

1. Record Nr.	UNINA9910494572903321
Autore	Hansson Kristofer <1976->
Titolo	Movement of Knowledge : Medical Humanities Perspectives on Medicine, Science, and Experience
Pubbl/distr/stampa	Havertown : , : Nordic Academic Press, Sweden, , 2020 ©2020
ISBN	9789188909350 9188909352
Edizione	[1st ed.]
Descrizione fisica	1 online resource
Collana	Kriterium ; 24
Altri autori (Persone)	IrwinRachel
Soggetti	Humanities Medicine and the humanities Ethics, Medical
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Contents -- Preface -- Introduction: Movement of knowledge -- I Medical knowledge and the political -- 1. Prenatal diagnosis -- 2. The objects of global health policy -- II Circulating and sharing medical knowledge -- 3. Sharing knowledge -- 4. Press releases as medical knowledge -- III Co-creation of medical knowledge -- 5. The ethical tool of informed consent -- 6. The co-creation of situated knowledge -- IV Knowledge in everyday experience -- 7. A number in circulation -- 8. Knowledge worlds apart -- 9. Medicines in the grey market -- List of abbreviations -- About the authors.
Sommario/riassunto	Medical knowledge is always in motion. It moves from the lab to the office, from a press release to a patient, from an academic journal to a civil servant's desk and then on to a policymaker. These movements matter: value judgements on the validity of certain forms of knowledge determine the direction of clinical research, and policy decisions are taken in relation to existing knowledge. The complexity of medical information and its wider effects is the focus of Movement of knowledge. The authors address the pervasive influence of knowledge in medical and public health settings and scrutinize a range of methodological and theoretical tools to study knowledge. They take a

multidisciplinary approach to the medical humanities, presenting both contemporary and historical perspectives in order to explore the borderlands between expertise and common knowledge. Medical knowledge is deconstructed, reconstructed, and transformed as it moves between patients, health providers, and society at large. The acceptance or rejection of treatment protocols based on medical 'facts' has a fundamental impact on us all.
