

1. Record Nr.	UNINA9910488727003321
Autore	Grzesik Wit
Titolo	Hybrid manufacturing processes : physical fundamentals, modelling and rational applications // Wit Grzesik, Adam Ruszaj
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-77107-5
Descrizione fisica	1 online resource (247 pages)
Collana	Springer Series in Advanced Manufacturing
Disciplina	670
Soggetti	Manufacturing processes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Symbols and Abbreviations -- Latin Symbols -- Greek Symbols -- Abbreviations -- 1 General Characteristics of Material Shaping Processes -- 1.1 Classification of Material Removal Processes -- 1.2 Classification of Additive Processes -- References -- 2 Classification of Hybrid Machining Processes Generating by Different Rules -- 2.1 Classification Criteria and Systems -- 2.2 Generation of Hybrid Conventional and Unconventional Processes -- 2.3 Survey of Hybrid Machining Processes -- 2.3.1 Hybrid Assisted Processes -- 2.3.2 Hybrid Combined Processes -- References -- 3 Application of Hybrid Machining Processes in Industry -- 3.1 Role of Hybrid Machining Processes in Sustainable Manufacturing and Production 4.0 Strategy -- 3.2 Application Areas of Hybrid Machining Processes in Various Industry Sectors -- 3.3 Applications of Hybrid Micro and Nano-Machining Processes -- 3.4 Future Vision of Hybrid Manufacturing Processes -- References -- 4 Physical Fundamentals of Conventional and Unconventional Machining Processes -- 4.1 Physical Phenomena in the Zone of Machining Processes -- 4.1.1 Cutting Processes -- 4.1.2 Abrasive Processes -- 4.1.3 Electrodischarge Machining (EDM) -- 4.1.4 Electrochemical Machining (ECM) -- 4.1.5 Water Jet and Abrasive Water Jet Machining Processes -- 4.1.6 Laser Beam Machining Process -- 4.1.7 Ion Beam and Electron Beam Machining Processes -- 4.2 Characterization of Mechanical Influence on the Workpiece Material --

4.3 Characterization of Thermal Influence on the Workpiece Material --
4.4 Constitution of Subsurface Layer of the Workpiece Material -- 4.5
Possibilities of Controlling Surface Layer Properties by Means of Hybrid
Processes -- References -- 5 Modelling of Hybrid Machining Processes
-- 5.1 Models of Conventional and Unconventional Machining
Processes.
5.1.1 Models of Cutting and Abrasive Processes -- 5.1.2 Models
of EDM Process -- 5.1.3 Models of ECM Process -- 5.1.4 Models of LBM
Process -- 5.1.5 Models of WJM Process -- 5.2 Constitutive Materials
Models -- 5.3 Techniques of Determination of Material Properties
Under Complex Physical Interactions -- 5.4 Modelling Techniques --
5.4.1 Analytical Models -- 5.4.2 Numerical Modelling -- 5.4.3
Modelling Using AI Techniques -- References -- 6 Vibration-Assisted
Machining Processes -- 6.1 Classification of Vibration-Assisted
Machining Processes -- 6.2 Vibration-Assisted Cutting Processes --
6.2.1 Physical and Technological Effects -- 6.2.2 Processes
with the Assistance of Low Frequency Vibration (VAM) -- 6.2.3
Processes with the Assistance of Ultrasonic Vibrations (UAM)-Turning,
Drilling and Milling -- 6.3 Vibration-Assisted Grinding and Polishing
Processes -- 6.4 Vibration-Assisted EDM Processes -- 6.5 Vibration-
Assisted ECM Processes -- 6.6 Industrial Applications of Vibration-
Assisted Machining Processes -- References -- 7 Media-Assisted
Machining Processes -- 7.1 Classification of Media-Assisted Machining
Processes (MAM) -- 7.2 Physical, Tribological and Technological Effects
-- 7.3 Fluid Media-Assisted Machining Processes -- 7.3.1 Fluid Media-
Assisted Cutting Processes -- 7.3.2 Fluid Media-Assisted EDM Process
-- 7.4 Cryogenic Subtractive Processes -- 7.4.1 Introduction -- 7.4.2
Machining Processes with Cooled CO₂ -- 7.4.3 Cryogenic Machining
Processes with Liquid Nitrogen (LN₂) -- 7.5 Industrial Applications
of Liquid and Gaseous-Assisted Machining Processes -- References --
8 Magnetic and Electric Field-Assisted Machining Processes -- 8.1
Introduction -- 8.2 Magnetic Field-Assisted Finishing Processes -- 8.3
Magnetic Field-Assisted Electrodischarge Processes -- 8.4 Magnetic
Field-Assisted Electrochemical Processes.
8.5 Electric Field-Assisted Processes -- References -- 9 Thermally-
Assisted Machining Processes -- 9.1 Classification of Thermally-
Assisted Machining Processes -- 9.2 Physical and Technological Effects
-- 9.3 Laser-Assisted Machining (LAM) -- 9.3.1 Laser-Assisted Cutting
Processes -- 9.3.2 Laser-Assisted Grinding Processes -- 9.3.3 Laser-
Assisted WJM Process -- 9.3.4 Laser-Assisted EDM Processes -- 9.3.5
Laser-Assisted ECM Processes -- 9.4 Plasma-Assisted Machining (PAM)
Processes -- 9.5 Industrial Applications of Thermally-Assisted
Machining Processes -- References -- 10 Mixed Hybrid Processes --
10.1 Classification of Hybrid Machining Methods -- 10.2 Combination
of Subtractive Conventional Processes -- 10.2.1 Turn-Milling Process
-- 10.2.2 Turn-Broaching Process -- 10.3 Combination of Subtractive
Conventional and Non-conventional Processes -- 10.3.1 Electro-
Discharge Grinding (EDG) -- 10.3.2 Electrochemical Grinding (ECG)
and Finishing -- 10.3.3 Electrochemical Finishing -- 10.4 Combination
of Subtractive Non-conventional Processes -- References -- 11 Hybrid
Processes with Controlled Mechanisms -- 11.1 Classification of Hybrid
Machining Methods -- 11.2 Synergetic Physical and Technological
Effects -- 11.3 Grind Hardening and Strengthening -- 11.4
Combination of Rolling and Cryogenic Hardening -- 11.5 Combination
of Subtractive and Transformative Processes (Sequential Cutting
and Burnishing Processes) -- 11.6 Industrial Applications of Machining
Processes with Controlled Mechanisms -- References -- 12 Hybrid
Additive and Subtractive Processes -- 12.1 Applications of Different

Additive Technologies and Subtractive Processes -- 12.1.1 Introduction
-- 12.1.2 Layer Deposition Techniques in Additive Processes -- 12.2
Special Multi-axis Manufacturing Platforms for Hybrid Additive-
Subtractive Processes.
12.2.1 Constructions of Integrated Modular Manufacturing Platforms --
12.2.2 Programming of Multi-axis Hybrid Machining Processes -- 12.3
Repair and Renovation Technologies -- 12.4 Development Trends
in Hybrid Additive-Subtractive Processes -- References -- 13
Economics and Optimization Strategies of Hybrid Processes -- 13.1
Optimization Criteria and Models -- 13.2 Optimization Criteria
and Algorithms for the Selection of Machining Conditions -- 13.3
Optimization Fundamentals -- References -- 14 Influence of Process
Hybridization on Surface Integrity -- 14.1 Structural Models
of Subsurface Layer -- 14.2 Characteristics of Surface Roughness
in Different Hybrid Machining Processes -- 14.3 Physical Properties
of Subsurface Layer -- 14.3.1 Characteristics of Physical Properties
of Subsurface Layer -- 14.3.2 Residual Stresses in Subsurface Layer --
14.3.3 Strain-Hardening Effect in the Subsurface Layer -- 14.3.4
Changes of Material Microstructure and Surficial Defects -- References.
