

1. Record Nr.	UNINA9910451260103321
Titolo	Corpus-based approaches to metaphor and metonymy [[electronic resource] /] / edited by Anatol Stefanowitsch, Stefan Th. Gries
Pubbl/distr/stampa	Berlin ; ; New York, : M. de Gruyter, c2006
ISBN	1-282-19494-1 9786612194948 3-11-019989-0
Descrizione fisica	1 online resource (328 p.)
Collana	Trends in linguistics. Studies and monographs ; ; 171
Classificazione	ET 425
Altri autori (Persone)	StefanowitschAnatol <1970-> GriesStefan Thomas <1970->
Disciplina	808.00285
Soggetti	Metaphor - Data processing Metonyms - Data processing Cognitive grammar - Data processing Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Front matter -- Table of contents -- Corpus-based approaches to metaphor and metonymy -- Metaphoricity is gradable -- A corpus-based study of metaphors for speech activity in British English -- Words and their metaphors: A corpus-based approach -- The grammar of linguistic metaphors -- Keeping an eye on the data: Metonymies and their patterns -- Metonymic proper names: A corpus-based account -- On groutnolls and nog-heads: A case study of the interaction between culture and cognition in intelligence metaphors -- Sense and sensibility: Rational thought versus emotion in metaphorical language -- A corpus-based analysis of context effects on metaphor comprehension -- Of critical importance: Using electronic text corpora to study metaphor in business media discourse -- Metaphors, motifs and similes across discourse types: Corpus-Assisted Discourse Studies (CADS) at work -- Back matter
Sommario/riassunto	The papers in this volume deal with the issue of how corpus data relate to the questions that cognitive linguists have typically investigated with respect to conceptual mappings. The authors in this volume investigate

a wide range of issues - the coherence and function of particular metaphorical models, the interaction of form and meaning, the identification of source domains of metaphorical expressions, the relationship between metaphor and discourse, the priming of metaphors, and the historical development of metaphors. The studies deal with a variety of metaphorical and metonymic source and target domains, including the source domains SPACE, ANIMALS, BODY PARTS, ORGANIZATIONS and WAR, and the target domains VERBAL ACTIVITY, ECONOMY, EMOTIONS and POLITICS. In their studies, the authors present a variety of corpus-linguistic methods for the investigation of conceptual mappings, for example, corpora annotated for semantic categories, concordances of individual source-domain items and patterns, and concordances of target-domain items. In sum, the papers in this volume show how a wide range of corpus-linguistic methods can be used to investigate a variety of issues in cognitive linguistics; the combination of corpus methods with a cognitive-linguistic view of metaphor and metonymy yields new answers to old questions (and to new questions) about the relationship between language as a conceptual phenomenon and language as a textual phenomenon.

Sommario/riassunto	Mettre à la portée de tous une discipline jusque-là confidentielle, voilà le tour de force réalisé par Dominique Sordoillet avec cet ouvrage. Un ouvrage issu de son mémoire de thèse dont la qualité scientifique et la rigueur méthodologique ont été unanimement saluées. S'appuyant sur l'exemple de trois sites archéologiques particulièrement parlants, elle en étudie la stratigraphie avec les arguments du spécialiste des sciences de la terre. Ainsi les installations préhistoriques du Gardon, de Montou et de Saint-Alban sont-elles passées au crible de l'analyse micromorphologique, qui voit la stratigraphie comme un enregistrement sédimentaire du temps. Par la classification des dépôts en deux grandes familles selon les processus dont ils résultent, elle distingue les faciès d'occupation, générés par l'homme, des faciès d'

abandon, inhérents aux processus sédimentaires et postsédimentaires naturels. Ces données sédimentologiques, replacées dans leur cadre chronoculturel, permettent ensuite de proposer des scénarios d'occupation et des interprétations sur l'évolution des pratiques, des rites ou des méthodes de construction. Un exposé court, bien illustré, rédigé en termes simples, un lexique, autant d'éléments qui feront de cet ouvrage un outil pour mieux comprendre les méthodes et les buts de la micromorphologie, dans l'intérêt direct de l'interprétation du terrain et de la conduite de chantier.

In this work, Dominique Sordillet accomplishes the difficult task of rendering a previously obscure discipline accessible to everyone. This work originates from her doctoral dissertation thesis, which received unanimous praise for its methodological and scientific rigor. Drawing on elements from the earth sciences, she studied the stratigraphy of three exemplary archaeological sites. The prehistoric sites of Gardon, Montou and Saint-Alban were thus subject to a precise micromorphological analysis, which considers a stratigraphy as a sedimentary record of time.
