

1. Record Nr.	UNINA9910485598803321
Autore	Schubert U (Ulrich)
Titolo	Ruthenium-containing polymers // Ulrich S. Schubert, Andreas Winter, and George R. Newkome
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-75598-3
Descrizione fisica	1 online resource (475 pages)
Disciplina	547.7
Soggetti	Ruthenium compounds Polymers
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Abbreviations -- 1 Introduction -- Abstract -- References -- 2 Polymers Incorporating Ru Complexes -- Abstract -- 2.1 General Considerations -- 2.2 Synthesis, Characterization, and Properties of Ru-Containing Polymers -- 2.2.1 Ruthenopolymers, Derived from the Functionalization of Preformed (Co) polymers -- 2.2.2 Ruthenopolymers, Derived from the Complexation at (Co)polymers -- 2.2.3 Main-Chain Ruthenopolymers, Classified as Metallo-Supramolecular Materials -- 2.2.3.1 Main-Chain Ruthenopolymers, Formed Via Coordinative Bonding -- 2.2.3.2 Main-Chain Ruthenopolymers, Formed via Ionic or Covalent Bonding -- 2.2.3.3 Main-Chain Ruthenopolymers, Formed via Arene-Complexation -- 2.2.4 Ruthenopolymers, Derived from Rull-Containing Initiators -- 2.2.5 Ruthenopolymers, Derived from the (Co) polymerization of Rull-Containing Monomers -- 2.2.5.1 Polymers Bearing Rull Centers in the Side Chains or Attached to the Backbone -- 2.2.5.2 Polymers Bearing Rull Centers Within the Backbone -- 2.3 Concluding Remarks -- References -- 3 Electropolymerization-An Item-Centered View on Ruthenopolymers -- Abstract -- 3.1 Introduction -- 3.2 Experimental Remarks -- 3.3 Reductive Electropolymerization of Vinyl-Containing Monomers -- 3.4 Oxidative Electropolymerization of Pyrrole-Containing Monomers -- 3.5 Oxidative Electropolymerization of Thiophene-Containing Monomers

-- 3.6 Electropolymerization of Miscellaneous Rull-containing Monomers -- 3.7 Concluding Remarks -- References -- 4 Ruthenodendrimers -- Abstract -- 4.1 Introduction -- 4.2 Dendrimers, Containing Rull Complexes as the Branching Units -- 4.3 Dendrimers, Containing Rull Complexes as Building-Block Connectors -- 4.4 Dendrimers, Containing Rull Complexes as the Core -- 4.5 Dendrimers, Containing Rull Complexes at the Surface. 4.6 Supramolecular Assemblies, Derived from Dendrimers and Rull Complexes -- 4.7 Ru Species Immobilized Within Dendrimers -- 4.8 Concluding Remarks -- References -- 5 Polymers and Small-Molecule Ru Species -- Abstract -- 5.1 Introduction -- 5.2 Ru Complexes Embedded in Polymer Matrices: Catalytic Applications -- 5.3 Ru Complexes Embedded in Polymer Matrices: Biomedical Applications -- 5.4 Ru Complexes Embedded in Polymer Matrices: Opto-Electronic Applications -- 5.5 Polymer-Staining Using Ru Reagents -- 5.6 Concluding Remarks -- References -- 6 Metal-organic and Covalent Organic Frameworks Incorporating Ru Species -- Abstract -- 6.1 Introduction -- 6.2 Metal-organic-Frameworks with Embedded Ru Nanoparticles or Rull Complexes -- 6.3 Metal-organic-Frameworks Assembled from Rull Species -- 6.4 Covalent Organic-Frameworks Incorporating Ru Species -- 6.5 Concluding Remarks -- References -- 7 Polymer-Stabilized Ru Nanoparticles -- Abstract -- 7.1 Introduction -- 7.2 Synthesis of Ru Nanoparticles-General Considerations -- 7.3 Ru Nanoparticles, Stabilized by Polymers -- 7.4 Concluding Remarks -- References.
