Sommario/riassunto	The first volume in the new Cambridge Handbooks in Behavioral Genetics series, Behavioral Genetics of the Mouse provides baseline information on normal behaviors, essential in both the design of experiments using genetically modified or pharmacologically treated animals and in the interpretation and analyses of the results obtained. The book offers a comprehensive overview of the genetics of naturally occurring variation in mouse behavior, from perception and spontaneous behaviors such as exploration, aggression, social interactions and motor behaviors, to reinforced behaviors such as the different types of learning. Also included are numerous examples of

potential experimental problems, which will aid and guide researchers trying to troubleshoot their own studies. A lasting reference, the thorough and comprehensive reviews offer an easy entrance into the extensive literature in this field, and will prove invaluable to students and specialists alike.

Nota di contenuto	Friedrich D.E. Schleiermacher -- Ernst Troeltsch -- Karl Barth -- Paul Tillich -- Karl Rahner -- John D. Hick -- Raimon Panikkar -- Überlegungen zur Konstitution einer Theologie der Religionen.
Sommario/riassunto	Die gegenwärtige theologische Auseinandersetzung mit ausserchristlichen Religionen ist nicht zu verstehen ohne Kenntnis der grossen Entwürfe aus der jüngeren Vergangenheit. In diesem Band werden die «Leuchttürme» der Theologie der Religionen aus dem 19. und 20. Jahrhundert dargestellt: Friedrich Schleiermacher, Ernst Troeltsch, Karl Barth, Paul Tillich, Karl Rahner, John Hick und Raimon Panikkar – und am Rand auch Mark Heim und Jacques Dupuis. Das geschieht aber nicht nur aus theologischgeschichtlichem Interesse, sondern auch im Blick darauf, welche Impulse diese Entwürfe der heutigen Diskussion geben können. Wenn sie auch ihrer Zeit verhaftet sind, so behandeln sie doch Grundfragen, die sich stellen, wenn man Religion und Religionen zum Thema der Theologie macht.
