

1. Record Nr.	UNINA9910495164703321
Titolo	Business Process Management : 19th International Conference, BPM 2021, Rome, Italy, September 06–10, 2021, Proceedings / / edited by Artem Polyvyanyy, Moe Thandar Wynn, Amy Van Looy, Manfred Reichert
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021
ISBN	3-030-85469-8
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (480 pages)
Collana	Information Systems and Applications, incl. Internet/Web, and HCI, , 2946-1642 ; ; 12875
Disciplina	658.4038011
Soggetti	Information storage and retrieval systems Application software Electronic commerce Information technology - Management Information Storage and Retrieval Computer and Information Systems Applications e-Commerce and e-Business Computer Application in Administrative Data Processing Programari d'aplicació Sistemes d'informació Comerç electrònic Tecnologia de la informació Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Organization -- Keynote Abstracts -- What Have the Romans Ever Done for Us? The Ancient Antecedents of Business Process Management -- Artificial Intelligence-based Declarative Process Synthesis for BPM -- Contents -- Keynote Paper -- Process Automation and Process Mining in Manufacturing -- 1 Introduction -- 2 Automating Legacy vs. Automating Greenfield Scenarios in Manufacturing -- 2.1 Automating Legacy Scenarios -- 2.2 Automating

Greenfield Scenarios -- 3 The Human Aspect in Process Automation --
 4 Process Mining and Automation: Are They Twins? -- 5 Discussion and
 Outlook -- References -- Tutorials -- Cognitive Effectiveness of
 Representations for Process Mining -- 1 Introduction -- 2 Visual
 Representations for Process Mining -- 3 Cognitive Effectiveness of
 Process Mining Outputs -- 4 Evaluating Process Mining from a
 Cognitive Angle -- 5 Conclusion -- References -- RuM: Declarative
 Process Mining, Distilled -- 1 Introduction -- 2 Declarative Process
 Mining with RuM -- 3 Considerations About Declarative Process Mining
 -- 4 Research Opportunities -- References -- Applications of
 Automated Planning for Business Process Management -- 1 Why
 Automated Planning for Business Processes? -- 2 Automated Planning
 for BPM -- 2.1 Automated Generation of Process Models -- 2.2 Trace
 Alignment -- 2.3 Process Adaptation -- 2.4 Interpretability and
 Authoring Tools -- 3 Conclusions -- References -- Artifact-Driven
 Process Monitoring: A Viable Solution to Continuously and
 Autonomously Monitor Business Processes -- 1 Introduction to Process
 Monitoring -- 1.1 Challenges in Process Monitoring -- 2 Artifact-
 Driven Monitoring in a Nutshell -- 2.1 E-GSM Modeling Language --
 2.2 From BPMN to E-GSM -- 2.3 SMARTifact: An Artifact-Driven
 Monitoring Platform -- References -- Process Discovery.
 Weighing the Pros and Cons: Process Discovery with Negative Examples
 -- 1 Introduction -- 2 Process Notations and Unary Discovery -- 3
 Process Discovery as Binary Classification -- 4 Rejection Miners -- 5
 Cases with Negative Examples -- 5.1 DCR Solutions: Test-Driven
 Modelling -- 5.2 Dreyer Foundation: Process Engineering -- 6
 Experimental Results -- 6.1 Results -- 7 Conclusion -- References --
 A Method for Debugging Process Discovery Pipelines to Analyze the
 Consistency of Model Properties -- 1 Introduction -- 2 Basic
 Terminology and Problem Illustration -- 3 Debugging of Process
 Discovery Pipelines -- 3.1 Sampling the Pipeline -- 3.2 Measuring the
 Property Consistency for a Single Execution -- 3.3 Analyzing the
 Property Consistency for the Pipeline -- 4 Experiment -- 4.1
 Experimental Design -- 4.2 Results -- 5 Related Work -- 6 Conclusion
 -- References -- Extracting Decision Models from Textual Descriptions
 of Processes -- 1 Introduction -- 2 Related Work -- 3 Preliminaries --
 3.1 Decision Model and Notation (DMN) -- 3.2 Natural Language
 Processing and Annotation -- 3.3 TRegex -- 4 Approach -- 4.1
 Decision Requirement Level -- 4.2 Decision Logic Level -- 4.3 Simple
 Expression Language -- 4.4 Decision Model Extraction Without
 Requirement Level -- 4.5 Discussion -- 5 Tool Support and
 Experiments -- 6 Conclusions and Future Work -- References --
 Predictive Process Monitoring -- Robust and Generalizable Predictive
 Models for Business Processes -- 1 Introduction -- 2 Background --
 2.1 Event Logs, Traces, and Sequences -- 2.2 Predictive Monitoring
 Tasks -- 2.3 Neural Networks and Invariant Risk Minimization -- 2.4
 Sequence Prediction Neural Networks -- 3 Related Work -- 3.1
 Predictive Models for Business Processes -- 3.2 Generalization
 Approaches -- 4 Our Approach -- 4.1 Data Preprocessing -- 4.2
 RoGen Model Architecture and Training Workflow.
 5 Evaluation -- 5.1 Experimental Setup -- 5.2 Results -- 6 Conclusion
 and Future Work -- References -- Incremental Predictive Process
 Monitoring: The Next Activity Case -- 1 Introduction -- 2 Related Work
 -- 2.1 Predictive Process Monitoring -- 2.2 Concept Drift Detection --
 2.3 Incremental Learning Algorithms -- 2.4 Incremental Predictive
 Process Monitoring -- 3 Update Strategies -- 3.1 Data Selection -- 3.2
 Update Existing Methods -- 4 Reference Model: Single Dense Layer
 (SDL) -- 5 Experiments -- 5.1 Dataset Selection -- 5.2 Baseline

Comparison -- 5.3 Update Strategy -- 5.4 Runtime Results -- 5.5
 Overall Results -- 6 Conclusion -- References -- Learning Uncertainty
 with Artificial Neural Networks for Improved Remaining Time Prediction
 of Business Processes -- 1 Introduction -- 2 Remaining Time
 Prediction: Definition and Related Work -- 3 Estimating Uncertainty --
 3.1 Estimating Epistemic Uncertainty with Bayesian Neural Networks --
 3.2 Estimating Heteroscedastic Aleatoric Uncertainty -- 3.3 LSTM Vs.
 CNN -- 3.4 Objectives -- 4 Experimental Setup -- 4.1 Datasets -- 4.2
 Preprocessing -- 4.3 Estimating the Epistemic, Aleatoric and Total
 Uncertainty -- 4.4 Base Case -- 5 Results -- 5.1 Overall Performance
 -- 5.2 Uncertainty Estimates -- 5.3 Computation Time -- 6
 Applications of Uncertainty -- 7 Conclusion and Future Work --
 References -- Data- and Time-awareness in BPM -- Zoom and
 Enhance: Action Refinement via Subprocesses in Timed Declarative
 Processes -- 1 Introduction -- 2 Timed DCR Graphs -- 3 Timed DCR
 Graphs with Subprocesses -- 4 Refinement via Subprocess Expansion
 -- 5 Conclusions, Related and Future Work -- References -- Delta-
 BPMN: A Concrete Language and Verifier for Data-Aware BPMN -- 1
 Introduction -- 2 Requirement Analysis and Related Work -- 3 The
 PDMML Language -- 3.1 Sources of Data and Their Definition.
 3.2 The Process Component of delta-BPMN -- 3.3 Inspecting and
 Manipulating Data with PDMML -- 3.4 Guards for Conditional Flows --
 4 delta-BPMN in Action -- 4.1 Modeling delta-BPMN Processes with
 Camunda -- 4.2 Encoding delta-BPMN Camunda Processes in MCMT --
 5 Conclusions -- References -- A Real-Time Method for Detecting
 Temporary Process Variants in Event Log Data -- 1 Introduction -- 2
 Related Work -- 3 Background -- 3.1 Non-Euclidean Relational Fuzzy
 C-Means (NERFCM) -- 3.2 Correlation Cluster Validity (CCV) -- 4
 Proposed Method -- 4.1 Input Parameters -- 4.2 Overview of Proposed
 Method -- 4.3 Steps -- 5 Method Evaluation -- 5.1 Event Logs -- 5.2
 Experiment Setup -- 5.3 Results -- 6 Conclusions -- References --
 Conformance Checking -- CoCoMoT: Conformance Checking of Multi-
 perspective Processes via SMT -- 1 Introduction -- 2 Preliminaries --
 2.1 Data Petri Nets -- 2.2 Event Logs and Alignments -- 2.3
 Satisfiability Modulo Theories (SMT) -- 3 Conformance Checking via
 SMT -- 3.1 Distance-Based Cost Function -- 3.2 Encoding -- 3.3
 Complexity -- 4 Trace Clustering -- 5 Implementation and
 Experiments -- 6 Discussion -- 7 Conclusions -- References --
 Aligning Data-Aware Declarative Process Models and Event Logs -- 1
 Introduction -- 2 Related Work -- 3 Preliminary Definitions -- 3.1
 Event Logs -- 3.2 Data-Aware Declare -- 3.3 Automated Planning -- 4
 Working Assumptions -- 5 Data-Aware Declarative Conformance
 Checking as Planning -- 5.1 -encoding for Conformance Checking --
 5.2 Automaton Manipulation for Trace Alignment -- 5.3 Encoding in
 PDDL -- 5.4 Trace Repair -- 6 Experiments -- 7 Conclusions --
 References -- A Discounted Cost Function for Fast Alignments of
 Business Processes -- 1 Introduction -- 2 Related Work -- 3
 Preliminaries -- 4 Discounted Cost Function and Properties.
 5 Using the Discounted Cost Function in an A*-Based Algorithm for
 Discounted Alignments -- 5.1 Algorithm for Computing Optimal
 Discounted Alignments -- 5.2 A Heuristic for Reducing the Search
 Space of the Algorithm -- 6 Experiments: Discounted Alignments as a
 Heuristic for Approximating Classical Alignments -- 6.1 Comparison
 with Respect to Baselines -- 6.2 Influence of the Discount Parameter
 on the Quality and Runtime -- 7 Conclusion -- References --
 Blockchain and Robotic Process Automation -- Task Clustering Method
 Using User Interaction Logs to Plan RPA Introduction -- 1 Introduction
 -- 2 Related Work -- 3 Proposed Method -- 3.1 UI Log -- 3.2

Segmentation -- 3.3 Clustering -- 4 Evaluation -- 4.1 Datasets -- 4.2 Evaluation Method -- 4.3 Result -- 4.4 Limitations of Our Approach -- 4.5 Visualization Result -- 5 Conclusion -- References -- From Symbolic RPA to Intelligent RPA: Challenges for Developing and Operating Intelligent Software Robots -- 1 Introduction -- 2 Theoretical Background -- 2.1 Symbolic Robotic Process Automation -- 2.2 Intelligent Robotic Process Automation -- 3 Research Design -- 3.1 Overview -- 3.2 Literature Review -- 3.3 Expert Study on Intelligent RPA in Current and Future Business Practice -- 4 Proposed Challenges for RPA, AI, and Intelligent RPA -- 4.1 RPA Challenges Impacting Intelligent RPA -- 4.2 AI Challenges Impacting Intelligent RPA -- 4.3 Derivation of Challenges at the Intersection of RPA and AI -- 5 Consolidated Challenges Impacting Intelligent RPA -- 5.1 Overview of Challenges -- 5.2 Organizational and Socio-Technical Challenges During Build-Time -- 5.3 Technical Implementation Challenges During Build-Time -- 5.4 Technical Implementation Challenges During Run-Time -- 5.5 Organizational and Socio-Technical Challenges During Run-Time -- 6 Discussion -- 7 Conclusion -- References.

Process Mining on Blockchain Data: A Case Study of Augur.

Sommario/riassunto

This volume constitutes the refereed proceedings of the 19th International Conference on Business Process Management, BPM 2021, held in Rome, Italy, in September 2021. The 23 full papers, one keynote paper, and 4 tutorial papers presented in this volume were carefully reviewed and selected from 92 submissions. The papers are organized in topical sections named: foundations, engineering, and management.
