

1. Record Nr.	UNINA9910488695803321
Titolo	Digital human modeling and applications in health, safety, ergonomics and risk management, human body, motion and behavior : 12th international conference, DHM 2021, held as part of the 23rd HCI international conference, HCII 2021, virtual event, July 24-29, 2021, proceedings, part I // Vincent G. Duffy (editor)
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-77817-7
Descrizione fisica	1 online resource (393 pages)
Collana	Lecture Notes in Computer Science ; ; v.12777
Disciplina	620.820113
Soggetti	Medical care - Data processing Human engineering - Data processing Human mechanics - Computer simulation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Foreword -- HCI International 2021 Thematic Areas and Affiliated Conferences -- Contents - Part I -- Contents - Part II -- Ergonomics, Human Factors and Occupational Health -- Addressing Human Factors and Ethics in the Design of 'Future Work' and Intelligent Systems for Use in Financial Services - Person Centered Operations, Intelligent Work & -- the Triple Bottom Line -- 1 Introduction -- 2 Background -- 2.1 Operations Management, Healthy Work & -- Workplace Wellbeing -- 2.2 Stakeholder Evaluation & -- Human Factors Methods -- 2.3 Ethics & -- New Technology Development -- 3 Research Project & -- Methodology -- 3.1 Introduction -- 4 Overview of Emerging Concept -- 5 Discussion: Emerging Methods & -- Innovation -- 6 Conclusion -- References -- Digital Human-in-the-Loop Methodology for Early Design Computational Human Factors -- 1 Introduction -- 2 Literature Review -- 2.1 Early Design Human-Centered Prototyping Framework -- 2.2 The Human Error and Functional Failure Reasoning Framework -- 3 Methodology -- 4 Case Studies -- 4.1 Case Study: Prototyping Framework -- 4.2 Case Study: The Human Error and Functional Failure Reasoning Framework -- 5

Discussions -- References -- Well-Being at Work: Applying a Novel Approach to Comfort Elicitation -- 1 Introduction -- 2 Related Work -- 3 Conceptual Model -- 4 Proof-of-Concept Application -- 4.1 Objective Data Collector -- 4.2 Subjective Data Collector -- 4.3 Configurable Reporter -- 5 Empirical Evaluation -- 5.1 Evaluation Metrics -- 5.2 Results -- 5.3 Discussion -- 6 Conclusion and Future Work -- References -- Opportunities of Digitalization and Artificial Intelligence for Occupational Safety and Health in Production Industry -- 1 Introduction -- 2 Background -- 2.1 Digitalization -- 2.2 Artificial Intelligence -- 2.3 Occupational Safety and Health. 3 Opportunities of Digitalization and Artificial Intelligence for Work Design and Impact on Occupational Safety and Health -- 3.1 Opportunities for Informational Work -- 3.2 Opportunities for Energetic Work -- 4 Implementation of Digitalization and Artificial Intelligence -- 5 Summary and Outlook -- References -- Digital Human Simulation for Fall Risk Evaluation When Sitting on Stepladders -- 1 Introduction -- 2 Method -- 3 Results -- 4 Conclusion -- References -- Study on Evaluation Index of Physical Load of Chemical Prevention Personnel in High Temperature and Humidity Environment -- 1 Introduction -- 2 Method -- 2.1 Participants -- 2.2 Experimental Environment and Equipment -- 2.3 Experiment Content -- 2.4 Data Analysis -- 3 Results and Discussion -- 4 Conclusion -- References -- Human Body and Motion Modeling -- The Wearable Resistance Exercise Booster's Design for the Elderly -- 1 Introduction -- 2 Research Methods -- 2.1 Investigation Objects and Time -- 2.2 Investigation Information -- 2.3 Design Points -- 3 Research Foundation -- 3.1 Theoretical Foundation -- 3.2 Technical Support -- 4 Project Research -- 4.1 Brainstorming -- 4.2 Design Description -- 4.3 Function Extension -- 5 Conclusion -- References -- 3D Model of Ergonomic Socket Mechanism for Prostheses of Transtibial Amputees -- 1 Introduction -- 2 Materials and Methods -- 2.1 Immersion -- 2.2 Analysis and Synthesis -- 2.3 Prototyping -- 3 Results -- 3.1 Balance Observations -- 3.2 Balance Observations -- 3.3 List of Requirements for the Model Definition of an Ergonomic Socket Mechanism -- 3.4 3D Development of the Prosthetic Socket Model -- 4 Conclusion -- References -- Evaluating the Risk of Muscle Injury in Football-Kicking Training with OpenSim -- 1 Introduction -- 2 Methods -- 2.1 OpenSim Model -- 2.2 Data and Simulation -- 2.3 Muscle Fatigue Analysis -- 3 Results. 3.1 Muscle Contribution in Football-Kicking -- 3.2 Fatigue Process of Football-Kicking Training -- 4 Discussion -- 4.1 Contribution of Different Groups of Muscle in the Football-Kicking Motion -- 4.2 Fatigue Process for Football-Kicking Training -- 5 Conclusions -- References -- New Approaches to Movement Evaluation Using Accurate Truck Ingress Data -- 1 Introduction -- 2 Materials and Methods -- 2.1 Experimental Procedure -- 2.2 Transfer of the Movement to the Dynamic Digital Human Model -- 2.3 Data Processing -- 2.4 Data Recording -- 3 Data Clustering and Analyzation -- 4 Results -- 5 Discussion -- 6 Conclusion -- References -- A Two-Step Optimization-Based Synthesis of Squat Movements -- 1 Introduction -- 2 Human Models -- 3 Synthesis Scheme -- 3.1 Motion Synthesis -- 3.2 Post-processing -- 4 Simulation and Validation -- 4.1 Simulation -- 4.2 Validation -- 5 Conclusions -- References -- Ergonomics-Based Clothing Structure Design for Elderly People -- 1 Introduction -- 2 Research Methods -- 2.1 Human Body Measurement -- 2.2 Clothing Record -- 3 Data Collection -- 3.1 Anthropometric Measurements -- 3.2 Dress Form Records -- 4 Analysis and Discussion -- 4.1 Body Shape -- 4.2 Analysis of Upper Garment Shape -- 4.3 Top Style Design -- 5 Summary -- References -- Comparisons of Hybrid Mechanisms

Based on Their Singularities for Bone Reduction Surgery: 3-PRP-3-RPS and 3-RPS-3-PRP -- 1 Introduction -- 2 Robot Architectures and Applications -- 3 Operation Modes -- 3.1 3-PRP Mechanism -- 3.2 3-RPS Mechanism -- 3.3 Hybrid Mechanisms I and II -- 4 Singularity -- 5 Conclusions -- References -- The Measurement and Analysis of Chinese Adults' Range of Motion Joint -- 1 Introduction -- 2 Method -- 2.1 Parameters to be Measured -- 2.2 Equipment Used for Measurement -- 2.3 Measured Sample Size Distribution -- 2.4 Requirements of the Measurement Process.

3 Results -- 3.1 The Effect of Gender on the ROM -- 3.2 The Effect of Age on the ROM -- 3.3 The Effect of BMI on the ROM -- 3.4 The Effect of Region on the ROM -- 3.5 The Effect of Labor Intensity on the ROM -- 3.6 The Impact of Multi-factor Interaction on the ROM -- 4 Conclusion -- References -- Language, Communication and Behavior Modeling -- Modeling Rapport for Conversations About Health with Autonomous Avatars from Video Corpus of Clinician-Client Therapy Sessions -- 1 Introduction -- 2 Related Research on Modeling Rapport -- 3 Overview of Our Approach to Modeling Rapport by Learning from Videos of an Expert in Action -- 3.1 Learning from an Annotated Video Corpus of a Pro -- 3.2 ECA that Can Speak, but Also Listen, to the User with Appropriate Social Cues -- 4 Machine Learning of Multimodal Social Cues from Videos of Counseling Sessions -- 4.1 Data Collection -- 4.2 Data Annotation and Schema -- 4.3 Multimodal Data Pre-processing -- 4.4 Multimodal Data Alignment -- 4.5 Multimodal Feature Selection -- 4.6 Model Induction -- 4.7 Runtime Operation -- 5 Evaluation -- 5.1 Objective Evaluation of the Non-verbal Models -- 5.2 Subjective Evaluation of the Character -- 6 Conclusion -- References -- Finding a Structure: Evaluating Different Modelling Languages Regarding Their Suitability of Designing Agent-Based Models -- 1 Introduction -- 2 Related Work -- 2.1 Aspects of Agent-Based Modelling -- 2.2 General Idea of Agent-Based Models -- 2.3 The ODD Protocol -- 2.4 Modelling Languages -- 3 Requirements Identification -- 3.1 Different Ways to Design Agent-Based Models -- 3.2 Requirements of Agent-Based Models -- 3.3 Suitability of Modelling Languages for Designing Agent-Based Models -- 4 Evaluation of Modelling Languages -- 4.1 Requirements to Design Agent-Based Models and Solutions Offered by Modelling Languages. 4.2 Does the Chosen Modelling Language Offer a Real Benefit as a Basis for an Agent-Based Model? -- 5 Conclusion -- References -- The Role of Embodiment and Simulation in Evaluating HCI: Experiments and Evaluation -- 1 Introduction -- 2 Evaluation Schemes -- 2.1 Time-Based Evaluation -- 2.2 Common Ground-Based Evaluation -- 2.3 Comparing Time-Based and Common Ground-Based Evaluation -- 2.4 How Embodiment Enables Evaluation -- 3 Conclusion -- References -- Tracking Discourse Topics in Co-speech Gesture -- 1 Introduction -- 2 Co-speech in Discourse Management -- 3 QUD - An Intuitive Approach to Discourse Structure -- 4 Using Hand Shape to Track Topics -- 4.1 Data -- 4.2 Case Study 1: Clarification and Correction -- 4.3 Case Study 2: Citation -- 4.4 Case Study 3: Attitude Expression -- 5 Discussion -- References -- Patient-Provider Communication Training Models for Interactive Speech Devices -- 1 Introduction -- 1.1 Training in Patient-Provider Communication -- 1.2 Effect of Patient-Provider Communication -- 1.3 Ontology and Intelligent Agent Research -- 1.4 Utilizing Technology for Training Medical and Dental Students -- 2 Methods and Tools -- 2.1 Ontology Framework for Health Communication -- 2.2 Ontology-Driven Software Engine for Conversational Agents -- 2.3 Modeling Training Dialogue Interaction -- 2.4 Evaluation -- 3 Results -- 4 Discussion and Future

Direction -- 5 Conclusion -- References -- Semantically Related
