

1. Record Nr.	UNINA9910494738803321
Autore	Birrane Edward J.
Titolo	Designing delay-tolerant applications for Store-and-Forward networks // .Edward J. Birrane, Jason A. Soloff
Pubbl/distr/stampa	Boston, Massachusetts : , : Artech House, , [2020] [Piscataqay, New Jersey] : , : IEEE Xplore, , [2020]
ISBN	1-63081-630-2
Descrizione fisica	1 online resource (337 pages)
Collana	Artech House Space Technology and Applications series
Disciplina	004.6
Soggetti	Computer networks - Reliability Routing (Computer network management) Fault-tolerant computing Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	CHAPTER 10 The Offshore Oracle Pattern: CachingContent in Challenged Networks
Nota di bibliografia	Includes bibliographical references and index
Nota di contenuto	Intro -- Contents -- CHAPTER 1 Introduction -- 1.1 The State of the Wireless World -- 1.2 Why Be Patient in an Increasingly Connected World? -- 1.3 What Is a Delay-Tolerant Application? -- 1.4 Who Should Read This Book? -- 1.5 How to Use This Book -- 1.6 Summary -- 1.7 Problems -- CHAPTER 2 A Brief History of Challenged Networking Environments -- 2.1 What is a Challenged Networking Environment? -- 2.2 Link Layer Challenges -- 2.3 Network Layer Challenges -- 2.4 Application Layer Challenges -- 2.5 Error Handling in Challenged Networking Environments -- 2.6 What Is a Network Error Condition? 2.7 Approaches to Handling Error Conditions -- 2.8 Summary -- 2.9 Problems -- CHAPTER 3 How the Internet Does It: Approachesand Patterns for Challenged NetworkingEnvironments -- 3.1 Challenges in the Terrestrial Internet -- 3.2 Terrestrial Internet Approaches to Challenged Networking Environments -- 3.3 Terrestrial Internet Design Patterns -- 3.4 Summary -- 3.5 Problems -- CHAPTER 4 Rallying the Research Community:DARPA, NASA, and Disruption Tolerance -- 4.1 History of Delay-/Disruption-Tolerant Research -- 4.2 NASA and DARPA -- 4.3 International Space Agencies

4.4 IOP Meets the Consultative Committee for Space Data Systems --  
4.5 DTN in the IRTF -- 4.6 Ongoing Development -- 4.7 Summary --  
4.8 Problems -- CHAPTER 5 Where the Terrestrial Internet Is  
NotEnough: Motivating Use Cases -- 5.1 The Value of Use Cases -- 5.2  
The Solar System Internet -- 5.3 Distributed Spacecraft Constellations  
-- 5.4 Distributed and Mobile Sensor Webs -- 5.5 Optical  
Communications -- 5.6 Ad Hoc Network and Data Mules -- 5.7  
Summary -- 5.8 Problems -- CHAPTER 6 The Delay-/Disruption-  
TolerantNetworking Architecture -- 6.1 Motivations for a Tolerant  
Network  
6.2 Assumptions Made by the Terrestrial Internet -- 6.3 Architectures  
for DTNs -- 6.4 Delay-/Disruption-Tolerant Desirable Properties -- 6.5  
DTN Protocols -- 6.6 Naming and Addressing -- 6.7 The BP Ecosystem  
-- 6.8 Special Node Characteristics -- 6.9 Summary -- 6.10 Problems  
-- CHAPTER 7 Patience on the Wire: The DTN BP -- 7.1 Protocol Goals  
-- 7.2 The Case for BP Store and Forward -- 7.3 Services Unique to BP  
-- 7.4 Protocol Layering Considerations -- 7.5 Bundle Structure -- 7.6  
The Primary Block -- 7.7 The Payload Block -- 7.8 Extension Blocks --  
7.9 BP-Enabled Concepts  
7.10 Special Considerations -- 7.11 Is BP Enough? -- 7.12 Summary --  
7.13 Problems -- CHAPTER 8 Advanced Networking Architectures --  
8.1 Networking Architectures -- 8.2 A Standard Model for Networking  
-- 8.3 Overlay Networks -- 8.4 Partitioned Networks -- 8.5 Federated  
Internetworks -- 8.6 Summary -- 8.7 Problems -- CHAPTER 9  
Application Services and Design Patterns -- 9.1 A Multitiered  
Application Service Hierarchy -- 9.2 Application Design Patterns -- 9.3  
The Design Pattern Documentation Format -- 9.4 Summary -- 9.5  
Problems

---
