

1. Record Nr.	UNINA9910823491403321
Titolo	Instrumentation and control systems and software important to safety for research reactors : specific safety guide // International Atomic Energy Agency
Pubbl/distr/stampa	Vienna, [Austria] : , : International Atomic Energy Agency, , 2015 ©2015
ISBN	92-0-119019-0
Descrizione fisica	1 online resource (100 pages) : color illustrations
Collana	IAEA Safety Standards Series, , 1020-525X ; ; Number SSG-37
Disciplina	621.4835
Soggetti	Nuclear reactors - Safety measures Nuclear engineering - Instruments Nuclear reactors - Control
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910495209703321
Titolo	Palgrave Encyclopedia of the Health Humanities [[electronic resource] ]/ / edited by Paul Crawford, Paul Kadetz
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2020
ISBN	3-030-26825-X
Disciplina	809
Soggetti	Comparative literature History Medicine—Philosophy Public health Economic development Clinical health psychology Comparative Literature History of Science Philosophy of Medicine Public Health Development and Health Health Psychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Palgrave Encyclopedia of the Health Humanities provides a critical resource for understanding and debating the interdisciplinary research and practices in the health humanities. A seminal and international volume for students, scholars, and practitioners, this volume draws on the fields that link health and social care with the arts and humanities. The entries provide particular emphasis on the history of the field and the praxis, functions, and applications of the health humanities for public, international, and global health. Also explored are aspects of healthcare not previously considered in relation to a humanities

perspective such as paramedical and allied health staff and informal carers. Suitable for undergraduates and graduates and scholars in the health humanities, humanities, arts, social sciences, public health, and medicine as well as health and social care practitioners, the major focus of the volume is to highlight the role of the health humanities in enriching the social, cultural, and phenomenological experience and understanding of illness, health, and wellbeing. .
