

1. Record Nr.	UNINA9910485605403321
Titolo	Emerging transplant infections : clinical challenges and implications // Michele I. Morris, Camille Nelson Kotton and Cameron R. Wolfe (editors)
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-25869-6
Descrizione fisica	1 online resource (1737 pages)
Disciplina	617.954
Soggetti	Transplantation of organs, tissues, etc - Complications Transplantation immunology Infection Transplantation Immunology Infections Trasplantament d'òrgans Infeccions quirúrgiques Immunologia de la trasplantació Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Contents -- About the Editors -- Contributors -- Part I: General Introduction -- 1 Impact of Infection on Transplant Outcomes: Transplant Infectious Disease Expertise as an Essential Component of Transplant ... -- Introduction -- The Essential Role of Infectious Disease Specialists in the Care of Transplant Patients -- Conclusion -- References -- 2 Introduction to Immunosuppression, Tolerance, and Infection Risk -- Introduction -- T-Cell, B-Cells, and the Innate Immune System Involvement in Rejection -- Other Elements of the Immune System Involved in Transplantation -- Therapeutics Impacting Immunosuppression -- Calcineurin Inhibitors -- Antiproliferative Agents -- mTOR Inhibitors -- Corticosteroids -- Co-stimulation Blockade -- Induction Therapies -- Anti-CD25 Monoclonal Antibodies -- Anti-CD52 Monoclonal Antibodies -- Polyclonal

Antibodies -- Conclusion -- Key Points -- References -- 3 Changing Definition of Immunosuppression: Targeted Therapies and Resulting Emerging Infections and Their Prevention -- Introduction -- Belatacept -- Key Findings and Suggestions -- Basiliximab -- Key Findings and Suggestions -- Rituximab and Obinutuzumab -- Key Findings and Suggestions -- Alemtuzumab -- Key Findings and Suggestions -- Eculizumab -- Key Findings and Suggestions -- Ruxolitinib -- Key Findings and Suggestions -- Ibrutinib -- Key Findings and Suggestions -- Bortezomib -- Key Findings and Suggestions -- Brentuximab -- Key Findings and Suggestions -- Conclusions -- References -- 4 Stem Cell Transplantation: Infection Risk by Transplant Type and Emerging Trends in Infection Management -- Introduction -- Risk of Infection Post-HSCT -- General Immune Reconstitution After Hematopoietic Stem Cell Transplantation -- Aplastic Period -- NK Cells and T-Cells -- B-Cells and Immunoglobulins -- Graft-Versus-Host Disease. Special Donor Populations -- Umbilical Cord Blood Transplantation -- Haploidentical Transplantation -- Pre-HSCT Recipient Infectious Disease Evaluation -- Prophylaxis and Management of Infection Post-HSCT -- Bacterial Infections -- Bloodstream Infections -- Diagnosis -- Management -- Gram-Positive Bacterial Infections -- Multidrug-Resistant Gram-Negative Bacterial Infections -- Bacterial Pneumonia -- Clostridioides Difficile -- Diagnosis -- Management -- Recurrent CDI -- Secondary Prophylaxis -- Fungal Infections -- Yeasts -- Disease Epidemiology -- Candida auris -- Diagnosis -- Blood Cultures -- Fungal Antigen Testing: Serum 1,3-Beta-D-Glucan -- Nanodiagnosics -- Candida auris-Specific Diagnostics -- Management -- Candida Species -- Candida auris -- Cryptococcus -- Molds -- Disease Epidemiology -- Clinical Impact -- Diagnosis -- Culture -- Galactomannan -- Aspergillus PCR -- Radiographic Studies -- Fungal Metabolite Testing -- Management -- Prophylaxis -- Treatment -- Pneumocystis Jiroveci -- Viral Infections -- Herpes Simplex Virus -- Varicella Zoster -- Cytomegalovirus -- Diagnosis -- Preemptive Management -- Prophylaxis: Shift in Management -- Drug-Resistant CMV Infection -- Epstein-Barr Virus -- Adenovirus -- BK Virus -- Parasitic Infections -- Toxoplasmosis -- Strongyloides -- Post-HSCT Vaccinations -- Conclusions -- Key Points -- Cross-References -- References -- 5 Evolving Epidemiology of Transplant Infections: Impact of Population Shifts and Climate Change -- Introduction -- Migration and Population Shift -- Modern Patterns of Human Migration and Infection -- Shifting Populations and the Changing Epidemiology of Infectious Diseases -- Preventative Strategies and Global Demographic Changes -- Climate Change and Infectious Diseases -- Climate Change and Parasitic Infections -- Climate Change and Vector-Borne Infections. Climate Change and Fungal Infections -- Climate Change and Bacterial Infections -- Conclusion -- Key Points -- References -- 6 Hospital Epidemiology and Infection Control in the Transplant Center -- Introduction -- Hand Hygiene -- Central Line-Associated Bloodstream Infections -- Catheter-Associated Urinary Tract Infections -- Clostridioides difficile -- Surgical Site Infections -- Preventing Infections Associated with the Healthcare Environment -- Environmental Mold -- Waterborne Pathogens -- Colonization with Multidrug-Resistant Organisms -- Respiratory Viruses -- Influenza -- Respiratory Syncytial Virus -- Adenovirus -- Other Respiratory Viruses -- Varicella-Zoster Virus -- Measles -- Healthcare Personnel Vaccination -- Conclusion -- Key Points -- Cross-References -- References -- 7 Antimicrobial Stewardship for Transplant Candidates and Recipients -- Introduction -- Implementing Antimicrobial Stewardship in Transplant Patients -- Formulary Management -- Pre-

prescription Authorization and Post-prescriptive Review --
Antimicrobial Agent Selection -- Antibiotic Allergy Assessment -- Dose
Optimization and Drug Interactions -- Intravenous-to-Oral Conversion
-- Clinical Pathways and Guideline Development -- Diagnostic Test
Stewardship -- Syndrome- and Drug-Specific Targets -- Antibiotic
Stewardship -- Febrile Neutropenia -- Asymptomatic Bacteriuria in
Organ Transplant Recipients -- Antiviral Stewardship -- Aerosolized
Ribavirin for Management of RSV -- Cytomegalovirus (CMV) --
Antifungal Stewardship -- Antimicrobial Stewardship Program Metrics
-- Conclusion -- Key Points -- References -- 8 Antimicrobial
Prophylaxis in the Age of Emerging Transplant Infections --
Introduction -- Perioperative Antibacterial Prophylaxis in Solid Organ
Transplantation -- Antibiotic Prophylaxis After Transplantation --
Antifungal Prophylaxis After Transplantation.
Mycobacterial Prophylaxis After Transplantation -- Influenza
Prophylaxis After Transplantation -- Herpes Simplex Virus and Varicella
Zoster Virus Prophylaxis After Transplantation -- Cytomegalovirus
Prophylaxis After Transplantation -- BK Polyomavirus Prophylaxis After
Transplantation -- Parasitic Prophylaxis in Transplantation --
Conclusion -- Key Points -- References -- 9 Pretransplant Screening
for Infection Exposure: Approach to the Patients with Epidemiologic and
Geographic Risk Factors -- Introduction -- Bacterial Infections --
Bacterial Pathogens of Special Interest -- Mycobacterial Infections --
Tuberculosis -- Nontuberculous Mycobacteria -- M. abscessus -- Non-
M. abscessus Non-M. tuberculosis Mycobacterial Infections -- Fungi --
Endemic Fungal Infections -- Histoplasmosis -- Blastomycosis --
Paracoccidioidomycosis -- Coccidioidomycosis -- Cryptococcosis --
Aspergillus and Other Molds -- Parasitic Infections -- Chagas Disease
-- Schistosomiasis -- Strongyloidiasis -- Leishmaniasis -- Malaria --
Toxoplasmosis -- Viral Infections in the Transplant Candidate --
Blood-borne Pathogens -- Endemic Human Herpes Viruses -- Viral
Infections with Geographic Associations -- Human Herpesvirus-8
(HHV-8) -- HTLV-1 -- Flaviviruses (Arboviruses) -- West Nile Virus
(WNV) -- Zika, Chikungunya, and Dengue Viruses -- Conclusion --
KeyPoints -- References -- 10 Transplant Tourism and the Traveling
Transplant Recipient: Infection Mitigation and Treatment Strategies --
Introduction -- Part 1: Transplant Tourism -- Introduction --
Transplant Tourism and Infectious Complications -- Conclusion -- Key
Points -- Part 2: The Traveling Transplant Recipient -- Introduction --
Risk of Infection While Abroad -- Viral Infections -- Respiratory Viral
Infections -- Influenza -- Measles -- Middle Eastern Respiratory
Syndrome -- Gastrointestinal Viral Infections -- Norovirus.
Hepatitis A -- Hepatitis B -- Hepatitis E -- Polio -- Vector-Borne Viral
Infections -- Yellow Fever -- Japanese Encephalitis -- Dengue,
Chikungunya, and Zika -- Rabies -- Bacterial Infections -- Salmonella
enterica Serovar Typhi -- Vibrio cholerae -- Enterotoxigenic
Escherichia coli (ETEC) -- Neisseria meningitidis -- Streptococcus
pneumoniae -- Clostridium tetani -- Corynebacterium diphtheriae --
Bordetella pertussis -- Mycobacterial Infections -- Mycobacterium
tuberculosis -- Fungal Infections -- Parasitic Infections -- Vector-
Borne Parasite Infections -- Plasmodium Species -- Leishmania Species
-- Trypanosoma Species -- Babesia Species -- Environmentally
Transmitted Parasite Infections -- Strongyloides stercoralis --
Schistosoma Species -- Ingested Parasitic Infections -- Pre-departure
Infectious Disease Evaluation and Recommendations -- Vaccine
Recommendations -- Risk Reduction of Non-vaccine-Preventable
Infections -- Prevention of Food-Borne Illnesses and Diarrhea --
Respiratory Infections -- Insect Protection -- Environmental Exposures

-- Blood-Borne Pathogens -- Sexually Transmitted Infections (STI) --
Post-travel Evaluation -- Conclusion -- Key Points -- References -- 11
Preventative Health in Solid Organ Transplant: Safe Living Post-
transplant -- Introduction -- Pre-transplant Evaluation -- Vaccination
-- Everyday Living Strategies -- Activities of Leisure -- Sexual Health
-- Food and Water Safety -- Animal and Insect Precautions -- Travel
Advice -- Conclusion -- Key Points -- References -- 12 Vaccination
Strategies in Solid Organ and Stem Cell Transplant -- Introduction to
Vaccination in Transplant Recipients -- Specific Vaccine
Recommendations -- Vaccination Against Influenza -- Vaccination
Against Pneumococcal Disease -- Vaccination Against Meningococcal
Disease -- Vaccination Against Hepatitis B Virus.
Vaccination Against Hepatitis A Virus.
