Sommario/riassunto	This book is about particles in the narrower sense of the word as opposed to the broader meaning covering all uninflected words of a language. In the narrower meaning of the linguistic term particles can be distinguished between logical, or scalar particles and modal, or

pragmatic particles. The semantic, pragmatic and syntactic properties of modal particles differ vastly from those of the scalar particles, on the one hand, and their homonymic counterparts functioning in different syntactic categories, on the other hand. The contributions to this volume offer the latest research on the semanti

## Sommario/riassunto

This book argues that capitalism has practically failed to deliver the long-desired economic transformation and inclusive development in postcolonial Africa. The principal factor that accounts for this failure is the prolific non-productive forms of capitalism that tend to be dominant in the African continent and their governance dimensions. The research explores how and why capitalism has failed in the African context and the feasibility of turning it around. The book meets the demands of diverse audiences in the fields of International Political Economy, Development Economics, Political Science, and African Studies. The author adopts an unconventional narrativist approach that makes the book amenable to general readership. Kenneth Omeje is Director of Manifold Crown Consulting Services based in Bradford, UK, and Visiting Professor at the Institute of Peace and Security Studies in Addis Ababa University, Ethiopia.
