

1. Record Nr.	UNINA9910502687203321
Autore	Carron N. J.
Titolo	An introduction to the passage of energetic particles through matter // N.J. Carron
Pubbl/distr/stampa	Taylor & Francis, 2006 Boca Raton : , : Taylor & Francis, , 2007
ISBN	0-429-13739-7 1-280-73246-6 9786610732463 1-4200-1237-1
Descrizione fisica	1 online resource (386 p.)
Disciplina	530.138
Soggetti	Transport theory Particles (Nuclear physics) Photons Electrons Protons Neutrons
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front cover; Preface; Acknowledgments; The Author; Table of Contents; Chapter 1. Introduction; Chapter 2. Photons; Chapter 3. Electrons; Chapter 4. Protons and Heavier Ions; Chapter 5. Selected Topics on Neutron Interactions; Appendix A: Some Fundamental Constants and Defined Units; Appendix B: Useful Web Sites; Index; Back cover
Sommario/riassunto	Making modern data more accessible, this book explores the interactions with matter of energetic particles, including photons, electrons, protons, alpha particles, and neutrons. It presents quantities of interest in many applications, such as cross sections, charged particle stopping powers, electron mean ranges, and angular distributions. The book also discusses electron multiple scattering and models for electron mean range against both stopping power and scattering. The author uses numerous graphs to illustrate the material,

and the accompanying CD-ROM includes full datasets and large, colo
