	Titolo	Macro-econometric Analysis on Determinants of Fertility Behavior / / by Hisakazu Kato
	Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2021
	ISBN	981-16-3927-2
	Edizione	[1st ed. 2021.]
	Descrizione fisica	1 online resource (86 pages)
	Collana	Population Studies of Japan, , 2198-2732
	Disciplina	304.6320952
	Soggetti	Demography
		Population
		Population - Economic aspects
		Econometrics
		Statistics
		Population and Demography
		Population Economics
		Quantitative Economics
		Statistics in Business, Management, Economics, Finance, Insurance
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	Low Fertility and Female Labor Supply in Japan -- Time Series Analysis using Bayesian VAR approach -- Analysis of the Regional Disparity in the Total Fertility Rate in Japan -- From the Perspective of Population Density and Socioeconomic Factors -- Total Fertility Rate, Economic-Social Conditions and Public Policies in OECD Countries.
	Sommario/riassunto	The book comprises three chapters, with each chapter assigned various type data such as time series data, cross sectional data and panel data. The purpose of this book is to explore the economic and social determinant factors of fertility. Unlike many previous empirical analyses of fertility and the related demographic events, this research has three characteristics. The first is that the relationship between fertility and labor participation by females is thoroughly considered, with much discussion about the structural change between those factors. The second is that time series analysis such as the Bayesian vector autoregressive (BVAR) model or co-integration concepts is applied to

explore the determinant factors of fertility. The third is that the effectiveness of public policies related to improve fertility is confirmed. In recent years, micro-econometric analysis has become popular; however, this book takes another approach from the perspective of macro- or semi-macro-econometrics.
