| Nota di contenuto       | Issues of Historical and Managerial Research -- Genesis Development of Management Thought From Ancient Times to the End of the XIX Century: The Origins of Management Thought (5th Millenium B.C. to the V Century) -- Management Thought in the Era of Feudalism, Genesis and Emergence of Capitalism (V-XIX Centuries) -- The Emergence and Formation of Management Thought in Russia (IX-XVIII Century) -- Management Thought in Russia in the 1800-1917 -- New and Newest History of Management Thought: Western School of Management of the XX Century -- Development of Scientific Basis of Management in Russia and in the USSR in 20th Centure -- Actual Problems and Concepts of Management. .  |
| Sommario/riassunto      | This book describes the millennia-long process of the genesis, formation, struggle, and change of views on the management of social organizations in various countries around the world; in other words, it characterizes the worldwide evolution of the History of Management Thought (HMT) - ideas, concepts, theories, paradigms, and scientific schools - from Antiquity to the present. The book is the outcome of extensive research, based on the analysis, generalization, and systematization of foreign and domestic published literature, as well as on the gathering and analysis of unique archival materials. For the first time in the historical and managerial literature, the book puts forward original definitions of three historical and managerial sciences - the |

History of Management, the History of Management Thought, and the Historiography of Historical and Managerial Research. It addresses the main challenges in pursuing Historical and Scientific Research (HSR), the main "subject" levels of HSR and specific methodological problems concerning HMT, as well as epistemological methods for identifying key factors in and causes of the advent and evolution of HMT. This book presents both the origins of management thought dating back to the 5th millennium BC and the latest management concepts of the early 21st century. In particular, it traces the origins and sources of management thought, reflected in the works of thinkers and statesmen of the Ancient World (Egypt, Western Asia, China, India, Greece, and Rome), the era of feudalism, and the Middle Ages (Byzantium, Western Europe, and England), the era of inception capitalism (Western Europe and the USA), as well as the new and recent history of management thought of the 20th and 21st centuries. In addition, for the first time in History of Management literature, it presents the history of Russian management thought from the 9th century to modern concepts and scientific schools. .

This book presents selected peer-reviewed papers from the International Conference on Recent Advancements in Air Conditioning and Refrigeration (RAAR) 2019. The focus is on current research in a very topical area of HVAC technology, which has wide-ranging applications. The topics covered include modern air conditioning and refrigeration practices, environment-friendly refrigerants, high-performance components, computer-assisted design, manufacture, operations and data management, energy-efficient buildings, and application of solar energy to heating and air conditioning. This book is useful for researchers and industry professionals working in the field of heating, air conditioning and refrigeration.
