

1. Record Nr.	UNINA9910485147503321
Titolo	Bipolar disorder : from neuroscience to treatment // Allan H. Young, Mario F. Juruena, editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-72143-4
Descrizione fisica	1 online resource (viii, 325 pages)
Collana	Current Topics in Behavioral Neurosciences ; ; v.48
Disciplina	616.89506
Soggetti	Bipolar disorder - Treatment Trastorn bipolar Terapèutica Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Preface -- Contents -- The Neurobiology of Bipolar Disorder -- 1 Introduction -- 2 Neurotransmitters -- 2.1 Serotonergic System -- 2.2 Dopaminergic System -- 2.3 Norepinephrinergetic System -- 2.4 GABAergic System -- 2.5 Glutamatergetic System -- 3 Intracellular Signalling -- 4 Adenylate Cyclase Signalling Pathway -- 5 Neurotrophins and Neurogenesis -- 6 Neuroendocrine -- 7 Conclusion -- References -- The Role of Stress in Bipolar Disorder -- 1 Introduction -- 1.1 Activation of Hormonal Systems After Stress -- 1.2 Stress Hormone Receptors -- 2 Stress Hormone Actions on the Brain in Healthy Individuals -- 2.1 Cellular Effects of Stress Hormones on Brain Circuits -- 2.2 Neuronal Circuits and Cognitive Function -- 3 Changes in Stress Responsiveness in Bipolar Disorder -- 3.1 Imbalance in the Stress System: Importance of Genetic and (Early) Life History -- 3.2 Changes in the HPA Axis in Bipolar Disorder Patients -- 4 Changes in Cognitive Function in Bipolar Disorder Related to Stress -- 4.1 Time-Dependent Changes in Cognitive Processing Following Stress in BD Patients -- 4.2 Network Function in BP Patients and Individuals at Risk for Psychopathology -- 5 Concluding Remarks -- References -- The Role of Genetics in Bipolar Disorder -- 1 Introduction: Why Genetics

Matters in the Susceptibility to Bipolar Disorder? -- 2 Bipolar Disorder Is Heritable: Twin, Adoption, and Family Studies -- 3 How Many Genes Modulate the Risk of Bipolar Disorder? Linkage Studies, Candidate Gene Studies, and Genome-Wide Association S... -- 4 Genetic Overlap Between Bipolar Disorder and Other Brain Disorders: Disorder-Specific or General Genetic Influences? -- 5 The Role of Rare Genetic Variants -- 6 Gene x Environment Studies -- 7 Nongenetic Mechanisms Contributing to the Regulation of Gene Expression: Epigenetics -- 8 Current and Future Lines of Research.

9 Conclusion -- References -- Targeting Mitochondrial Dysfunction for Bipolar Disorder -- 1 The Mitochondria -- 1.1 Mitochondria as an Energy Source -- 1.2 Other Functions of Mitochondria -- 2 Reactive Oxygen Species and Oxidative Stress -- 3 Mitochondria in Bipolar Disorder -- 3.1 Possible Mechanisms of Mitochondrial Dysfunction in Bipolar Disorder -- 3.1.1 A Shift from OXPHOS to Glycolysis -- 3.1.2 Creatine Kinase -- 3.1.3 Calcium -- 3.1.4 Increased Oxidative Stress -- 3.1.5 Neurotransmitters -- 3.1.6 Brain-Derived Neurotrophic Factor (BDNF) -- 3.1.7 NAA -- 3.1.8 Bcl-2 -- 3.2 Mitochondrial Genes -- 4 How Conventional Drugs for Bipolar Disorder Relate to Mitochondrial Functioning -- 5 Mitochondrial Potential Treatments -- 5.1 Likely Beneficial -- 5.1.1 PPAR Agonists -- 5.1.2 Minocycline -- 5.1.3 N-Acetyl-Cysteine (NAC) -- 5.1.4 Co-enzyme Q10 -- 5.1.5 Melatonin -- 5.2 Theoretically Beneficial, but No Studies Have Been Published -- 5.2.1 Ebselen -- 5.2.2 Mangosteen -- 5.2.3 Ketogenic Diet -- 5.2.4 Resveratrol -- 5.2.5 Taurine -- 5.3 Unlikely to Be Beneficial -- 5.3.1 Alpha-Lipoic Acid (ALA) -- 5.3.2 Pyrimidines -- 5.4 Potential Risk of a Manic Switch -- 5.4.1 ALC (Acetyl-L-Carnitine) -- 5.4.2 Creatine Monohydrate (CM) -- 5.4.3 SAME (S-Adenosyl-Methionine) -- 5.5 Vitamins -- 5.5.1 Vitamin A -- 5.5.2 Vitamin C -- 5.5.3 Vitamin D -- 5.5.4 Vitamin E -- 5.5.5 Vitamins B -- 6 Summary -- References -- Intracellular Signaling Cascades in Bipolar Disorder -- 1 Introduction -- 2 Mitochondrial Dysfunction -- 3 Calcium Channel Modulators -- 4 Intracellular Signaling and Inflammation -- 5 Glycogen Synthase Kinase 3-Beta (GSK3) -- 6 Protein Kinase C (PKC) and Diacylglycerol (DAG) -- 7 Neurotrophins -- 8 Glutamatergic System -- 9 Dopaminergic System -- 10 Neurohormonal System -- 11 Purinergic System and Mania -- 12 Conclusion -- References.

Sleep and Circadian Rhythm Disorder in Bipolar Affective Disorder -- 1 Bipolar Affective Disorder -- 2 Circadian Rhythm -- 3 Circadian Rhythm and Bipolar Affective Disorder -- 4 Circadian Rhythm Sleep-Wake Disorders -- 4.1 Delayed Sleep Phase Disorder -- 5 Genetics -- 6 Chronotype -- 7 Melatonin and Cortisol -- 8 Social Zeitgeber Theory -- 9 Circadian Rhythm and Bipolar Disorder -- 10 Conclusion --

References -- Neuroendocrine Stress System in Bipolar Disorder -- 1 Introduction -- 2 Endocrine Axis -- 2.1 Regulation of the Hypothalamic-Pituitary-Adrenal Axis -- 2.2 The Glucocorticoid Receptor (GR) -- 2.3 Mineralocorticoid Receptors (MRs) -- 2.4 Molecular Mechanisms for Resistance of Glucocorticoid Receptors -- 3 Abnormalities of the HPA Axis in Depression -- 3.1 Impact of Stress on Bipolar Disorders -- 3.2 Impact of Mediating Factors on the HPA Axis -- 4 Factors Associated with an Endophenotype Increasing Vulnerability -- 5 Conclusion -- References -- Neuroanatomic and Functional Neuroimaging Findings -- 1 Introduction -- 2 Structural Neuroimaging and Diffusion Tensor Imaging Studies -- 2.1 Structural Magnetic Resonance Imaging MRI (sMRI) Findings in BD -- 2.2 Diffusion Tensor Imaging (DTI) Findings in BD -- 2.3 Longitudinal sMRI and DTI Findings -- 3 Functional Neuroimaging -- 3.1 Positron Emission Tomography (PET) -- 3.2 Resting-State Functional MRI (rsfMRI) -- 4 Summary of

Main Findings -- 5 Diagnostic Specificity of Neuroimaging Findings --  
5.1 Structural Neuroimaging and DTI Findings -- 5.2 Functional  
Neuroimaging Findings (PET, rs-fMRI) -- 5.3 Neuroimaging and Pattern  
Classification Methods and the Diagnosis of BD -- 6 Perspectives on  
the Role of Neuroimaging in the Management of BD Patients -- 6.1  
Neuroimaging Studies and Bipolar Disorders Mood States -- 6.2  
Neuroimaging Studies, Bipolar Disorders, and Pharmacological  
Treatment.  
6.3 Neuroimaging to Predict Pharmacological Treatment Response --  
6.4 Neuroimaging and Psychotherapy in Bipolar Disorders -- 7  
Conclusions -- References -- Structural and Functional Brain Correlates  
of Neuroprogression in Bipolar Disorder -- 1 Introduction -- 2  
Structural Aspects of Neuroprogression in Neuroimaging -- 2.1  
Evidence from Cross-Sectional Studies -- 2.1.1 Brain Volume and  
General Findings -- 2.1.2 Prefrontal Cerebral Cortex -- 2.1.3 Cingulate  
Cortex -- 2.1.4 Temporal-Limbic Structures -- 2.1.5 Other Brain  
Structures -- 2.2 Evidence from Longitudinal Studies -- 2.2.1 Brain  
Volume and General Findings -- 2.2.2 Prefrontal Cerebral Cortex --  
2.2.3 Cingulate Cortex -- 2.2.4 Temporal-Limbic Structures -- 3  
Functional Aspects of Neuroprogression in Neuroimaging -- 4  
Challenges (Limitations) and Perspectives -- References --  
Inflammation as a Mechanism of Bipolar Disorder Neuroprogression --  
1 Introduction -- 2 Evidence of Inflammatory and Infectious Diseases in  
BD Neuroprogression -- 2.1 Maternal Immune Activation as a Risk  
Factor for BD Development and Neuroprogression -- 2.2 Role of  
Infectious Disease as a Trigger to Develop BD Neuroprogression -- 2.3  
Autoimmune Disorders and Their Association with BD  
Neuroprogression -- 2.4 Role of the Gut-Brain Axis on BD  
Neuroprogression -- 3 Inflammatory and Oxidative Mechanisms in BD  
Neuroprogression -- 3.1 Mechanisms of Inflammation and Their  
Contribution to BD Neuroprogression -- 3.2 Oxidative Stress and  
Mitochondrial Dysfunction Associated with BD Neuroprogression -- 3.3  
Peripheral Inflammatory Mediators as a Trigger or Accelerator of BD  
Neuroprogression -- 3.4 Cerebrospinal Fluid (CSF) System  
Inflammatory Markers in BD Neuroprogression -- 3.5 Postmortem  
Inflammatory Markers in BD Neuroprogression -- 4 Conclusions and  
Future Directions -- References -- Neuropsychology of Bipolar  
Disorder.  
1 Pattern and Magnitude of Impairment -- 2 What Are the Factors that  
Affect Cognition? -- 2.1 Diagnostic Features -- 2.2 Sleep -- 2.3  
Physical Health -- 2.4 Medication -- 3 Summary -- 4 Methods of  
Assessment -- 4.1 Longitudinal Changes -- 4.2 Identifying  
Neuropsychological Phenotypic Clusters -- 4.3 Hierarchical  
Organization of Cognition -- 4.4 Experimental Analysis Methods -- 5  
Conclusions -- References -- The Kindling/Sensitization Model and  
Early Life Stress -- 1 Introduction -- 2 Stress Sensitization -- 3  
Stimulant-Induced Behavioral Sensitization -- 4 Episode-Induced  
Sensitization -- 5 Cross-Sensitization: Neurochemical Commonalities  
and Inflammatory Mechanisms -- 6 An Epigenetic Basis for  
Sensitization -- 7 One Genetic and Two Epigenetic Bases for Illness  
Vulnerability -- 8 More Stress, Episodes, and Substance Abuse in the  
USA Than Europe Driving Sensitization -- 9 Implications for Treatment  
-- 10 High Risk Children Deserve Special Attention and Treatment --  
11 Measures Considered for Primary and Secondary Prevention -- 12  
Conclusions -- References -- Childhood Maltreatment in Bipolar  
Disorders -- 1 Introduction -- 2 Childhood Maltreatment and (More  
Severe) Bipolar Disorders -- 2.1 Childhood Maltreatment as a Risk  
Factor for Developing Bipolar Disorders -- 2.2 Childhood Maltreatment

and the Severity of the Clinical Expression of Bipolar Disorders -- 2.3  
Childhood Maltreatment, Psychiatric, and Medical Comorbidities in  
Bipolar Disorders -- 2.4 Issues About Childhood Maltreatment  
Subtypes, the Timing of Exposure, and Gender -- 3 Moving to  
Dimensions of Psychopathology in Association with Childhood  
Maltreatment -- 3.1 Childhood Maltreatment and Dimensions of  
Psychopathology in Bipolar Disorders -- 3.2 Childhood Maltreatment  
and Cognition in Bipolar Disorders -- 4 Childhood Maltreatment as Part  
of a Multiple Hit Model of Susceptibility.  
4.1 Interactions Between Childhood Maltreatment and the Genetic  
Susceptibility to Bipolar Disorders.
