

1. Record Nr.	UNINA9910495221703321
Titolo	Systems, software and services process improvement : 28th European Conference, EuroSPI 2021, Krems, Austria, September 1-3, 2021, Proceedings // Murat Yilmaz [and three others], (editors)
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-85521-X
Descrizione fisica	1 online resource (753 pages)
Collana	Communications in computer and information science ; ; 1442
Disciplina	005.1
Soggetti	Computer software - Development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Recommended Further Reading -- References -- Acknowledgments -- Organization -- Contents -- Core Research Contributions: SPI and Emerging Software and Systems Engineering Paradigms -- A Blockchain-Enabled Framework for Requirements Traceability -- 1 Introduction -- 2 Related Work -- 3 Proposed Framework -- 4 Conclusion -- References -- To Work from Home (WFH) or Not to Work from Home? Lessons Learned by Software Engineers During the COVID-19 Pandemic -- 1 Introduction -- 2 Methodology -- 2.1 Inclusion/Exclusion Criteria -- 3 Analysis -- 3.1 Remote Work -- 3.2 Team Management -- 3.3 Work/Life Balance and Well-Being -- 3.4 Technology and Software Engineering Methods -- 4 Research Limitations -- 5 Conclusion -- References -- Core Research Contributions: SPI and Team Skills and Diversity -- The Influence of Specialised University Degrees on Employee's Performance -- 1 Introduction -- 2 Problem Statement, Aim, and Objective -- 3 Literature Review -- 4 Research Design and Methods -- References -- Core Research Contributions: SPI and Recent Innovations -- Linking Innovation and eLearning - The Case for an Embedded Design -- 1 Introduction -- 1.1 Overview -- 2 Literature Review -- 2.1 eLearning -- 2.2 Organisational Product Adoption -- 2.3 Innovation -- 2.4 Research Questions -- 3 Research Strategy -- 4 Use Case: eLearning Across Multiple Sectors -- 4.1 Analysis Regarding Research Question 1:

What are the Characteristics for eLearning to be Embedded in the Innovation Process? -- 4.2 Analysis Regarding Research Question 2: What is the Experience from the Automotive Industry Beyond the General Findings Across the Sector? -- 5 Findings and Discussion -- 5.1 Concepts to Improve Organisational Adoption -- 5.2 Specific Findings from the Automotive Case -- 5.3 Synopsis -- 6 Conclusions and Outlook -- Appendix -- References.

The Need of an Innovation Agent: Requirements and Competencies of the Human Dimension in Innovation Management -- 1 Introduction -- 2 Methodology -- 3 Findings -- 3.1 Difference Between the Project Allocation by the Project Team Members and the Innovation Managers -- 3.2 Difference Between Internal and External Evaluation of the Processed Map -- 3.3 Difference Between Actual Allocation and Desired Allocations -- 4 Reflection -- 5 Conclusion and Further Research -- References -- Core Research Contributions: SPI and Agile

-- Towards a Guide for Risk Management Integration in Agile Software Projects -- 1 Introduction -- 2 Risk Management -- 3 Methods -- 4 Related Works -- 5 Guide Development -- 5.1 Guide Structure -- 5.2 Guide Content -- 5.3 Guide Tool -- 6 Initial Evaluation -- 6.1 Analysis -- 6.2 Threats to Validity -- 7 Conclusion -- References --

Orchestrating Agile IT Quality Management for Complex Solution Development Through Topic-Specific Partnerships in Large Enterprises - An Example on the EFIS Framework -- 1 Introduction and Motivation -- 2 Literature Analysis -- 3 Methodology -- 4 Overview

of the Framework Elements -- 5 The EFIS Framework -- 6 Evaluation and Discussion -- 7 Contributions, Limitations and Perspectives -- 7.1 Contributions -- 7.2 Limitations -- 7.3 Perspectives -- References --

Core Research Contributions: SPI and Standards and Safety and Security Norms -- Towards a Process-Based Approach to Compliance with GDPR -- 1 Introduction -- 2 Related Work -- 3 Challenge of Complying

with GDPR -- 4 A Process-Based Approach to Determine Accountability -- 5 Instantiation of the GDPR PM -- 5.1 Experimentation #1 - A Telco Company -- 5.2 Experimentation #2 - A Public Administration

in Health Sector -- 5.3 Experimentation #3 - A Travel Management Company -- 5.4 Experimentation #4 - An Energy Service Operator.

6 Contribution of Process-Based Approach to Determine Accountability -- 6.1 Utility and Usage of Privacy Evaluation -- 6.2 How Can GDPR Process Capability Determination Be Used to Demonstrate

Accountability -- 7 Conclusion -- References -- Impact of the New A-SPICE Appendix for Cybersecurity on the Implementation of ISO26262

for Functional Safety -- 1 Introduction -- 1.1 Scope -- 1.2 Background and Approaches -- 1.3 Relationship with the EUROSPI Manifesto -- 2 Case Study Methodology and Scope -- 3 Case Study Observations

and Results Consolidation -- 3.1 Safety Development Plan (SaDP) -- 3.2 Hazard Analysis and Risk Assessment (HARA) -- 3.3 Functional Safety Concept (FSC) -- 3.4 Technical Safety Concept (TSC) -- 3.5

Safety Test Strategy -- 3.6 Safety Design Analysis (SDA) -- 3.7 Safety Verification Report (SVR) -- 3.8 Safety Case (SaC) -- 3.9 Software Tools

Qualifications Report (SWTQR) -- 4 Study Results -- 5 Conclusion and Recommendations for Future Work -- References -- Core Research

Contributions: SPI and Good/Bad SPI Practices in Improvement -- Symptom-Based Improvement Advice: A New Relevant-Focused

Problem-Based Framework -- 1 Introduction -- 2 Experience -- 3 Deriving a Framework -- 4 The Framework We Developed -- 5 Case

Study -- 6 Discussion and Conclusion -- References -- Passively Acquiring Information Must End -- 1 Introduction -- 2 Networked

Interactive Digital Documents - NID -- 2.1 Table of Contents, Console, Fancy Annotation, Change Layout, Transclusion, Image Manipulation,

Book Details, Metadata, Citation, A.I. -- 3 Applications of Collections of NID Documents -- 3.1 NID for Digital Libraries -- 3.2 NID for Organizational Knowledge Management, Knowledge Sharing and Knowledge Growth -- 3.3 E-Learning Features -- 4 Summary and Outlook -- References.

Towards a Multidimensional Self-assessment for Software Process Improvement: A Pilot Tool -- 1 Introduction -- 1.1 Assessment and Self-assessment -- 1.2 Software and Software Process are Multifaceted, Multidimensional, and Complex -- 2 Research Purpose and Research Design -- 3 Development Studies and Practice in Process Modelling Technology and Self-assessment Tools -- 3.1 Related Work -- 3.2 Self-assessment Considerations and Questions for the STEEPLED Dimensions and for the Automated Tool Version -- 3.3 Facilitating Participation in Self-assessment -- 4 Pilot Tool Design -- 5 Conclusion and Future Work -- 5.1 Why a Self-assessment and Benchmarking Tool? -- 5.2 Future Work -- References -- A Multidimensional Review and Extension of the SPI Manifesto Using STEEPLED Analysis -- 1 Introduction -- 2 Research Design -- 2.1 Methodology, Method and Instrument -- 2.2 The Research Questions -- 3 STEEPLED Analysis of the SPI Manifesto -- 3.1 Viewing the SPI Manifesto as a System of Interconnected Values and Principles -- 3.2 The Sociocultural Dimension -- 3.3 Technical Dimension -- 3.4 Economic Dimension -- 3.5 The Environmental Dimension -- 3.6 The Political Dimension -- 3.7 The Legal Dimension -- 3.8 The Ethical Dimension -- 3.9 The Demographic Dimension -- 4 Collection and Analysis of Data -- 4.1 Relationships of SPI Manifesto Values and Principles -- 4.2 Sociocultural Dimension: Existing and Additional Relationships -- 4.3 Technical Dimension: Existing and Additional Relationships -- 4.4 Economic Dimension: Existing and Additional Relationships -- 4.5 Environmental Dimension: Existing and Additional Relationships -- 4.6 Political Dimension: Existing and Additional Relationships -- 4.7 Legal Dimension: Existing and Additional Relationships -- 4.8 Ethical Dimension: Existing and Additional Relationships -- 4.9 Demographic Dimension: Existing and Additional Relationships -- 5 Extending the Existing SPI Manifesto -- 5.1 Modifications and Additions -- 5.2 SPI Manifesto Assessment and Coaching Tools -- 6 Conclusion -- 6.1 The Research Questions Answered -- References -- Core Research Contributions: SPI and Functional Safety and Cybersecurity -- Automotive Cybersecurity - Training the Future -- 1 Introduction -- 2 Automotive Cybersecurity Skillset Survey -- 2.1 Preparation of Survey -- 2.2 Conduction of Survey -- 3 Conclusion and Next Steps -- References -- Core Research Contributions: Digitalisation of Industry, Infrastructure and E-Mobility -- The Impact of Train Station Topologies on Operation of Autonomous People Movers -- 1 Background -- 1.1 Introduction -- 1.2 Related Work -- 2 Applied Methods -- 2.1 Analysis and Simulation -- 2.2 Telephone Survey -- 3 Basic Definitions and Generic Features of Stations -- 3.1 Rolling Stock -- 3.2 Basic Station Layout -- 3.3 Generic Hazards in Stations -- 3.4 Other Infrastructure: Signals -- 4 Categorisation of Stations -- 4.1 Category A -- 4.2 Category B -- 4.3 Category C -- 4.4 Category D -- 4.5 Category E -- 4.6 Category TA -- 4.7 Category TB -- 4.8 Category TC -- 4.9 Comparison of Categories -- 5 Summary -- References -- Selected Industrial Contributions: SPI and Emerging Software and Systems Engineering Paradigms -- Gamification Principles to Decrease SPI Change Resistance -- 1 Introduction -- 2 Materials and Methods -- 3 Results -- 3.1 Context Phase -- 3.2 Association Phase -- 3.3 Synthesis Phase -- 4 Discussion -- 5 Conclusions -- References -- Towards Reducing Communication Gaps in Multicultural and Global

Requirements Elicitation -- 1 Introduction -- 1.1 Types
of Requirements -- 1.2 Actors of Requirements Elicitation -- 2 What is
Culture? -- 2.1 National Cultures -- 2.2 Organization Cultures.
2.3 Professional Cultures.
