Sommario/riassunto	<p>Pourquoi s'intéresser à la manière dont les enseignants planifient leurs cours ? Parce qu'au-delà de son apparente banalité, cette activité, qui est consubstantielle de tout travail enseignant, apparaît comme l'une des plus révélatrices des complexités du métier. Planifier, en effet, c'est se situer dans une triple temporalité : celle de la longue durée (le semestre et l'année, mais aussi, le degré et le cycle), celle de la durée moyenne (la séquence didactique) et celle de la durée courte et immédiate (l'heure de cours). C'est aussi articuler en permanence des choix personnels avec ceux, prescrits, de l'institution. Comment ces tensions sont-elles vécues et gérées dans les différentes disciplines ? Cette question méritait déjà à elle seule qu'on y consacre un ouvrage collectif. Pour éclairer cette réflexion, deux témoins privilégiés ont d'abord été sollicités. Le premier, Frédéric Dewez, par sa position institutionnelle de responsable pédagogique au sein du réseau libre catholique de la Belgique francophone, était bien placé pour proposer un nouveau mode de planification applicable à plusieurs disciplines qui permette une meilleure intégration des acquis scolaires. Le second témoin est François Tochon, professeur à l'Université du Wisconsin-Madison, dont les ouvrages alimentent depuis longtemps le travail des formateurs. Celui-ci s'inscrit dans le cadre de l'« approche profonde » de l'éducation pour présenter un modèle de planification « ouverte » de l'enseignement et pour mettre en évidence le défi que les réformes en cours posent aux enseignants et aux administrations scolaires. Au-delà de ces deux éclairages liminaires, les participants à cette journée d'études se sont répartis en cinq ateliers disciplinaires consacrés au français, à l'histoire, aux langues modernes, aux mathématiques et aux sciences.</p>

Sommario/riassunto

This book is ideal for anyone who reaserching their Caribbean family history The National Archives and beyond. The National Archives holds records for many people who lived in British West Indian colonies such as emigrants, plantation owners, slaves, soldiers, sailors and transported criminals. The Archives also hold the colonial office records for the British West Indies. This includes state correspondence to and from the colonies and passenger lists. Tracing Your Caribbean Ancestors also shows readers how to use family history sources and genealogy websites and indexes beyond The National Archives. Fully updated and revised, this new edition covers recent developments in Caribbean archives, including details of newly released information and archives that are now available online. This book outlines the primary research sources for those tracing their Caribbean ancestry and describes details of access to archives, further reading, useful websites and how to find and accurately search family history sources. As Britain does not hold locally created records of its dependencies such as church records, this book doubles as a gateway to the local history sources throughout the Caribbean that remain in each country's archives and register office. This book will be of use to anyone researching family history in British Caribbean countries of Anguilla, Antigua, Bahamas, Barbados, British Virgin Islands, Cayman Islands, Dominica, Grenada, Jamaica, Montserrat, St Kitts and Nevis, St Lucia, St Vincent, Trinidad and Tobago and the Turks and Caicos Islands as well as Guyana, Belize and Bermuda.
