenka
Titolo	Czech women philosophers and scientists // Zdenka Jastrzemska, Dagmar Pichova, Jan Zouhar
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-61516-2
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (IX, 116 p. 1 illus.)
Collana	SpringerBriefs in history of science and technology
Disciplina	500.82
Soggetti	Women in science Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book examines the most important Czech women philosophers and scientists. It highlights the lives and achievements of a group that has often not received the recognition they deserve. Chapters provide a systematic description and critical evaluation of the impact these women had on the history of philosophy and science. After an opening chapter on the status of women philosophers and scientists in the period before 1820, the book explores the role women played in the 19th century rise of Czech culture (Czech National Revival). The following chapter then introduces the situation of Czech women philosophers and scientists in the 20th century. The authors base the material on analysis of key works and the characteristics of contemporary debates in which these women participated. The volume describes the complex conditions of women in Czech history in relation to the position of learned women in other European countries. The authors also emphasize their link to the historical background. This encompassing coverage helps provide readers with a richer understanding of these important women and the period in which they lived. Academicians and the general public alike will also learn about the political and social limitations these women faced and the influence of historical conditions on their work.

Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Modeling Paradigms -- Validation and Testing -- Fault Detection and Handling -- Safety Assessment in the Automotive Domain -- Case Studies.
Sommario/riassunto	This book constitutes the refereed proceedings of the 4th International Symposium on Model-Based Safety and Assessment, IMBSA 2014, held in Munich, Germany, in October 2014. The 15 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on modeling paradigms, validation and testing, fault detection and handling, safety assessment in the automotive domain, and case studies.
