**Sommario/riassunto**

Augmenter l'humain, devenir plus fort, plus rapide, plus intelligent, plus connecté, vivre plus vieux et en meilleure santé, repousser les limites de la souffrance et de la mort. Le développement technologique porte la promesse d'un être meilleur. Mais cet amour de l'homme du futur ne cache-t-il pas une haine de l'homme du présent, de ses limites et de sa finitude ? Quelles conceptions du corps et de l'esprit sont sous-tendues par les discours transhumanistes ? Donner des clés pour comprendre le rapport d'attraction-répulsion qu'entretient l'être humain avec les technologies qu'il crée, cristallisé autour de la notion d'homme augmenté, constitue l'objet de ce numéro des Essentiels d'Hermès.

**Nota di contenuto**

Evolution of guidelines for defibrillator therapy -- Background of ICD therapy -- Current indications for ICD therapy -- Legal implications of defibrillator guidelines.

---

**Sommario/riassunto**

In this book, well-known physicians, Bocker, Eckardt and Breithardt have put together a succinct and focused book that compliments the CATA Series well. Implantation of defibrillators has evolved dramatically since its introduction by Mirowski in 1980. Technological improvements in devices and leads included a gradual reduction in the size of the device, the introduction of the endocardial approach in 1988, the biphasic waveform and antitachycardia pacing in 1991, pectoral implantation in 1995, inclusion of DDD pacing in 1996 and the delivery of atrial therapies in 1998. Since the first
