Autore	Steele Wendy
Titolo	The Sustainable Development Goals in Higher Education : A Transformative Agenda? // by Wendy Steele, Lauren Rickards
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2021
ISBN	9783030735753 3030735753
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (302 pages)
Disciplina	304.20711 378.015
Soggetti	Education, Higher Education and state Environmental sciences - Social aspects Environmental education Economic development Human ecology - Study and teaching Higher Education Education Policy Environmental Social Sciences Environmental and Sustainability Education Development Studies Environmental Studies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter I: A Transformative Agenda -- Chapter 2: Sustainable Development in the Anthropocene -- Chapter 3: The Role of the University in Society -- Chapter 4: Ethical Innovation -- Chapter 5: Rethinking Research Engagement -- Chapter 6: Learning and Teaching Matters -- Chapter 7: What Does Success Look Like? -- Chapter 8: Sustainable Futures.
Sommario/riassunto	“The world's universities are important for achieving the UN Sustainable Development Goals. What should universities be offering to this effort?

Equally important, how should universities themselves change, in response to the SDGs? Wendy Steele and Lauren Rickards provide a unique, up-to-date guide to these issues, offering frameworks for thought and resources for action." - Raewyn Connell, author of *The Good University* "This book presents a compelling and refreshing take on the contemporary university and its transformative potential.

Analysing the engagement between the Sustainable Development Goals and higher education, Steele and Rickards provide energy and hope for those of us exhausted by the continual restructuring of the neoliberal university." - Lesley Head, Redmond Barry Distinguished Professor, School of Geography, The University of Melbourne, Australia "...Steele and Rickards challenge universities to become enablers of change ... Especially impressive is the way in which the authors draw on social theory and constructive criticisms of higher education and development, to provide positive and actionable pathways forward.

Reading the manuscript, I wanted to immediately share the insights of this book with my university leadership, my faculty colleagues and my students, especially as we try to navigate a post pandemic, antiracist, more equal and low carbon future for people and the planet." - Diana Liverman, Regents Professor, School of Geography, Development, and Environment University of Arizona, USA This book explores the role universities have to play in fulfilling the Sustainable Development Goals (SDGs). At the heart of "sustainable development" is the legacy of unsustainable development with its roots in modernity and colonialism. Critical engagement with the SDGs involves recognising these roots are shared by universities and the reciprocal need for maintenance, repair and regeneration. Universities are not just enablers of change, but also important targets of change. By focusing on the role of education about, for and through the SDGs, the authors seek to advance critical engagement with higher education that is both progressive and meaningful. We are all responsible for bearing witness to our age. This book will appeal to all those who hope that more sustainable future worlds are still possible. Wendy Steele is Associate Professor in the Centre for Urban Research (CUR) at RMIT University, Melbourne, Australia. Her research focuses on the nature of wild cities in climate change with current projects on quiet activism, critical urban governance, climate justice and urban futures, and sustainability as a transformative agenda in higher education. Lauren Rickards is Professor at RMIT University, Melbourne, Australia, where she directs the Urban Futures Enabling Capability Platform and co-leads the Climate Change Transformations research program in the Centre for Urban Research. A human geographer, Lauren's research focuses on social responses to the climate change crisis, including the role of climate change in sustainable development, and implications for the research and education sectors. .
