

1. Record Nr.	UNINA9910492149303321
Titolo	Forming the Future : Proceedings of the 13th International Conference on the Technology of Plasticity // edited by Glenn Daehn, Jian Cao, Brad Kinsey, Erman Tekkaya, Anupam Vivek, Yoshinori Yoshida
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021
ISBN	3-030-75381-6
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (2889 pages)
Collana	The Minerals, Metals & Materials Series, , 2367-1696
Disciplina	620.11233
Soggetti	Metals Materials - Analysis Mechanics, Applied Building materials Materials Metals and Alloys Materials Characterization Technique Engineering Mechanics Steel, Light Metal Metal-organic Frameworks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Part I Honorary Symposium: Taylan Altan -- 1 Self-optimized, Intelligent Open-Loop-Controlled Steel Strip Straightening Machine for Advanced Formability -- 2 A Vision of Numerically Controlled, Autonomous Manufacturing and Metal Forming -- 3 Investigation of Effects of Part Features in Single Point Incremental Forming of Narrow Channels -- 4 Enhancing Tool Life by Manipulating the Die Elastic Strain Field During Extrusion -- Part II Honorary Symposium: Niels Bay -- 5 Oscillation-Free Determination of Material Properties at High Strain Rate -- 6 Tribological Conditions in Hot Bending of 22MnB5 Tubes -- 7 In Search of the Perfect Sheet Metal Forming Tribometer -- 8 A Contact and Friction Model for Forming of Galvanized Steel Sheet Based on Fractal Theory -- 9 On

the Characterization of Fracture Loci in Thin-Walled Tube Forming -- 10 Deformation Mechanisms in Tool-Workpiece Asperity Contact in Metal Forming -- 11 Welding of Aluminium in Chip Extrusion -- Part III Honorary Symposium: Xue Yu Ruan -- 12 Bulk Microforming from Sheet Metal-A Promising Approach for the Mass Production of Cold-Formed Metallic Micro Parts -- 13 Machine Learning (ML)-Based Prediction and Compensation of Springback for Tube Bending -- 14 Ductile Fracture Prediction of Hot-Stamped Boron Steel 22MnB5 with Modified Mohr-Coulomb and Hosford-Coulomb Models -- 15 Understanding the Microscale Plastic Behavior and Deformation Mechanism of Magnesium Alloy via Ex Situ Experiments and Full-Field Crystal Plasticity Modeling -- Part IV Honorary Symposium: Yasuhisa Tozawa -- 16 A Plasticity Framework for Forming Applications -- 17 Hole Expansion Simulation of Steel Sheet Considering Differential Hardening -- 18 Surface Quality of Extruded Sidewall in Cold Backward Cup Extrusion with Low-Frequency Torsional Oscillation. 19 Anisotropic Ductile Fracture Estimation of Diagonal Cracks in Flange-Shaped Parts -- 20 Prediction of Microstructure Behavior During Large-Scale Hot Forging of Ni-Based Superalloy -- Part V Honorary Symposium: Rob Wagoner -- 21 Simulated Microstructure Effects on Macroscopic Mechanical Properties Based on Multiscale Crystal Plasticity -- 22 Experimental Study on Texture Evolution of Mg-Y Magnesium Alloy in Extrusion -- 23 Advancing the Accuracy of Computational Models for Double-Sided Incremental Forming -- 24 Nonlinearity of the Crystal Yield Function in the Rate-Independent Crystal Plasticity and Its Effect on the Evolution of Anisotropy -- 25 Experimental Study and Analysis on the Effects of Cyclic Bending on the Stress-Strain Curves of Aluminum Plate -- Part VI Honorary Symposium: Zhongren Wang -- 26 Professor Z. R. Wang's Contributions to Metal Forming Theory, Technology, and Education -- 27 Adding Value by Advancing Metal Forming Technology -- 28 A Study of the Forming Quality of Magnesium Alloy Cylindrical Parts with Inner Ribs by Induction-Heating-Assisted Spinning -- 29 A Porosity Closure Model for the Integrated Casting and Forging Process of Aluminum Alloy and Its Application -- 30 Robust Hydroforming Technologies to Enhance the Formability of Sheet and Tube -- Part VII Agile Metal Forming -- 31 Recent Investigations on Incremental Sheet Forming: From Fundamentals to Industrial Application Technologies -- 32 The Effect of Ultrasonic Vibration on Material Movement in Incremental Sheet Forming -- 33 Investigation of an Integrated Process for Bending and Cross-Section Forming of Tubular Lightweight Parts Based on a Working Media Made of Materials with High Plasticity -- 34 Instability Analysis in Incremental Rotary Forming of Tube Flanges. 35 Incremental Collar Forming Process for the Manufacturing of Branched Tubes and Pipes -- 36 Deformation Analysis in Ultrasonic-Assisted Multi-stage Incremental Sheet Forming -- 37 A New Test Method for Sheet Metal Deformation Subject to Tension Under Cyclic Bending and Compression (TCBC) -- 38 Numerical Modelling and Deformation Mechanics of the English Wheel Process -- 39 The Dieless Drawing Process for the Elongation of Ultrafine Copper and Brass Wire -- 40 Robotic Roller Forming Process and Strategies to Eliminate Geometrical Defect of Edge Waves -- 41 Numerical Modelling of the Flow Forming Process: Computation Time Optimization and Accuracy Analysis -- 42 On the Geometrical Accuracy in Incremental Sheet Forming -- 43 Tube Roll Forming Flower Design and Flexible Roll Adjustment with CAE Simulation -- 44 Open Die Forging of Copper Cone -- 45 Flexible Manufacturing of Concave-

Convex Parts by Incremental Sheet Forming with Active Medium -- 46
Manufacturing of Tailored Blanks with Pre-shaped Involute Gearings
by Using a Flexible Rolling Process and Its Application in a Sheet-Bulk
Metal Forming Process -- 47 Roll Forming of Cup with Curved Rotary
Profile -- Part VIII Big Data and Metal Forming -- 48 Investigation
of Machine Learning Models for a Time Series Classification Task
in Radial-Axial Ring Rolling -- 49 Toward Neural Network Models
to Model Multi-phase Solids -- 50 Comparison of Linear Regression
and Neural Networks as Surrogates for Sensor Modeling on a Deep
Drawn Part -- 51 Development of Mechanical Cards for Finite Element
Analysis of Mild Steels by Parameter Optimization -- Part IX
Characterization of Plasticity and Ductile Fracture of Metals under
Proportional and Non-proportional Loading -- 52 Cyclic Loading Tests
Based on the In-Plane Torsion Test for Sheet Metal.
53 Plastic and Fracture Characteristics of WE43 Mg Alloy Under
Complex Stress States -- 54 Strain Hardening of AA5182-O
Considering Strain Rate and Temperature Effect -- 55 New Methods
for Fracture Detection of Automotive Steels -- 56 Evaluation
of Isotropic and Anisotropic Constitutive Models on Plasticity Prediction
of AA7075 Extruded Tube Under Tension-Tension and Tension-
Compression -- 57 Estimation and Prevention of Strain Localization
in Shear Tests -- 58 Experimental and Numerical Studies on Plastic
Deformation and Failure Behavior of Carbon Nanotube-Reinforced Al
Composite Sheet Under Uniaxial Loading Condition -- 59 Experimental
Study on Uniaxial Strain Cyclic Behavior of GS-20Mn5 -- Part X
Constitutive Behavior -- 60 Influence of Deformation on Texture
Development During Cold Drawing of Tubes -- 61 Dynamic
Recrystallization Behaviors of 5083 Aluminum Alloys with Different
Initial Microstructures Under Hot Compression -- 62 Application
of Barlat's Yld 2000-2d Yield Criterion to Predict the Anisotropic
Response of Stainless Steel -- 63 Evaluation of Press Forming
Technique for Bent Automotive Body Parts Using In-Plane Shear
Deformation -- 64 Simulation of Cold Forging Processes Using a Mixed
Isotropic-Kinematik Hardening Model -- 65 Analysis
of the Thermomechanical Flow Behavior of Carburized Sheet Metal
in Hot Stamping -- 66 Effect of Short Pulsed-Current on Stress
Relaxation in Uniaxial Tensile Test -- 67 Experimental Study
on Mechanical Response of Q235 Steel Under Cyclic Stress Loading --
68 The Effect of Trace Nitrogen on Microstructure and Property of Cr-
Mo-V Hot-Working Die Steel -- 69 Rate-Dependent Hardening
Behavior of Autobody Sheet Metals in Tension and Compression -- 70
Analysis of Creep Behavior of Magnesium Alloy Sheet (AZ31B) in Warm
Forming.
71 The Effect of Electroplasticity on the Flow Behavior of AA7075 in T6
Temper -- 72 Effect of Pulse Current on Mechanical Properties
and Microstructure of Ultrahigh-Strength Steel -- 73 Experimental
Study and Modelling of Stress Relaxation Ageing Behaviour and Post-
form Mechanical Properties in Creep Age Forming of Al-Zn-Mg Alloy --
74 Flow Behavior and Processing Map of a Nickel-Based Superalloy
During Hot Plastic Deformation Process -- 75 Hot Deformation
Behavior and Constitutive Modeling of a Novel Ni-Based Superalloy --
76 Accurate Modelling of Flow Stress of AISI1025 at Room
Temperature and Its Application to Precision Forging Simulation -- 77
Stress-Relaxation Age Forming of a Component with Complex
and Large Curvatures: Simulation and Manufacturing -- 78 Toward
an Efficient Industrial Implementation of W-temper Forming for 7xxx
Series Al Alloys -- 79 Calibration and Validation of Stress-Strain Curve
in High-Strain Region of Mild Steel Sheet -- 80 Influence

of the Quenching Rate and Natural Ageing Duration on the Formability and Mechanical Properties of EN AW-7075 -- 81 Constitutive Model and Plate Forging Ability of 5052 Aluminum Alloy Under Different Temperatures -- 82 Research on Rolling Process and Superplasticity for 5A90 Al-Li Alloy -- Part XI Extrusion and Drawing -- 83 Co-Extrusion of Compound-Cast AA7075/6060 Bilayer Billets at Various Temperatures -- 84 Reducing Aluminum Extrusion Transverse Weld Process Scrap -- 85 Introduction of a New Method for Continuous Aluminum Hot Extrusion -- 86 Study on Complex Extrusion of Multi Billets: Evaluation of Mechanical Properties of Butt-Joined Products and Analysis of Joining State -- 87 Effect of Expansion Ratio on Formability in Tube Drawing with Diameter Expansion -- 88 Investigation of Forward-Backward-Radial Extrusion Process of Aluminum Alloy Wheel Hub.
Part XII Forging.

Sommario/riassunto

In this collection, scientists and engineers from across industry, academia, and government present their latest improvements and innovations in all aspects of metal forming science and technology, with the intent of facilitating linkages and collaborations among these groups. Chapters cover the breadth of metal forming topics, from fundamental science to industrial application.
