

1. Record Nr.	UNINA9910488706603321
Autore	Heffron Raphael J.
Titolo	Energy law : an introduction / / Raphael J. Heffron
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-77521-6 9783030775216 3030775216 3030775208 9783030775209
Edizione	[2nd ed.]
Descrizione fisica	1 online resource : illustrations (some color)
Collana	SpringerBriefs in law, , 2192-855X
Disciplina	346.04679
Soggetti	Power resources - Law and legislation Energy industries - Law and legislation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Chapter 1. What Is Energy Law? -- Chapter 2. The Different Levels of Energy Law -- Chapter 3. Issues in Energy Law -- Chapter 4. The Evolution of Energy Law -- Chapter 5. Energy Law Principles -- Chapter 6. Energy Law Research and Conclusions.
Sommario/riassunto	The aim of this short text is simply to introduce a reader to this topic. It is intended for a global audience and rather than being restricted to potential energy law students of a particular country. It is also written for students of other disciplines such as geographers, social scientists and engineers. It should also be engaging to those in a variety of professional practices who want an accessible background to and overview of the subject. The first edition of Energy Law: An Introduction was a great success and this extended second edition is expected to be just as successful. It is used widely as a core text in energy law courses across the world and this second issue adds further discussion on important topics such as energy law principles and drivers. Further, it highlights issues of energy justice, a growing and an emergent topic which is also at the core of the energy law principles and the key drivers of why new energy law is formulated. The text aims to outline

the principles and central logic behind energy law. Therefore, readers from across the world should be able to use it as a guide to thinking about energy law in their own countries. A variety of examples from many different countries are included in the text and while examples and comparisons are mainly from the EU and US, they represent good examples of more advanced and innovative energy law. For those readers who seek further or more in-depth knowledge, this text will only serve as an introduction. However, a key focus of the book is to direct the reader where they to look for further information and within the book there are suggested extra readings, the key recommended journals to read and other sources of information based on institutions who publish further material in this area. Overall this second edition of Energy Law: An Introduction aims to inspire students and others to contribute to try and improve energy law across the world and enable us all to contribute in our own small way to delivering a just and sustainable energy world for future generations.
