

1. Record Nr.	UNINA9910495349403321
Titolo	E-Learning, e-Education, and online training : 7th EAI international conference, ELEOT 2021, Xinxiang, China, June 20-21, 2020 : proceedings. Part II // Weina Fu, Shuai Liu, Jianhua Dai (editors)
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-84386-6
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (XXI, 614 p. 274 illus., 64 illus. in color.)
Collana	Lecture Notes of the Institute for Computer Sciences, Social Informatics, and Telecommunications Engineering ; ; 390
Disciplina	370.285
Soggetti	Education - Data processing Computer-assisted instruction Internet in education
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Function design of music online education network virtual classroom platform -- Design of online teaching platform for accounting informatization course based on Cloud Computing -- Online video learning design of civil engineering and architecture education in higher vocational education based on streaming media technology -- Design of Online Multimodule Educational Administration System Based on Time Difference Database Technology -- Chemical structure data retrieval algorithm for Chemistry Online Teaching -- Multi mode interactive information processing method in online education system of Ideological and Political -- Design of online training system for innovative and entrepreneurial talents based on interdisciplinary integration -- Diversified design of distance teaching platform for pathogenic microorganism and Design of Sports Dance online interactive teaching system based on intelligent terminal -- Construction of online distance three dimensional teaching platform for industrial design major in Colleges and Universities -- Design of Online Visual Interactive Teaching System Based on Artificial Intelligence Technology -- Design of management accounting online teaching system based on Virtual Simulation Technology Shu- -- The design of

Interactive English online education system based on B / S structure
Ying-di XI, Ying LIN, -- Design of Online Management System for
Painting Teaching Based on Artificial Intelligence Technology -- Design
of online teaching system for innovation and entrepreneurship of
finance major based on big data -- Design of Economics Course
Teaching System Based on Online and Offline Mixed Mode -- One belt,
one road background, international logistics professional online
training and education system -- Online education system for
innovation and innovation courses based on big data from the
perspective of rural revitalization -- Research and Application of
Teaching Resources -- Design of online sharing system for college
writing teaching resources in the media -- Design of online education
resource sharing model based on blockchain Technology -- Conflict
coordination method of heterogeneous educational resources sharing
based on blockchain -- Teaching Resource Sharing System of Real
Estate Management Course Based on Data Mining -- of Intelligent
Cloud Teaching Resource Sharing Platform for Chinese and Korean
Modern Ceramic Art -- Design of security sharing system for online
teaching course resources of fine arts specialty -- Statistical Model of
Online Educational Resource Allocation for Coordinated Development of
Regional Economy -- Design of teaching resource integration system
based on load balancing algorithm -- A data mining based method for
identifying the mismatch of educational resources in regional colleges
and Universities -- Optimization and integration of network teaching
resources of Ideological and political course based on big data --
Research on Hybrid Recommendation Algorithm of Educational
Courseware Resources Based on Heterogeneous Information Fusion --
Research on resource integration method of civil engineering
construction course based on big data mining -- Research on
Teaching Evaluation Method -- Teaching quality evaluation method of
human resource management based on big data -- Evaluation model of
English Continuous pronunciation teaching quality based on Cloud
Computing -- Design of intelligent evaluation system for application
effect of Internet Financial Sharing course -- Comprehensive evaluation
model of MOOC teaching quality of accounting major based on Rete
algorithm -- Evaluation Method of Teaching Effect of Applied Logistics
Management Course Based on Deep Learning -- Evaluation method of
online learning process under the background of educational big data
-- Research on online course teaching quality evaluation method based
on Internet of things technology -- Evaluation model of computer
education reform effect in Colleges and Universities Based on Improved
Fuzzy Clustering Algorithm -- Evaluation model of electrical control
teaching mode reform effect based on deep convolution neural network
-- Evaluation Method of Interactive Quality of Road and Bridge
Construction Course Teaching Based on Principal Component Analysis
Hong-wei TIAN -- Research on Intelligent Correction of Abnormal Data
in Online Education System Based on Big Data Technology --
Monitoring method of students' learning behavior in online education
platform based on Data Mining -- Internet of Things and Collaborative
Computing 95 Research on the application of CI system in the
construction of university class culture under the internet background
-- Education information network terminal big data analysis response
and monitoring system Lei Ma, Xin-yu 97 Feature extraction method of
students' ideological and political learning behavior based on
convolutional neural network -- Research on the diversity of technical
characteristics of folk music classroom teaching based on network
knowledge sharing -- Adaptive Parameter Determination Method of
Synchronous Motor Digital PI Regulator -- Research on the relationship

between volatility and regional economies of scale in cloud computing
-- Multimedia resources search service system of preschool education
based on Augmented Reality Technology -- Detection Method of
Machine Tool Axis Offset Distance Based on Rough Set Neural Network
Nan -- Control method of multi joint snake like manipulator based on
hybrid fish swarm ant colony algorithm -- Design of Step Motor
Automation Control System Based on Lyapunov Stability Theory.

Sommario/riassunto

This 2-volume set constitutes the proceedings of the 7th International Conference on e-Learning, e-Education, and Online Training, eLEOT 2021, held in Xinxiang, China, in June 2021. The 104 full papers presented were carefully reviewed and selected from 218 submissions. The papers are structured into two subject areas: New Trends of Teaching: Evaluation, Reform and Practice, and Intelligent Learning and Education. They focus on most recent and innovative trends and new technologies of online education which grows quickly and becomes the educational trend today. The theme of eLEOT 2021 was “The Educational Revolution: Opportunities and Challenges brought by COVID-19”.
