

1. Record Nr.	UNINA9910488701503321
Autore	Ni Pengfei
Titolo	Global industry chains : creating a networked city planet : the Global Urban Competitiveness Report (2018-2019) / / Pengfei Ni [and three others]
Pubbl/distr/stampa	Gateway East, Singapore : , : Springer, , [2021] ©2021
ISBN	981-16-2058-X
Descrizione fisica	1 online resource (644 pages)
Disciplina	307.76
Soggetti	Cities and towns - Ratings and rankings
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Senior Consultant -- The Main Authors -- Members of the Editorial Board -- Contents -- 1 Global Urban Competitiveness Ranking 2018-2019 -- 2 The Planet of Cities Toward Diverse Agglomeration, Global Connection, and Extensive Sharing -- 2.1 Cities Have Become More Global, Networked, and Intelligent Over the Past 40 Years -- 2.1.1 The Non-agricultural Aggregation of Factors of Production: Tremendous Changes on the City Meaning -- 2.1.2 Tremendous Changes on World City Functions Caused by Division of World Cities -- 2.1.3 Global Space Competition: A Global City Connected by Internet Infrastructure -- 2.2 Humanity Moving Toward a Connected, Gathering and Sharing City Planet Over the 40 Years -- 2.2.1 The Nature of World Has Changed Because of the Change of City Status: It is a World of Cities -- 2.2.2 Functions of the World Have Changed Because of the Change of Urban Functions: The World Becomes a Large Group -- 2.2.3 The World Form Has Changed Because of the Change of Urban Form: The World Becomes a City -- 2.2.4 The World Pattern Has Been Reshaped by the Evolution of Urban Pattern: The World Becomes a Multicentric World Under Time-space Compression -- 2.3 Market System and IT Shape the Planet of Cities Over the Past 40 Years -- 2.3.1 Market System: Victory and Gradual Deepening of Market Economy -- 2.3.2 Technical Innovation: Promotion and Change by Information Technology -- 2.3.3 Global

Connection: Enhancement and Leap Forward of Soft Connection -- 3
 Global Industry and City Evolution Patterns -- 3.1 Problem Statement
 and Literature Review -- 3.1.1 Problem Statement -- 3.2 Literature
 Review -- 3.3 Theoretical Analysis -- 3.3.1 Model Assumptions -- 3.4
 Evolution of Global Production and Trade Patterns Across Different
 Stages -- 3.4.1 Theoretical Reasoning -- 3.5 Analytical Framework,
 Methodology, and Data Description.
 3.5.1 Analytical Framework -- 3.5.2 Data Description -- 3.5.3
 Construction and Calculation of Industry Relocation Indexes -- 3.6
 Empirical Analysis -- 3.6.1 Evolution of GVCs and the Pattern of World
 Cities -- 3.6.2 Global Industry Evolution Patterns -- 3.7 Empirical
 Analysis -- 3.7.1 Empirical Design -- 3.7.2 Results of the Empirical
 Research -- 3.8 Conclusions -- References -- 4 Analysis
 on the Economic Competitiveness of Global Cities -- 4.1 Global Urban
 Economic Competitiveness: An Annual Review -- 4.1.1 Overall Pattern:
 The Economic Competitiveness of European and American Cities Takes
 the Lead, While Urban Performance in China is a Highlight -- 4.1.2
 Historical Comparison: Asian Urban Competitiveness Keeps Rising,
 While Its Internal Differences Drop -- 4.1.3 Individual Indexes: The
 Indexes of Local Demands, Infrastructure, and Technology Innovation
 Are Critical Factors Affecting Global Urban Economic Competitiveness
 -- 4.2 Comparative Analysis of Urban Competitiveness in China
 and the US -- 4.2.1 Current Pattern: The Urban Economic
 Competitiveness of the US is Higher Than China on the Whole -- 4.2.2
 Historical Comparison: The Rise of Chinese Cities Is Changing
 the Pattern that Developed Economies Dominate World Development --
 4.2.3 Comparison of Individual Indexes: The Social Environment Index
 and Business Cost Index in Chinese Cities Are Higher Than Those
 in the US -- 4.3 Contrastive Analysis of the Competitiveness of North
 America, West Europe, and East Asia -- 4.3.1 Current Pattern: Cities
 in North America Take the Lead, and the Most Competitive Cities Are
 Concentrated in the Top Trio Regions -- 4.3.2 Historical Comparison:
 Urban Competitiveness in East Asia is Rapidly Rising, While Its Internal
 Differences Are Dropping.
 4.3.3 Individual Indexes: North America and West Europe Each Has Its
 Advantages, While East Asia Has an Edge in Social Environment
 and Business Cost -- 4.4 Comparative Analysis of the Competitiveness
 of the Four Major Bay Areas -- 4.4.1 Current Pattern: The San Francisco
 Bay Area Takes the Lead, While the Guangzhou-Hong Kong-Macao
 Greater Bay Area Is at the Bottom -- 4.4.2 Historical Comparison: The
 Tokyo Bay Area and the San Francisco Bay Area Take Turn to Lead,
 and the Guangzhou-Hong Kong-Macao Greater Bay Area Rises Rapidly
 -- 4.4.3 Comparison of Individual Indexes: The Guangzhou-Hong
 Kong-Macao Greater Bay Area Has Advantages in Social Environment
 and Business Cost -- 4.5 Comparative Analysis of the Competitiveness
 of the Ten Major Urban Agglomerations -- 4.5.1 Current Pattern: The
 Urban Agglomerations in Developed Countries Take the Lead -- 4.5.2
 Historical Comparison: Urban Agglomerations in Developed Countries
 Decline While Those in Developing Countries Rise -- 4.6 Comparative
 Analysis of the Top 20 Cities in Economic Competitiveness -- 4.6.1
 Current Pattern: China and the US Dominate the World's Top 20 Cities
 in Economic Competitiveness -- 4.6.2 Historical Comparison: The US
 Consolidates Its Advantages, While Top Cities in China Keep Increasing
 -- 4.6.3 Comparison of Individual Indexes: Financial Service and Social
 Environment Are Important Reasons Causing the Intercity Differences
 Among the World's 20 Cities -- 4.7 Analysis of the Coupling
 Coordination Degree of the Elements of Economic Competitiveness --
 4.7.1 Kernel Density Distribution and Scatter Diagram of the Coupling

Coordination Degree of Cities Worldwide -- 4.7.2 Spatial Distribution

Characteristics of the Coupling Coordination Degree of Cities

Worldwide -- 4.7.3 The Regression Analysis of Economic

Competitiveness by the Coupling Coordination Degree.

5 Analysis on Sustainable Competitiveness of Global Cities -- 5.1 Cities

with, Respectively, Strong and Weak Sustainable Competitiveness are

Clearly Distributed in a Large Portion in the Middle and a Small Portion

at Both Ends, and Sustainable Competitiveness of Asian Cities

Constantly Enhances -- 5.1.1 The Level of Economic Development is

Highly Positively Correlated with the Overall Manifestation

of Sustainable Competitiveness of Cities -- 5.1.2 High-Level

Equilibrium is the Best Goal and Path to Enhance Sustainable

Competitiveness of Cities -- 5.1.3 Technological Innovation

and Human Capital Potential Have the Greatest Impacts and Magnify

the Positive Effects by Means of Direct Effect, Indirect Effect,

and Feedback Effect -- 5.2 Global Ranking of Cities by Sustainable

Competitiveness 2018 -- 5.2.1 Overview -- 5.2.2 Chinese Cities Versus

American Cities: There are Notable Disparities Between Chinese

and American Cities in Sustainable Competitiveness. The Number

of American Cities Performing Well in Sustainable Competitiveness

Indicators Is Far Larger than the Number of Such Chinese Cities.

However, the Internal Divergence Between American Cities Is Widening,

Whereas the Development of Chinese Cities Is Overall More

Coordinated -- 5.2.3 The World's Three Major Economic Centers:

Contrary to Western Europe and North America, East Asia's Economic

Level is Low, the Difference is Large, and the Promotion is Fast -- 5.2.4

Sustainable Competitiveness of the Four Bay Areas: The Tokyo Bay Area

Is the Most Competitive. The Guangdong-Hong Kong-Macau Bay Area

Scores Lowest in Sustainable Competitiveness but Is Catching Up

with the Three Mature Bay Areas.

5.2.5 Global Urban Clusters: The Northeast Region of the US Has

the Best Urban Clusters, While a few Mature Urban Clusters Have Stable

Development and the Overall Polarizing Urban Agglomerations Face

Long-Term Challenges -- 5.2.6 Globe Top 20: Leading the World

in Sustainable Competitiveness with Technology and Human Capital

as the Largest Two Driving Forces -- 5.2.7 The Largest Cities

in the World's Major Countries: The Competitiveness of the Largest

Cities Is Intensifying, and the Strength and Competitiveness

of the Country Determine the Sustainable Competitiveness

of the Largest Cities -- 5.3 Environmental Quality Index Analysis:

Environmental Negative Impacts in Urban Clusters -- 5.3.1 Overall

Pattern: Environmental Endowment and the Kuznets Curve Together

Determine the Quality of Urban Environment -- 5.3.2 Global Top 20:

Coastal Cities and Cities Exhibiting Moderate Economic Growth -- 5.3.3

Comparison of Countries: Wide Disparities Between Chinese

and American Cities in Quality of Environment -- 5.3.4 Urban Cluster

Pattern: Urban Clusters Bring Negative Environmental Impact -- 5.3.5

World City Network -- 5.4 Social Inclusion Index Analysis: Europe

and East Asia Lead in Social Inclusion Index, Culture and Tradition

Determine the Level of Tolerance -- 5.4.1 Overall Pattern: Western

Europe and East Asia Perform Best in Inclusiveness -- 5.4.2 Global Top

20: East Asian Cities Lead the World in Inclusiveness -- 5.4.3

Comparison Between Countries' Cultural Difference Leads to Disparities

in Inclusiveness in China and Chinese -- 5.4.4 Global Ranking

of Countries by Quality of Environment of the City with Best

Environment in Each Country -- 5.5 Analysis of the Science

and Technology Innovation Index: The Strength of the Emerging Cities

in Developed and Emerging Economies is Dazzling.

5.5.1 Overall Pattern: There is a Divergence in Innovation
in Geographical and Political Terms Between Developed and Developing
Countries.
