

1. Record Nr.	UNINA9910488727303321
Titolo	Recent trends in engineering design : select proceedings of ICAST 2020 // Anand Parey, Rajesh Kumar, Manpreet Singh, editors
Pubbl/distr/stampa	Singapore : , : Springer, , [2021] ©2021
ISBN	981-16-1079-7
Descrizione fisica	1 online resource (316 pages)
Collana	Lecture Notes in Mechanical Engineering
Disciplina	620.0042
Soggetti	Engineering design Computer-aided engineering Sustainable design
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Contents -- About the Editors -- Parametric Investigation of Turning Process Using DEMATEL Approach -- 1 Introduction -- 2 DEMATEL Method -- 3 Experimental Details -- 4 Result and Discussion -- 5 Conclusion -- References -- Analytical Determination of Rheological Parameters of MR Fluids -- 1 Introduction -- 2 Development of MR Fluid -- 3 Relative Permeability Approach for Fluid Characterization -- 4 Results and Discussions -- 5 Conclusions -- References -- Design, Analysis, and Prototyping of USB-A Female Shield -- 1 Introduction -- 2 Design and Modeling Details -- 2.1 Design of USB Female Shield -- 3 Finite Element Analysis of USB-A 3.1 Female -- 3.1 Simulation Model of FEA -- 3.2 Temperature Rise Due to Contact Resistance -- 3.3 Steady-State Thermal Analysis of USB-A Female Shield -- 4 Prototyping of USB-A Using 3D Printing Machine -- 4.1 Material Used for 3D Printer Filament -- 5 Results and Discussion -- 6 Conclusion -- References -- Comparison of Line Contact and Point Contact Behavior in Rolling Element Bearing Using Statistical Analysis of Vibration Signal -- 1 Introduction -- 2 Theoretical Background -- 2.1 Root Mean Square (RMS) -- 2.2 Standard Deviation -- 2.3 Skewness -- 2.4 Kurtosis -- 2.5 Fast Fourier Transform (FFT) -- 3 Characteristic Defect Frequency Calculations -- 4 Experimental Setup and Data Acquisition System -- 5 Result

and Discussion -- 5.1 Frequency Spectrum Analysis -- 6 Conclusion --
References -- Vibration Analysis for Failure Detection of Bearing
and Gear Assembly -- 1 Introduction -- 1.1 Vibration Analysis -- 2
Experimental Studies -- 2.1 Experimental Setup Description -- 2.2
Experimental Procedure -- 3 Result and Discussion -- 3.1 Time-
Domain Analysis -- 3.2 Frequency-Domain Analysis -- 4 Conclusion --
References.

Shrinkage Optimization and Development of Predictive Model
for Injection-Molded Part Using Numerical Simulation Combined
with Artificial Neural Network -- 1 Introduction -- 2 Experimental
Details -- 3 Taguchi Method -- 4 Results and Discussion -- 4.1 Anova
-- 4.2 Neural Network -- 5 Conclusions -- References -- Deposition
of Metallic Coating on Plastic Substrate Material Using Cold Spray -- 1
Introduction -- 2 Discussion -- 2.1 Polyvinyl Chloride (PVC) -- 2.2
Polypropylene PP -- 2.3 Polycarbonate PC -- 3 Conclusion --
References -- A Review: Bio-compatible Thermal Spray Coating on Bio-
implant -- 1 Introduction -- 2 Coating Methods and Technologies -- 3
Conclusions -- References -- Astrophysical Black Holes-A Review -- 1
Introduction -- 2 Black Holes Under the Theory of General Relativity --
3 The Astrophysical Black Holes -- 3.1 The SM Black Holes -- 3.2 STM
Black Holes -- 3.3 IM Black Holes -- 4 Kerr Black Holes -- 5 Testing
the Fundamental Physics with a Black Hole -- 5.1 Motivations -- 5.2
Electromagnetic Tests -- 5.3 Gravitational Wave Tests -- 6 Concluding
Remarks -- References -- Kenaf-Fiber-Based Bio-materials: A Review
on Processing and Mechanical Properties -- 1 Introduction -- 2 Kenaf
Fiber -- 3 Kenaf Fiber Physical and Mechanical Properties -- 4 Kenaf
Fiber-Reinforced Polymer Composites -- 5 Conclusions -- 6 Future
Work -- References -- Numerical Simulation of Bi-material Interfacial
Adiabatic Crack Using EFGM and XFEM -- 1 Introduction -- 2 EFGM
and XFEM Formulation -- 3 Numerical Implementation -- 3.1 Results
and Discussions -- 4 Conclusion -- References -- Structural and Modal
Analysis of PEEK-CF Composite for Aircraft Wing -- 1 Introduction -- 2
Methodology and FEA Simulation -- 2.1 Problem Description -- 2.2
Selection and Properties of Materials -- 2.3 Design Methodology -- 2.4
Design of Aircraft Wing Using CATIAV5R20 -- 2.5 Procedure.
2.6 Analysis of Aircraft Wing -- 3 Results and Discussion -- 3.1
Structural Analysis -- 3.2 Results of Modal Analysis -- 4 Conclusions
-- References -- Formulation of Stress Concentration Factor of a Finite
Plate with an Elliptical Hole of High Eccentricity Ratio -- 1 Introduction
-- 2 Problem Description -- 2.1 Validation of the Process (Roark's
Formula) -- 3 Methodology -- 3.1 Geometry -- 3.2 Meshing -- 3.3
Loads and Constraints -- 4 Results and Discussion -- 4.1 Results
for Eccentricity Ratio More Than 10 -- 4.2 Empirical Formulation -- 5
Conclusions -- References -- Design and Development
of the Automated Multimedia Device for Memorials -- 1 Introduction --
1.1 Background -- 2 Methodology and Development -- 2.1 Other
Design Concerns -- 3 Conclusions -- References -- Statistical
Investigation on Reliability of Single-Hole Pin Joints Strength
and Failure Mechanisms in Glass-Epoxy Composite Laminates -- 1
Introduction -- 2 Sample Formation and Testing Method -- 3 Weibull
Distribution -- 4 Result and Discussion -- 4.1 Experimental Results
of Unidirectional GFREC -- 4.2 Probability Study -- 5 Conclusion --
References -- Three-Dimensional Non-linear Transient Analysis
for Predicting the Defect Propagation Rate of Taper Roller Bearing Using
Finite Element Method -- 1 Introduction -- 2 Mathematical Model -- 3
Finite Element Analysis -- 3.1 Building of Bearing Finite Element Model
-- 3.2 Defining Material Properties -- 3.3 Define Contact and Check
Contact Element -- 3.4 Selecting Element Type and Meshing -- 3.5

Boundary Conditions and Apply Loads -- 4 Result and Discussion -- 5
Conclusion -- References -- Cooling System Design of PPE
with Simulation -- 1 Introduction -- 2 Background -- 3 Modeling -- 4
Experimental Procedure -- 5 Results and Discussion -- 5.1 Results --
5.2 Discussion -- 6 Conclusion -- References.
Parametric Optimization of Hole Quality in Laser Drilling Kevlar/Basalt
Hybrid FRP Composite -- 1 Introduction -- 2 Methodology, Material,
and Experimentation -- 3 Taguchi Methodology -- 4 Results
and Discussion -- 5 Conclusions -- References -- Flywheel Energy
Application in Commercial and Agricultural Field: A Typical Review -- 1
Introduction -- 2 Flywheel Materials and Shapes -- 3 Recent Advances
in a Flywheel -- 4 Agricultural Application of Flywheel -- 5 Results
and Discussion -- 6 Conclusions -- References -- Cyclostationary
Analysis-Based Gearbox Fault Diagnosis Under Varying Speed -- 1
Introduction -- 2 Theoretical Background -- 2.1 Time-Domain
technique- TSA -- 2.2 Kurtosis -- 2.3 Frequency Domain technique-
Spectral Analysis -- 2.4 Cyclostationarity-Based Kurtosis -- 3
Experimental Setup -- 3.1 Test Rig -- 4 Results and Discussion -- 4.1
Analysis Using Time Synchronous Averaging and Kurtosis -- 4.2
Analysis Using Spectral Kurtosis -- 4.3 Analysis Using Cyclostationarity
Analysis -- 5 Conclusion -- References -- Control System for Hybrid
Journal Bearing: A Fuzzy Approach -- 1 Introduction -- 1.1 Main Oil
Pump (MOP) -- 1.2 Auxiliary Oil Pump (AOP) -- 1.3 Emergency Oil
Pump (EOP) -- 2 Lubrication System of Hybrid Bearing -- 3 Fuzzy Logic
Approach -- 4 Fuzzy Expert System -- 4.1 Algorithm for Fuzzy Expert
System-Based Selection of Fluid Film Bearing -- 4.2 Fuzzification -- 5
Rule Base -- 6 Conclusion -- References -- Design and CFD Analysis
on Flow Through a Reactive Muffler of Four-Cylinder Diesel Engine -- 1
Introduction -- 2 Literature Review -- 3 Design Methodology -- 4
Detail Study -- 5 Problem Statement and Formulation -- 6 Boundary
Conditions (B. C) -- 7 Results and Discussions -- 7.1 Pressure
and Velocity Variation in Model 1 -- 7.2 Pressure and Velocity Variation
in Model 2 -- 7.3 Pressure and Velocity Variation in Model 3.
7.4 Pressure and Velocity Variation in Model 4 -- 7.5 Pressure
and Velocity Variation in Model 5 -- 8 Conclusion -- References --
Modeling of Chipped Tooth Fault in Straight Bevel Gears -- 1
Introduction -- 2 Dynamic Modeling of One-Stage Straight Bevel
Gearbox -- 3 Modeling of Meshing Stiffness -- 3.1 Meshing Stiffness
of Healthy Bevel Gear -- 3.2 Meshing Stiffness with Chipped Tooth
Fault -- 4 Simulation and Results -- 4.1 Dynamic Response
of the Healthy Bevel Gear System -- 4.2 Dynamic Response of Bevel
Gear with Chipped Tooth Fault -- 5 Experimental Validation -- 6
Conclusion -- References -- Fatigue Crack Growth, Life Estimation,
and Comparative Analysis of Carbon Steels A333 Gr 6 Material Piping
Component Using FEA Approach -- 1 Introduction -- 2 Fatigue
Research History -- 3 Finite Element Approach -- 4 Methodology --
4.1 Pipe Specimen Modeling and FEM Analysis -- 5 Comparison of FEM
Results with ASM Solution and M. Bergman Solution -- 6 Conclusions
-- References -- Analytical Hierarchy Process in SMEs of Punjab -- 1
Introduction -- 2 Prioritization of Occupational Safety Factors Using
AHP -- 3 AHP Hierarchy Model for SSMLs and MSMLs -- 4 Conclusion --
References -- A Study of Virtual Simulation for Five-Axis Machining --
1 Introduction -- 2 Tool Path Planning and Tool Path Generation -- 3
Validation of Tool Path Using Machining Simulation -- 4 Case Study --
5 Summary -- References -- An Investigation of Crack Structural
Analysis and Its Propagation of a Taper Roller Bearing Under Different
Misalignment Conditions -- 1 Introduction -- 2 Shannon Entropy --
2.1 Shannon Entropy -- 2.2 Orbit Plots -- 3 Experimentation -- 3.1

Daubechies Wavelet -- 3.2 Morlet Wavelet -- 3.3 Meyer Wavelet -- 3.4
Orbit Plots -- 3.5 Crack Analysis Using SEM -- 4 Conclusions --
References.

Development Method, Manufacturing Process of Fibre Reinforced
Polymer Composite Type Helical Springs: A Review.
