Sommario/riassunto	The Hunt for the Parathyroid Gland is a part fact, part fiction overview

of the discovery of the parathyroid gland by a Swedish scientist in 1880. The discovery of the parathyroid gland in humans in 1880 by an unknown Swedish medical student, Ivar Viktor Sandstrom, ended a 30 year search for its exact location within the human body, following its discovery in an Indian rhino 30 years before. It is one of the most engaging and remarkable stories in the history of medicine. This book offers a fascinating insight into its discovery. Endocrinologists and ENT health professionals,
