## Sommario/riassunto

In *Creativities in Arts Education, Research and Practice: International Perspectives for the Future of Learning and Teaching*, Leon de Bruin, Pamela Burnard and Susan Davis provide new thinking, ideas and practices concerned with philosophically, pedagogically and actively developing arts learning and teaching. Interrogating successes and challenges for creativity education locally/globally/glocally, and using illustrative cases and examples drawn from education, practice and research, they explore unique local practices, agendas, glocalised perspectives and ways arts learning develops diverse creativities in order to produce new approaches and creative ecologies through inter- and cross-disciplinary teaching practices interconnecting beyond arts domains. This book highlights innovative approaches and perspectives to activating and promoting diverse creativities as new forms of authorship and analytic approaches within arts practice and education, along with the production of adaptable, sustainable pedagogies that promote and produce diverse creativities differently. This book will help educators, artists, and researchers understand and fully utilise ways they can transform their thinking and practice and keep their learning and teaching on the move.
