Sommario/riassunto	"Personal Injury Schedules: Calculating Damages covers in one single volume all that the PI practitioner needs in order to calculate damages in a personal injury case. It provides a guide to the assessment of damages and presentation of schedules. The emphasis remains on the practical application of the rules and principles involved, covering a variety of claims ranging from the small to the catastrophic. Defendants are also catered for, with a substantial chapter on Counter-Schedules. The book contains comprehensive and up-to-date analysis of the relevant principles and case law in a practical handbook style with valuable advice on presentation and strategy, complimented by a raft of precedents. Its key strengths are its clear and structured presentation and calculation of difficult items of loss with checklists, bullet points and tables offering immediate solutions for the busy practitioner, who

needs accurate information on a daily basis in the courtroom or the office.
