

1. Record Nr.	UNINA9910495990703321
Autore	Lecuit Thomas
Titolo	The Dynamics of Living Systems : Inaugural lecture given on Thursday 27 April 2017 // Thomas Lecuit
Pubbl/distr/stampa	Paris, : Collège de France, 2020
ISBN	2-7226-0560-0
Collana	Leçons inaugurales
Altri autori (Persone)	HeardEdith LecuitThomas
Soggetti	Dynamics & statics Biophysics Biology, life sciences Life sciences: general issues Developmental biology Molecular biology Cellular biology (cytology)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	How can we explain the fundamental paradox of living matter, which combines stability and robustness of form with constant internal dynamics? It is not only the genetic information contained in every cell, but also numerous stochastic biomolecular processes that are at work in morphogenesis. In addition, the shaping of an organism is driven by mechanical forces that operate within and between cells, across tissues and organs. The dynamics of morphogenesis is a self-organized process that emerges from biological control and physical constraints at all scales. Its study is currently bringing together a fast-growing interdisciplinary community that observes, analyses and models living organisms.
