Descrizione fisica	1 online resource (176 p.)
Soggetti	Sociology exil migrations asile immigration
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Les phénomènes migratoires atteignent une ampleur inédite et suscitent de graves crises sociétales en Europe et ailleurs. C'est pourquoi il importe d'en renouveler les analyses en se penchant sur la condition des exilés. Si les discours actuels font du migrant une figure propre à alimenter chiffres et statistiques, ils gommant son vécu et ses parcours, ses espoirs et ses souffrances. Or, le migrant est d'abord un exilé, porteur à ce titre d'une identité plurielle et d'une expérience de multiappartenance propres à enrichir le vivre-ensemble. Comprendre le migrant en tant qu'exilé permettra de mieux l'accueillir et, en place d'un droit d'asile défaillant, d'esquisser les fondements d'un droit d'exil.

Sommario/riassunto	The journal's objective is to cement its competitive position as a prominent journal of the BISE (Business & Information Systems Engineering) community and reinforce that status through quality improvements and extending its readership. In addition, the journal seeks to establish design science oriented research within the global arena, secure a lasting position and reputation in the global BISE community, and foster constructive dialogue among the discipline's differing international models. Therefore, the journal aims at further developing the theoretical foundations of action in order to preserve sustainable approaches despite tempestuous technical development. Besides, the journal aspires to promote technology transfer in order to make better solutions available faster and to considerably reduce costs of system design and operation. The central mission is to develop,

promote, and shape the BISE discipline for the benefit of its members and society.
