

1. Record Nr.	UNINA9910488709803321
Titolo	Pediatric cardiac CT in congenital heart disease // Dilachew A. Adebo, editor
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-74822-7
Descrizione fisica	1 online resource (274 pages)
Disciplina	616.120757
Soggetti	Heart - Tomography Tomografia Malformacions del cor Cardiologia pediàtrica
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Intro -- Foreword -- Preface -- Acknowledgments -- Contents -- Contributors -- 1: Advantages of Cardiac CT Scan over Other Diagnostic Techniques -- Introduction -- Cardiac CT Image Fusion with Fluoroscopy to Guide Cardiac Catheterization -- Application of Cardiac CT in Electrophysiology Intervention -- Cardiac CT Images for Three-Dimensional Modeling of Complex Congenital Heart Disease -- References -- 2: Techniques of Cardiac CT Scan: Patient Preparation, Contrast Medium, Scanning, and Post-Processing -- Introduction -- Patient Preparation and Contrast Medium -- Cardiac CT Techniques and Post-Processing -- References -- 3: Evaluation of Cardiac Malposition, Cardiac Segmental Approach, and Heterotaxy Syndrome -- Introduction -- Cardiac Position -- Pulmonary and Abdominal (Visceral) Situs -- Systemic Venous Connections -- Pulmonary Venous Connections -- Atrial Arrangement or Situs -- Ventricular Situs and Atrioventricular Relationships -- Outflow Tracts and Ventriculoarterial Alignments -- The Great Arteries -- Conclusion -- References -- 4: Systemic Venous Anomalies -- Introduction -- Embryology -- Left Superior Vena Cava -- Diagnosis -- Management -- Interrupted Inferior Vena Cava with Azygos Continuation --

Diagnosis -- Management -- Other Systemic Venous Malformations --  
References -- 5: Anomalous Pulmonary Venous Connections and Cor  
Triatriatum -- Introduction -- Embryology and Anatomy -- Diagnosis  
-- Patient Preparation, Contrast Medium, and Cardiac CT Technique --  
Management Approach -- Outcomes -- References -- 6: Septal  
Defects: Atrial Septal Defects, Ventricular Septal Defects,  
Atrioventricular Septal Defects, and Unroofed Coronary Sinus --  
Introduction -- Embryology and Anatomy -- Atrial Septal Defects --  
Ventricular Septal Defects -- Atrioventricular Septal Defects --  
Diagnosis.  
Patient Preparation, Contrast Medium, and Cardiac CT Technique --  
Management Approach -- Outcome -- References -- 7:  
Atrioventricular Valves: Tricuspid Valve -- Introduction -- Embryology  
-- Tricuspid Atresia -- Diagnosis -- Cardiac CT Technique and Patient  
Preparation -- Management -- Outcome -- Ebstein Anomaly --  
Diagnosis -- Cardiac CT Technique and Patient Preparation --  
Management -- Outcomes -- References -- 8: Atrioventricular Valves:  
Congenital Mitral Valve Abnormalities -- Introduction -- Embryology  
-- Supravalvular Mitral Ring -- Parachute Mitral Valve -- Mitral Valve  
Dysplasia -- Isolated Cleft Mitral Valve -- Mitral Arcade or Hammock  
-- Double Orifice Mitral Valve -- Congenital Mitral Valve Prolapse --  
Diagnosis -- Management -- References -- 9: Atrioventricular  
Connections: Double-Inlet Ventricle, Atrioventricular Discordance,  
and Congenitally Corrected Transposition of Great Arteries --  
Congenitally Corrected Transposition of Great Arteries -- Introduction  
-- Anatomy and Embryology -- Diagnosis -- Management Approach --  
Outcome -- Double-Inlet Ventricle -- Introduction -- Double-Inlet Left  
Ventricle -- Management Approach -- References -- 10: Right  
Ventricular Outflow Tract: Pulmonary Valve Stenosis -- Introduction --  
Embryology and Anatomy -- Diagnosis -- Management Approach --  
Outcome -- References -- 11: Right Ventricular Outflow Tract:  
Pulmonary Atresia with Intact Ventricular Septum -- Introduction --  
Techniques of Cardiac CT -- Diagnosis -- Management Approach --  
Outcome -- References -- 12: Right Ventricular Outflow Tract:  
Pulmonary Valve Atresia, Ventricular Septal Defect, and Major  
Aortopulmonary Collateral Arteries -- Introduction -- Anatomy  
and Embryology -- Diagnosis -- Patient Preparation, Contrast Medium,  
and Cardiac CT Technique -- Management Approach -- Outcome --  
References.  
13: Right Ventricular Outflow Tract: Tetralogy of Fallot -- Introduction  
-- Embryology and Anatomy -- Diagnosis -- Patient Preparation,  
Contrast Medium, and Cardiac CT Technique -- Management Approach  
-- Outcome -- References -- 14: Right Ventricular Outflow Tract:  
Absent Pulmonary Valve Syndrome -- Introduction -- Anatomy  
and Embryology -- Diagnosis -- Management Approach -- Outcome  
-- References -- 15: Left Ventricular Outflow Tract: Congenital Aortic  
Valve and Left Ventricular Outflow Anomalies -- Introduction --  
Embryology -- Aortic Stenosis -- Diagnosis -- Management --  
Outcomes -- Subvalvar Aortic Stenosis -- Diagnosis -- Management --  
Outcomes -- Supravalvar Aortic Stenosis -- Diagnosis -- Management  
-- Outcomes -- References -- 16: Left Ventricular Outflow Tract:  
Hypoplastic Left Heart Syndrome -- Introduction -- Embryology  
and Anatomy -- Diagnosis -- Cardiac CT Technique and Patient  
Preparation -- Management -- Outcome -- References -- 17: Double-  
Outlet Right Ventricle -- Introduction -- Embryology and Anatomy --  
Diagnosis -- Patient Preparation, Contrast Medium, and Cardiac CT  
Technique -- Management Approach -- Outcome -- References -- 18:  
Dextro-Transposition of the Great Arteries -- Introduction --

Embryology and Anatomy -- Diagnosis -- Patient Preparation, Contrast Medium, and Cardiac CT Technique -- Management Approach -- Outcome -- References -- 19: Truncus Arteriosus -- Introduction -- Embryology and Anatomy -- Diagnosis -- Management Approach -- Outcome -- References -- 20: Anomalous Aortic Origin of Pulmonary Arteries -- Introduction -- Embryology and Anatomy -- Diagnosis -- Patient Preparation, Contrast Medium, and Cardiac CT Technique -- Management Approach -- Outcome -- References -- 21: Anomalous Coronary Arteries -- Introduction -- Embryology and Anatomy -- Anomalous Left Coronary Artery from the Pulmonary Artery. Anomalous Aortic Origin of the Coronary Artery -- Coronary Artery Fistulas -- Myocardial Bridges -- Diagnosis -- Anomalous Left Coronary Artery from the Pulmonary Artery -- Anomalous Aortic Origin of the Coronary Artery -- Coronary Artery Fistulas -- Myocardial Bridges -- Patient Preparation, Contrast Medium, and Cardiac CT Technique -- Management Approach -- Anomalous Left Coronary Artery from the Pulmonary Artery -- Anomalous Aortic Origin of the Coronary Artery -- Coronary Artery Fistulas -- Myocardial Bridges -- Outcomes -- Anomalous Left Coronary Artery from the Pulmonary Artery -- Anomalous Aortic Origin of the Coronary Artery -- Coronary Artery Fistulas -- Myocardial Bridges -- References -- 22: Aneurysm of the Sinus of Valsalva, Aortic-Left Ventricular Tunnel -- Introduction -- Embryology and Anatomy -- Diagnosis -- Management Approach -- References -- 23: Aortopulmonary Window -- Introduction -- Embryology and Anatomy -- Diagnosis -- Patient Preparation, Contrast Medium, and Cardiac CT Technique -- Management Approach -- Outcomes -- References -- 24: Aortic Arch Anomalies: Coarctation of the Aorta and Aortic Arch Hypoplasia -- Introduction -- Embryology and Anatomy -- Diagnosis -- Patient Preparation, Contrast Medium, and Cardiac CT Technique -- Management Approach -- Outcome -- References -- 25: Aortic Arch Anomalies: Aortic Arch Interruption -- Introduction -- Embryology and Anatomy -- Diagnosis -- Patient Preparation, Contrast Medium, and Cardiac CT Technique -- Management Approach -- Outcome -- References -- 26: Vascular Rings and Slings -- Vascular Ring -- Introduction -- Embryology and Anatomy -- Presentation and Diagnosis -- Double Aortic Arch -- Role of CT -- Right Aortic Arch with Anomalous Origin of Left Subclavian Artery and Left Ductus -- Role of CT -- Circumflex Aortic Arch. Left Aortic Arch with Aberrant Right Subclavian Artery and Right Ductus -- Patient Preparation, Contrast Medium, and Cardiac CT Technique -- Management Approach and Outcome -- Double Aortic Arch -- Right Aortic Arch with Anomalous Origin of Left Subclavian Artery and Left Ductus -- Circumflex Aortic Arch -- Pulmonary Artery Sling -- Introduction -- Embryology and Anatomy -- Presentation and Diagnosis -- Role of CT -- Partial Pulmonary Artery Sling -- Management Approach and Outcome -- Pulmonary Artery Sling -- Partial Pulmonary Artery Sling -- References -- 27: Cardiac Tumors -- Introduction -- Utility of CT and Positron Emission Tomography for Cardiac Tumor Diagnosis -- Tumors -- Rhabdomyoma -- Diagnosis -- Management -- Fibroma -- Diagnosis -- Management -- Myxoma -- Diagnosis -- Management -- Teratoma -- Diagnosis -- Management -- Miscellaneous Cardiac Masses -- References -- 28: Cardiac Computed Tomography After Single Ventricle Palliation -- Introduction -- Diagnosis -- Patient Preparation, Contrast Medium, and Cardiac CT Technique -- Outcome -- References -- 29: Cardiac Computed Tomography in Evaluation of Ventricular Function -- Introduction -- Image Processing -- References -- 30: Role of Cardiac

CT in Preoperative and Postoperative Evaluation of Congenital Heart Defects in Children -- Anomalous Systemic Venous Connections -- Preoperative Information -- Persistent Left Superior Vena Cava -- Interruption of the Inferior Vena Cava -- Postoperative Information -- Anomalous Pulmonary Venous Connections and Cor Triatriatum -- Preoperative Information -- Partial Anomalous Pulmonary Venous Connection -- Total Anomalous Pulmonary Venous Connection -- Cor Triatriatum -- Postoperative Information -- Partial and Total Anomalous Pulmonary Venous Connection -- Cor Triatriatum. Septal Defects: Atrial Septal Defects, Atrioventricular Septal Defects, Ventricular Septal Defects, and Unroofed Coronary Sinus.
