

1. Record Nr.	UNISALENTO991001238549707536
Autore	Dumbrell, John
Titolo	President Lyndon Johnson and Soviet communism / John Dumbrell
Pubbl/distr/stampa	Manchester ; New York : Manchester University, 2004
ISBN	0719062632 0719062640
Descrizione fisica	192 p. ; 24 cm.
Disciplina	327.7304709046
Soggetti	Johnson, Lyndon Baines Johnson, Lyndon Baines Stati Uniti d'America Relazioni internazionali 1963-1969
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910485049703321
Titolo	Emergency Imaging of Pregnant Patients // edited by Michael N. Patlas, Douglas S. Katz, Mariano Scaglione
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-42722-6
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (IX, 207 p. 169 illus., 63 illus. in color.)
Disciplina	618.20754
Soggetti	Radiology Gynecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Emergency Imaging of Pregnant Patient: General Principles -- Imaging of Neurological Emergencies during Pregnancy -- Imaging of Thoracic and Cardiovascular Emergencies during Pregnancy -- Non - traumatic Abdominal Emergencies in Pregnant Patients: Role of Ultrasound -- Non - traumatic Abdominal Emergencies in Pregnant Patients: Role of Magnetic Resonance Imaging -- Imaging of Non Obstetric Pelvic Emergencies -- Imaging of Abdominal and Pelvic Trauma in Pregnant Patients -- Imaging of Early Obstetric Emergencies -- Imaging of Late Obstetric Emergencies. .
Sommario/riassunto	This book presents a comprehensive and modern approach to the imaging of nontraumatic and traumatic emergencies in pregnant patients. Readers will find a careful review of the relevant imaging-related clinical literature, explanation of imaging appropriateness criteria and guidelines, and enlightening discussion of current controversies in the emergency imaging of obstetric patients. The opening chapter discusses general principles of emergency imaging during pregnancy and offers an overview of an evidence-based approach to imaging interpretation. The remainder of the book describes specific applications of ultrasound, MRI, radiography, and MDCT for the imaging of common as well as less common acute brain, spine, thoracic, abdominal, and pelvic conditions during pregnancy. Clear guidance is offered on the unique challenges that may be

encountered during such imaging. Emergency Imaging of Pregnant Patients is written by a group of leading North American and European emergency and trauma radiology experts. It will be of value to emergency and general radiologists, to emergency department physicians and related personnel, to obstetricians and gynecologists, to general and trauma surgeons, and to trainees in all of these specialties.
