Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource : illustrations
Collana	Palgrave Studies in Economic History, , 2662-6500
Disciplina	330.9 614.51809041
Soggetti	Economic history Social history Economic History Social History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1 'Strange malady in Spain': History of the influenza pandemic 1918-19 -- Chapter 2 'Mysterious Malady Spreading': Origins and dissemination of influenza in Ireland -- Chapter 3 'Ravages of influenza': the human cost of the disease in Ireland -- Chapter 4 'Woe unto them that are with child': gender and influenza in Ulster -- Chapter 5 'The "Mystery" epidemic': Newspaper coverage of the 1918-19 influenza pandemic in Ulster -- Chapter 6 Case studies of industrial towns (Belfast, Derry, Lurgan and Portadown) -- Chapter 7 Case studies of market towns (Cookstown, Clones, Newry) -- Chapter 8 Case study of Naval Port and neighbouring towns (Larne and Ballyclare).
Sommario/riassunto	This book examines the Irish experience of the 1918-19 influenza pandemic through a detailed study of the disease in the most industrialised region of the country, the province of Ulster. By exploring the different themes of dispersion of the disease; mortality; gender; medical response and politics - and through case studies of different

towns in the province of Ulster - it builds up a picture of the social, economic and political impact of influenza in Ireland. The Ulster experience of the pandemic is examined by constructing micro-histories of industrial cities and towns, along with provincial market towns and a naval port, to provide a basis for comparison of the differing approaches taken to combat the influenza outbreaks throughout Ulster. Contemporary opinion was that Ireland was considerably less affected by the war than the rest of the UK but, this book shows that the war did have a significant influence on how the influenza pandemic impacted on the Irish population from an economic, social and medical point of view. The book also explores the immediate aftermath of the pandemic and how it influenced the Irish response to the influenza scare of 1920 and the viral pandemic of Encephalitis Lethargica which was prevalent for ten years after 1918, as well as discussing what if any lessons learnt from 1918 have been applied to the present-day outbreak of Covid 19. This book will be of interest to academics in economic history, social history, Irish history and pandemic history, and those studying the effects of pandemics on the economy, health provision and pandemic preparedness. Patricia Marsh began researching the 1918-1919 influenza pandemic in 2005 and completed a MA dissertation on the effect of the pandemic in Belfast in 2006. Her PhD thesis completed in 2010 was entitled 'The Effect of the 1918-19 Influenza Pandemic on Ulster.' She has spoken widely on the 1918-19 influenza pandemic at conferences and seminars in the United Kingdom and Ireland. Her research interests include the encephalitis lethargica epidemic in Ireland and typhoid in Belfast during the twentieth century. She worked as a Teaching assistant at Queen's University Belfast from 2008 until 2011 and was a Tutor for an Open Learning Course in Queen's University Belfast, entitled 'Plague, Famine and Disease in Ulster.'
