Sommario/riassunto

Psychologists have done a great deal of research on the effects of trauma on the individual, revealing the paradox that violent experiences are often secreted away beyond easy accessibility, becoming impossible to verbalize explicitly. However, comparatively little research has been done on the transgenerational effects of trauma and the means by which experiences are transmitted from person to person across time to become intrinsic parts of the social fabric. With eight contributions covering Africa, Central and South America, China, Europe, and the Middle East, this volume sheds new light on
