Subject Handbook -- APPENDIX B. Choices of Principles by Experimental Type -- APPENDIX C. Analyzing the Role of Background and Attitudinal Variables -- APPENDIX D. Analyzing the Effect of Location on the Level of Floor Constraint -- APPENDIX E. Analyzing Changes in Support for Principles by Rankings -- APPENDIX F. Production Documents -- APPENDIX G. Setting the Imposed Principle -- References -- Index
Sommario/riassunto	This book presents an entirely new answer to the question: "What is

fair?" In their radical approach to ethics, Frohlich and Oppenheimer argue that much of the empirical methodology of the natural sciences should be applied to the ethical questions of fairness and justice.
