

1. Record Nr.	UNINA9910502649603321
Autore	Zhu Tongxin
Titolo	Watershed erosion processes // Tongxin Zhu and Xiangzhou Xu
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-81151-4
Descrizione fisica	1 online resource (175 pages)
Collana	Geography of the Physical Environment
Disciplina	631.45
Soggetti	Soil erosion Watershed management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Intro -- Preface -- Contents -- 1: Introduction -- 1.1 Soil Erosion and Its Impact -- 1.2 Watershed Erosion Processes -- 1.3 Research Itinerary -- References -- 2: Watershed Characteristics -- 2.1 The Loess Plateau -- 2.2 The Study Watershed -- 2.2.1 Climate -- 2.2.2 Lithological, Soil, and Hydrological Setting -- 2.2.3 Topographic and Land-Use Conditions -- References -- 3: Sheet and Rill Erosion -- 3.1 Introduction -- 3.2 Field Experimental Setting and Methods -- 3.3 Results and Discussion -- 3.3.1 Slope Gradient -- 3.3.2 Soil and Water Loss on Different Land Use Conditions -- 3.3.3 Effects of Crusting on Soil Moisture, Runoff and Soil Loss -- Soil Moisture -- Runoff and Sediments -- Hillslopes -- 3.3.4 Soil Shear Strength -- 3.4 Synthesis, Discussion and Conclusion -- References -- 4: Gully Erosion -- 4.1 Introduction -- 4.2 Methods and Study Objectives -- 4.3 Distribution and Classification of the Gullies/Channels -- 4.4 Morphological Characteristics of Gullies/Ephemeral Streams -- 4.5 Geomorphic Features within the Gully Systems -- 4.6 Spatial Variability of Soil Shear Strength within the Gully Systems -- 4.7 Gully Formation and Development Processes -- 4.7.1 Water Erosion at Gully Head -- 4.7.2 Gully Development and Tunnel Formation -- 4.7.3 Mass Movement in Gully Development -- 4.8 Gully Susceptibility Mapping -- 4.8.1 Controlling Factors of Gully Development -- Topographic Conditions -- Land Use -- Lithology -- Roads -- Tunnels --

Hydrologic Conditions -- 4.8.2 Susceptibility Mapping -- 4.9
Evaluation of Sediment Production by Gullies -- 4.10 Discussion
and Conclusion -- References -- 5: Mass Movement -- 5.1
Introduction -- 5.2 The Study Area and Methodology -- 5.3 Results
-- 5.3.1 Types and Distribution of Mass Movement -- 5.3.2 Factors
Influencing Mass Movement.
5.3.3 Mass Movement Susceptibility Mapping -- 5.3.4 Sediment
Production by Mass Movement -- 5.4 Discussion and Conclusion --
References -- 6: Tunnel Erosion -- 6.1 Introduction -- 6.2 Surveys
of Tunnel Systems -- 6.2.1 Methods for Surveying Tunnel Systems --
6.2.2 Size and Distribution of Tunnel Inlets -- 6.3 Locations
of Tunnels -- 6.3.1 Tunnel Inlets -- 6.3.2 Tunnel Systems -- 6.4
Tunnel Initiation -- 6.5 Tunnel Development over a 12-Year Period --
6.6 The Effect of Physical and Chemical Properties of Soils on Tunnel
Formation -- 6.7 Hydrological and Sediment Processes of Tunnel
Flows -- 6.8 Tunnel Contributions to the Catchment Flow Discharges
and Sediment Yields -- 6.9 A Comparison of Erosion Between
the Tunneled and Untunneled Slopes -- 6.10 Conclusion and Future
Work -- References -- 7: Spatial Distributions and Interactions
of Different Erosion Processes -- 7.1 Introduction -- 7.2 Methods --
7.3 Spatial Distribution of Different Erosion Processes -- 7.4 Spatial
Interactions of Mass Movements, Tunnels, and Gullies -- 7.4.1 Mass
Movement and Gully Erosion -- 7.4.2 Tunnel Development and Mass
Movement -- 7.4.3 Gully Development and Tunnel Formation -- 7.5
Intergully and Gully Erosion Processes -- 7.6 Implications for Erosion
Control -- 7.7 Conclusion -- References -- 8: Soil and Water Loss
and Its Control at the Different Spatial Scales -- 8.1 Introduction --
8.2 Study Site -- 8.3 Runoff and Soil Loss in the WJG Watershed -- 8.4
Soil and Water Loss from the Unmanaged and Managed Subwatersheds
-- 8.4.1 Characteristics of the YDG and CZG Subwatersheds -- 8.4.2
Annual Soil and Water Loss -- 8.4.3 Soil and Water Loss on an Event
Basis -- 8.5 Effectiveness of Different Conservation Measures
in Reducing Soil and Water Loss at Plot Scale.
8.6 Soil and Water Loss from the Unmanaged Land and Geomorphic
Units in the WJG Watershed -- 8.7 Sediment Budget in the YDG
and CZG Subwatersheds as well as in the WJG Watershed -- 8.8
Discussion -- 8.9 Conclusion -- References -- 9: Simulation Modeling
of Hydrological and Erosion Processes -- 9.1 Introduction -- 9.2
Topog Model -- 9.3 Erode Model -- 9.4 Conclusion, Challenges,
and Future Work -- References -- 10: Soil Erosion and Control:
A Retrospective Study on the Loess Plateau of China -- 10.1
Introduction -- 10.2 Study Area -- 10.3 Data and Methods -- 10.4
Non-uniformity of Runoff Generation -- 10.5 Spatial and Temporal
Distribution of Soil Erosion -- 10.6 Sediment Production by Different
Erosion Processes -- 10.7 Soil Loss Controlled by Conservation
Practices -- 10.8 Discussion -- 10.8.1 Mechanism Analysis of Soil
and Water Conservation Measures -- 10.8.2 Role of Check Dams
in Reducing Soil and Water Loss -- 10.9 Conclusion -- References --
Index.
