Sommario/riassunto	While forces of globalization have created a genuine global marketplace, global rules safeguarding the competitive process in this marketplace have not emerged. International cooperation among national regulators and enforcers is therefore needed to create a competitive global business-environment. The Future of International Competition Law Enforcement , using the variety of legal instruments available to the EU as a point of departure, undertakes an original

assessment of the EU's cooperation agreements in the field of competition law The work's focus is on the bilateral sphere, often labelled as a mere 'interim-solution' awaiting a global agreement; further attention is given to competition provisions in free trade agreements as well as the main multilateral initiatives in this field, in order to determine their relative value.
