Sommario/riassunto	In Excavations at Tall Jawa, Jordan, Volume 5 , the authors present their research in the areas of regional survey, salvage excavation, zooarchaeology, ceramic typology, experimental archaeology and ethnoarchaeology. This work illustrates areas threatened and later destroyed by modern development and is a contribution to heritage

documentation. These studies illuminate aspects of family and town life in the Iron Age, Roman, Byzantine and Late Ottoman–Early Mandate periods in central Jordan.
