Sommario/riassunto

The 2012 passage of Initiative 502 in Washington state removed the prohibition on the production, distribution, and possession of marijuana for nonmedical purposes and required the state to regulate and tax a new marijuana industry. This report uses data from multiple sources to estimate the total weight of marijuana consumed in the state in 2013 to provide decisionmakers with baseline information about the size of the state's market.

Sommario/riassunto

This book discusses special properties of integer sequences from a unique point of view. It generalizes common, well-known properties and connects them with sequences such as divisible sequences, Lucas sequences, Lehmer sequences, periods of sequences, lifting properties, and so on. The book presents theories derived by using elementary means and includes results not usually found in common number

theory books. Considering the impact and usefulness of these theorems, the book also aims at being valuable for Olympiad level problem solving as well as regular research. This book will be of interest to students, researchers and faculty members alike. .
