Women's eating problems and the cultural meanings of body size; 12. Psychological suffering in social and cultural contexts; 13. Feminism and gender in psychotherapy; 14. Comparing women and men: a retrospective on sex

difference research; 15. Psychology's place in society and society's place in psychology.

## Sommario/riassunto

Gender and Culture in Psychology introduces new approaches to the psychological study of gender that bring together feminist psychology, socio-cultural psychology, discursive psychology and critical psychology. It presents research and theory that embed human action in social, cultural and interpersonal contexts. The book provides conceptual tools for thinking about gender, social categorization, human meaning-making, and culture. It also describes a family of interpretative research methods that focus on rich talk and everyday life. It provides a close-in view of how interpretative research proceeds. The latter part of the book showcases innovative projects that investigate topics of concern to feminist scholars and activists: young teens' encounters with heterosexual norms; women and men negotiating household duties and childcare; sexual coercion and violence in heterosexual encounters; the cultural politics of women's weight and eating concerns; psychiatric labelling of psychological suffering; and feminism in psychotherapy.

Sommario/riassunto	<p>This collection of interviews explores the role of religion in the lives of eminent South Africans who led the struggle against apartheid. Nelson Mandela, Chris Hani, Desmond Tutu, Nadine Gordimer, and seventeen other political, religious, and cultural leaders share the beliefs and values that informed the moral positions they adopted, often at great cost. From all ethnic, religious, and political backgrounds, these men and women have shaped one of the greatest political transformations of the century. What emerges from the interviews are reflections on all aspects of life in an embattled country. There are stories of the homelands and townships, and tales of imprisonment and exile. Dedicated communists relate their intense youthful devotion to Christianity; Muslim activists discuss the complexity of their relationships with their communities. As the respondents grapple with difficult questions about faith, politics, and authority, they expose a more personal picture: of their daily lives, of their pasts, and of the enormous conflicts that arise in a society that continually strains the moral fiber of its citizens. Taken together, these interviews reveal the many-faceted vision that has fueled South Africa's struggle for democracy.</p>
