

1. Record Nr.	UNINA9910495157003321
Titolo	Bioactive compounds in underutilized vegetables and legumes // Hosakatte Niranjana Murthy, Kee Yoeup Paek, editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-57415-6
Descrizione fisica	1 online resource (673 pages)
Collana	Reference Series in Phytochemistry
Disciplina	572.2
Soggetti	Plant bioactive compounds Vegetables - Composition Legumes - Composition
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- About the Editors -- Contributors -- 1 Health Benefits of Underutilized Vegetables and Legumes -- 1 Introduction -- 2 Nutritional Benefits of Underutilized Vegetables and Legumes -- 3 Bioactive Compounds of Underutilized Vegetable and Legumes -- 3.1 Polyphenols -- 3.2 Terpenes -- 3.3 Alkaloids -- 3.4 Volatiles -- 3.5 Lectins -- 3.6 Glucosinolates -- 3.7 Organic Acids -- 4 Biological Activities of Phytochemicals Isolated from Underutilized Vegetables and Legumes -- 4.1 Antidiabetic Activity -- 4.2 Anticancer Activity -- 4.3 Antimicrobial Activity -- 4.4 Antihypertensive Activity -- 4.5 Antioxidant Activity -- 4.6 Hepatoprotective Activity -- 4.7 Anti-inflammatory Activity -- 5 Conclusions -- References -- Part I: Bioactive Compounds in Underutilized Vegetables: Leafy Vegetables -- 2 Bioactive Compounds of Amaranth (Genus Amaranthus) -- 1 Introduction -- 1.1 This Plant Needs to Be Seen in a Different Perspective -- 2 Bioactive Compounds in Amaranthus -- 3 Use in Ancient Medicine -- 3.1 Traditional Uses in India -- 3.2 Traditional Uses in the Rest of the World -- 3.2.1 Africa -- 3.2.2 Bangladesh -- 3.2.3 Ethiopia -- 3.2.4 Indonesia -- 3.2.5 Kenya -- 3.2.6 Malaysia -- 3.2.7 Nepal -- 3.2.8 Pakistan -- 3.2.9 Philippines -- 3.2.10 Turkey -- 3.2.11 Uganda -- 3.2.12 United Arab Emirates (UAE) -- 4 Clinical Studies of Amaranthus Species -- 5 Fortified Food Products -- 6

Cosmetic Applications -- 7 Toxicity Issues -- 7.1 Food Allergy -- 7.2 Livestock Poisoning -- 8 Conclusion -- References -- 3 Bioactive Compounds of Fat-Hen (*Chenopodium album* L.) -- 1 Introduction -- 2 Traditional Importance -- 3 Nutritional Composition -- 4 Bioactive Compounds -- 4.1 Phytoconstituents -- 4.2 Phenols and Lignins -- 4.3 Alkaloids -- 4.4 Glycosides -- 4.5 Saponins and Phytate -- 4.6 Flavonoids -- 4.7 Tannins -- 5 Pharmacological Significance. 5.1 Antioxidant Activity -- 5.2 Antimicrobial Activity -- 5.3 Spasmolytic Activity -- 5.4 Gastroprotective and Hepatoprotective Activity -- 5.5 Anticancer Activity -- 6 Conclusions -- 7 Future Prospects -- References -- 4 Bioactive Compounds of Paracress [*Acmella oleracea* (L.) R.K. Jansen] -- 1 Introduction -- 2 Major Bioactive Compounds of Paracress and Their Properties -- 2.1 Alkaloids -- 2.2 Phenolic Compounds -- 2.3 Phytosterols -- 2.4 Saponins -- 2.5 Spilanthol -- 2.6 Terpenes -- 3 Other Pharmacological Aspects -- 4 Nutritional Features of Paracress -- 5 Toxicological Traits in Zebrafish -- 6 Conclusions -- References -- 5 Bioactive Compounds of Goosefoot (Genus *Chenopodium*) -- 1 Introduction -- 2 Polysaccharides -- 3 Lectins -- 4 Amines and Amides -- 5 Phenolics -- 6 Flavonoids -- 6.1 Flavonoids with Radical-Scavenging and Antioxidant Activities -- 6.2 Flavonoids with Hepatoprotective Activity -- 6.3 Flavonoids with Neuroprotective Activity -- 6.4 Flavonoids with Anti-Glucosidase and Prolipase Activities -- 6.5 Flavonoids with Antiadipogenic Activity -- 7 Saponins -- 7.1 Saponins with Antibacterial and Antifungal Activity -- 7.2 Saponins with Cytotoxic Activity -- 7.3 Saponins with Hepatoprotective Activity -- 7.4 Saponins with Immunoadjuvant and Immunomodulatory Activity -- 7.5 Saponins with Anti-inflammatory Activity -- 7.6 Saponins with Hemolytic Activity -- 8 Sterols -- 9 Essential Oils and Terpenes -- 9.1 Essential Oils with Antibacterial Activity -- 9.2 Essential Oils with Antifungal Activity -- 9.3 Essential Oils and Terpenes with Antiparasitic Activity -- 9.4 Essential Oils and Terpenes with Antineoplastic Activity -- 9.5 Essential Oils with Antioxidant Activity -- 9.6 Essential Oils with Acetylcholinesterase, Butyrylcholinesterase, and Tyrosinase Activities -- 9.7 Essential Oils and Terpenes with Anti-inflammatory Activity. 9.8 Essential Oils with Sedative and Analgesic Activities -- 9.9 Essential Oils with Wound Healing Activity -- 9.10 Toxicity of Essential Oils and Their Constituents -- 10 Conclusion -- References -- 6 Bioactive Compounds of Asian Spider Flower (*Cleome viscosa* Linn.) -- 1 Introduction -- 2 Nutraceutical Importance -- 3 As Ayurvedic and Folkloric Asset -- 4 Ethno Medicinal Profile -- 5 Phytochemistry -- 6 Biological Activities -- 6.1 Antimicrobial Potential -- 6.2 Hepatoprotective Activity -- 6.3 Antitumor Activity -- 6.4 Anthelmintic Activity -- 6.5 Antidiarrheal Activity -- 6.6 Antipyretic Property -- 6.7 Nematicidal Activity -- 6.8 Insecticidal Activity -- 6.9 Antifibrotic Activity -- 6.10 Antiemetic Activity -- 6.11 Psychopharmacological Activity -- 6.12 Immunomodulatory Activity -- 6.13 Anti-inflammatory Activity -- 6.14 Antioxidant Activity -- 6.15 Gastro-Protective Activity -- 6.16 Anticonvulsant Activity -- 7 Conclusions -- References -- 7 Bioactive Compounds of Mallow Leaves (*Corchorus* Species) -- 1 Introduction -- 2 Nutritional Composition -- 2.1 Protein, Fatty Acid, - Carotene, and Vitamin C -- 2.2 Essential Minerals -- 2.3 Dietary Fiber -- 2.4 Culinary Advantages -- 3 Conclusion -- References -- 8 Bioactive Compounds of Ceylon Spinach [*Talinum Triangulare* (Jacq.) Willd.] -- 1 Introduction -- 2 Nutraceutical Perspectives -- 2.1 Proximal Qualities -- 2.2 Minerals -- 2.3 Amino Acids -- 2.4 Fatty Acids -- 3 Bioactive Potential -- 3.1 Bioactive Components -- 3.2 Vitamins -- 3.3 Antioxidant Activity -- 4 Pharmaceutical Properties --

4.1 Anemia -- 4.2 Diabetes -- 4.3 Hepato- and Neuro-disorders --  
4.4 Cardiovascular Diseases -- 4.5 Other Ailments -- 5 Conclusions  
and Prospects -- References -- Part II: Bioactive Compounds in  
Underutilized Vegetables: Fleshy Petioles, Cladodes, Fruits.  
9 Bioactive Compounds of Prickly Pear [*Opuntia ficus-indica* (L.) Mill.]  
-- 1 Introduction: An Historical Overview of the Opuntoid Cacti -- 2  
Polyphenolic Compounds -- 2.1 Organic Acids -- 2.2 Phenolic Acids --  
2.2.1 Structure and Chemical Properties -- 2.2.2 Biological Activities of  
Some Phenolic Acids from *O. ficus-indica* (L.) Mill -- Gallic Acid --  
Protocatechuic Acid -- Cinnamic Acid and Derivatives -- Chlorogenic  
Acid -- Coumaric Acid and Derivatives -- Ferulic Acid -- Caffeic Acid  
-- 2.3 Flavonoids -- 2.3.1 Flavanols -- 2.3.2 Flavanones -- 2.4  
Structure-Activity Relationship of Phenolic Acids and Flavonoids -- 3  
Betalains -- 4 Carotenoids -- 5 Vitamins -- 6 Biothiols -- 7 Taurine --  
8 Fatty Acids -- 9 Phytosterols -- 10 Saponins -- 11 Global  
Antioxidant Activity -- 12 Conclusions -- References -- 10 Bioactive  
Compounds of Swahili [*Cyphostemma adenocaula* (Steud. ex A. Rich.)  
Desc. ex Wild and R.B. Drumm.] -- 1 Introduction -- 2 Nutritional  
Importance -- 3 Phytochemistry -- 4 Bioactive Compounds -- 4.1  
Pentacyclic Triterpenes -- 4.2 Carotenoids -- 4.3 Coumarins -- 4.4  
Polyphenols -- 5 Conclusion -- References -- 11 Bioactive Compounds  
of Barbados Gooseberry (*Pereskia aculeata* Mill.) -- 1 Introduction -- 2  
Nutritional Composition and Antinutritional Factors -- 2.1  
Polysaccharides in *P. aculeata* Leaves -- 2.2 Lipids in *P. aculeata* --  
2.2.1 *P. aculeata* Essential Oils -- 2.2.2 Carotenoids -- 2.3 Phenolic  
Compounds and Antioxidant Activity in *P. aculeata* -- 3 Conclusions --  
References -- 12 Bioactive Compounds of Rhubarb (*Rheum* Species) --  
1 Introduction -- 2 Botanical Descriptions -- 3 General Uses -- 4  
Bioactive Compounds and Biological Activity -- 5 Toxicity and Safety --  
6 Conclusions -- References -- Part III: Bioactive Compounds in  
Underutilized Vegetables: Seeds -- 13 Bioactive Compounds of Ajwain  
(*Trachyspermum ammi* [L.] Sprague).  
1 Introduction -- 2 Synonyms -- 3 Botanical Description -- 4  
Phytoconstituents -- 5 Pharmacological Properties of Bioactive  
Compounds of Ajwain Seeds -- 5.1 Thymol -- 5.1.1 Anticancer Activity  
-- 5.1.2 Antioxidant Activity -- 5.1.3 Antimicrobial Activity -- 5.1.4  
Anti-Inflammatory Activity -- 5.1.5 Immunomodulatory Activity -- 5.2  
Carvacrol -- 5.2.1 Transient Receptor Potential (TRPV1, TRPV3) Agonist  
-- 5.2.2 Neuroprotective Activity -- 5.2.3 Antimicrobial Activity --  
5.2.4 Antioxidant Activity -- 5.2.5 Antiobesity Activity -- 5.2.6  
Vasorelaxant Activity -- 5.2.7 Anti-Inflammatory Activity -- 5.2.8  
Antitumor Activity -- 5.3 Monoterpenes -- 5.3.1 Antimicrobial Activity  
-- 5.3.2 Antioxidant Activity -- 5.3.3 Anticancer Activity -- 6 Toxicity  
-- 7 Drug Interactions -- 8 Conclusion -- References -- Part IV:  
Bioactive Compounds in Underutilized Vegetables: Tuberous Vegetables  
-- 14 Bioactive Compounds of *Allium* Species -- 1 Introduction -- 2  
Botanical Distribution and Bioactive Compounds -- 3 Bioactivity -- 3.1  
Antioxidant Activity -- 3.2 Anticancer Activity -- 3.3 Antimicrobial  
Activity -- 3.4 Antihyperlipidemic/Anti-hypercholesterolemic Activity  
-- 3.5 Other Bioactivities -- 4 Toxicity -- 5 Conclusions -- References  
-- 15 Bioactive Compounds of Turmeric (*Curcuma longa* L.) -- 1  
Introduction -- 2 Nutritional Composition -- 3 Essential Oils from *C.*  
*longa* -- 4 Phenolic Compounds of *C. longa* -- 5 In Vitro and In Vivo  
Antioxidant Activity of *C. longa* -- 6 Conclusion -- References -- Part  
V: Bioactive Compounds in Underutilized Vegetables: Unripe Fruits --  
16 Bioactive Compounds of Culinary Melon (*Cucumis melo* subsp.  
*agrestis* var. *conomon*) -- 1 Introduction -- 2 Origin and Domestication  
-- 3 Morphology -- 4 Nutritional Compositions -- 5 Bioactive

Compounds -- 6 Biological Activities -- 6.1 Biological Activities of  
Fragrant Compounds.  
6.1.1 Antioxidant Activity.
