

1. Record Nr.	UNINA9910502592903321
Titolo	Logic and argumentation : 4th International Conference, CLAR 2021, Hangzhou, China, October 20-22, 2021, proceedings // edited by Pietro Baroni, Christoph Benzmuller, and Y N. Wang
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-89391-X
Descrizione fisica	1 online resource (562 pages)
Collana	Lecture Notes in Computer Science ; ; v.13040
Disciplina	511.3
Soggetti	Uncertainty (Information theory) Reasoning Logic, Symbolic and mathematical
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Organization -- On the Need of Knowledge for Computational Argument Analysis and Generation (Abstract of Invited Talk) -- Contents -- Invited Papers -- Resolving the Cohenian Paradox in Judicial Probability Theory -- 1 Introduction -- 2 The Selection Problem: Subjective vs Objective Probability -- 3 The Calculation Problem: A Franklinian Solution -- 4 The Conjunction Problem: A Probabilistic Justification -- 5 Conclusion -- References -- Focusing the Argumentative Process: Neighborhood-Based Semantics in Abstract Argumentation -- 1 Introduction -- 2 Background -- 2.1 Hashtagged Argumentation Framework -- 2.2 Proximity-Based Semantics -- 3 Argument Neighborhoods: A Topological View -- 4 Neighborhood-Bounded Admissibility -- 5 Related Work and Conclusions -- References -- Burdens of Persuasion and Standards of Proof in Structured Argumentation -- 1 Introduction -- 2 Burdens of Production and Burdens of Persuasion -- 3 Argumentation Framework -- 3.1 Defeasible Theories -- 3.2 Defeat with Burdens of Persuasion -- 3.3 Example -- 4 A Labelling Semantic for Burdens of Persuasion -- 4.1 Argumentation Graphs and Bp-Labelling -- 4.2 Examples -- 4.3 The Problem of Defeat Cycles -- 5 Adversarial Burden of Persuasion -- 6 Standards of Proof -- 6.1 From Priorities to Bandwidths -- 6.2

Examples -- 7 Conclusion -- References -- Implementation of Choice of Jurisdiction and Law in Private International Law by PROLEG Meta-interpreter -- 1 Introduction -- 2 Reasoning About Jurisdiction -- 2.1 Syntax of Modular-PROLEG -- 2.2 Modular-PROLEG Semantics a la Answer Set Programming -- 2.3 Meta Interpreter of Modular-PROLEG -- 2.4 Example of Reasoning About Jurisdiction -- 3 Reasoning About Choice of Law -- 3.1 Syntax of Modular-PROLEG for PIL -- 3.2 Semantics for Modular-PROLEG for PIL -- 3.3 Meta-interpreter of Modular-PROLEG for PIL.

3.4 Example of Reasoning About International Affairs -- 4 Conclusion -- References -- Full Papers -- Collective Argumentation with Topological Restrictions -- 1 Introduction -- 2 Argumentation Framework and Topological Property -- 3 The Aggregation Model -- 4 Topological Restriction -- 5 Preservation Results with Topological Restrictions -- 5.1 Acyclicity -- 5.2 Symmetry -- 6 The Majority Rule and Topological Restrictions -- 7 Conclusion -- References -- The Choice-Preferred Semantics for Relevance-Oriented Acceptance of Admissible Sets of Arguments -- 1 Introduction -- 2 Preliminaries -- 3 A Novel Principle: SAFWOC -- 4 Motivation for New Semantics -- 5 Choice-Preferred Semantics -- 6 Satisfaction of Principles -- 7 Conclusion and Future Work -- References -- New Weak Admissibility Semantics for Abstract Argumentation -- 1 Introduction -- 2 Preliminaries -- 3 New Weak Admissibility Semantics -- 4 Principles -- 5 Related and Future Work -- 6 Conclusion -- References -- On Restricting the Impact of Self-attacking Arguments in Gradual Semantics -- 1 Introduction -- 2 Formal Setting and Existing Semantics -- 2.1 h-categorizer Semantics -- 2.2 M&T Semantics -- 3 Principles for Gradual Semantics -- 4 Analysis of Principles and Links Between Them -- 5 No Self-Attack h-categorizer Semantics -- 6 Principle-Based Evaluation of Semantics -- 7 Experimental Results -- 8 Summary -- References -- Flexible Dispute Derivations with Forward and Backward Arguments for Assumption-Based Argumentation -- 1 Introduction -- 2 Formal Background -- 3 Argument-Based Flexible Dispute Derivations -- 3.1 Argument and Dispute State Expansions -- 3.2 Argument-Based Flexible Dispute Derivations Following Structured and Graph-Based Dispute Derivations -- 3.3 Flexible Dispute Derivations -- 4 Rule-Based Flexible Dispute Derivations -- 5 Implementation.

6 Conclusions and Future Work -- References -- Towards a General Theory of Decomposability in Abstract Argumentation -- 1 Introduction -- 2 Background -- 3 A General Model for Decomposability -- 3.1 Modelling Local Information -- 3.2 The Notions of Local Function and Decomposability -- 4 On the Power of Local Information Functions -- 5 The Canonical Local Function -- 6 Discussion and Conclusion -- References -- Abstract Argumentation with Qualitative Uncertainty: An Analysis in Dynamic Logic -- 1 Introduction -- 2 Background -- 2.1 Abstract Argumentation Frameworks and Their Stable Semantics -- 2.2 Dynamic Logic of Propositional Assignments (DL-PA) -- 3 Formalisms for Arguing with Qualitative Uncertainty -- 4 Incomplete AFs in DL-PA -- 5 Rich Incomplete AFs in DL-PA -- 6 Control AFs in DL-PA -- 7 Constrained Incomplete AFs and Their Encoding in DL-PA -- 8 Discussion and Future Work -- References -- Explanations of Non-monotonic Inference in Admissibility-Based Abstract Argumentation -- 1 Introduction -- 2 Preliminaries -- 3 Explainability Framework -- 4 Implementation -- 5 Discussion -- 6 Conclusion -- References -- The Burden of Persuasion in Abstract Argumentation -- 1 Introduction -- 2 Preliminaries -- 3 An Abstract Argumentation-Based Burden of Persuasion -- 4 Semantics Selection and Skeptical Acceptance -- 5

Discussion -- 6 Conclusion -- References -- Handling Support Cycles and Collective Interactions in the Logical Encoding of Higher-Order Bipolar Argumentation Frameworks -- 1 Introduction -- 2 Background on REBAF Given in ch14CFFLS18bspssh -- 3 Background on the Logical Description of a REBAF Given in ch14CLS20 -- 4 REBAF with Support Cycles: Analysis and New Proposition -- 5 Collective Interactions in REBAF: Impact on the Logical Encoding -- 6 Conclusion and Future Works -- A Sketches of Proof -- References.

Tableau-Based Decision Procedure for Logic of Knowing-How via Simple Plans -- 1 Introduction -- 2 Preliminaries -- 3 Tableau System for ELKh -- 4 Completeness -- 5 Decision Procedure -- 6 Conclusion -- References -- Integrating Individual Preferences into Collective Argumentation -- 1 Introduction -- 2 Preliminaries -- 3 A Novel Method for Framework Merging -- 4 Incomplete Preference Aggregation -- 5 The Concordance Between Collective Framework and Social Preference -- 6 Conclusion -- 6.1 Related Work -- 6.2 Future Work -- References -- A Logic for Binary Classifiers and Their Explanation -- 1 Introduction -- 2 A Language for Binary Classifiers -- 2.1 Basic Language and Classifier Model -- 2.2 Properties of Classifier Models -- 3 Counterfactual Conditional -- 4 Explanations and Biases -- 4.1 Prime Implicant Expressed in CM -- 4.2 Abductive Explanation (AXp) -- 4.3 Contrastive Explanation (CXp) -- 4.4 Decision Bias -- 5 Axiomatization and Complexity -- 6 Extensions -- 6.1 Dynamic Extension -- 6.2 Epistemic Extension -- 7 Conclusion -- References -- Extension-Based Semantics for Incomplete Argumentation Frameworks -- 1 Introduction -- 2 Background -- 2.1 Abstract Argumentation Frameworks -- 2.2 Qualitative Uncertainty in AFs -- 3 Generalizing Extension-Based Semantics from PAFs to IAFs -- 3.1 Conflict-Free and Admissible Sets of IAFs -- 3.2 Admissibility-Based Semantics for IAFs -- 3.3 Stable Semantics for IAFs -- 4 Computational Issues -- 4.1 Computational Complexity -- 4.2 SAT-Based Computational Approach -- 5 Related Work -- 6 Conclusion -- References -- Relevant Epistemic Logic with Public Announcements and Common Knowledge -- 1 Introduction -- 2 Relational Semantics -- 3 A Relational Completeness Result -- 4 Information Models -- 5 Questions -- 6 Conclusion -- References.

A Variant with the Variable-Sharing Property of Brady's 4-Valued Implicative Expansion BN4 of Anderson and Belnap's Logic FDE -- 1 Introduction -- 2 The Matrix MBN4VSP -- 3 The Logic BN4VSP -- 4 Belnap-Dunn Semantics for BN4VSP -- 5 Concluding Remarks -- References -- Intrinsic Argument Strength in Structured

Argumentation: A Principled Approach -- 1 Introduction -- 2 Basic Concepts -- 3 Principles -- 4 Assigning Intrinsic Strength -- 5 Aggregation Methods -- 6 Properties of Aggregation Methods -- 7 Conclusion -- References -- How Can You Resolve a Trilemma? - A Topological Approach -- 1 Introduction -- 2 Basic Concepts -- 3 AF Including One Triangular Unit -- 3.1 No Connector -- 3.2 One Connector -- 3.3 k Connectors -- 4 Triangular Units Sharing Nodes -- 4.1 AF Including Two triangular units -- 4.2 AF Including Three triangular units -- 4.3 AF Including k triangular units -- 4.4 Acceptance of a Specific Argument -- 4.5 N-Lemma -- 5 Connected Modules -- 6 Related Works -- 7 Conclusion -- References -- A Multi Attack Argumentation Framework -- 1 Introduction -- 2 Related Work -- 3 Multi Attack Argumentation Frameworks (MAAFs) -- 3.1 Classes of Extensions for MAAFs -- 3.2 Firm, Restricted and Loose Extensions -- 4 Properties of MAAFs -- 4.1 Initial Results and Special Cases -- 4.2 Relations Among Extension Types, and Existence Results -- 4.3 Relations Among Extension Classes -- 5 Discussion and Conclusion --

A Appendix -- References -- Towards a Sound and Complete Dialogue
System for Handling Enthymemes -- 1 Introduction -- 2 Preliminaries
-- 3 Dialogue System -- 4 Soundness and Completeness -- 5
Conclusion -- References -- Short Papers and Extended Abstracts -- A
Henkin-Style Completeness Proof for the Modal Logic S5 -- 1
Introduction -- 1.1 Related Work -- 1.2 Lean -- 2 Modal Logic -- 2.1
The Language -- 2.2 The Proof System -- 2.3 Semantics.
3 The Completeness Theorem.
