

1. Record Nr.	UNINA9910502988703321
Titolo	Neglected and underutilized crops - towards nutritional security and sustainability // edited by Sajad Majeed Zargar, Antonio Masi, Romesh Kumar Salgotra
Pubbl/distr/stampa	Singapore : , : Springer, , [2021] ©2021
ISBN	981-16-3876-4
Descrizione fisica	1 online resource (278 pages)
Disciplina	605
Soggetti	Sustainable agriculture Crop diversification Agricoltura sostenibile Conreu Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Foreword -- Preface -- Acknowledgements -- Contents -- About the Editors -- 1: Neglected and Underutilized Crop Species: Are They Future Smart Crops in Fighting Poverty, Hunger and Malnutrition Under Ch... -- 1.1 Introduction -- 1.2 Concept of Neglected and Underutilized Crop Species -- 1.3 Production Trends and Consumption -- 1.3.1 Underutilized Cereals -- 1.3.2 Underutilized Pulses -- 1.3.3 Underutilized Vegetables -- 1.3.4 Underutilized Root and Tuber Crops -- 1.4 Importance of Neglected and Underutilized Crop Species -- 1.4.1 Potentiality and Nutritional Importance of Underutilized Crops -- 1.4.2 Nutritional Importance -- 1.4.3 Diversification for Food Security: The Role of Underutilized Crops -- 1.4.3.1 Medicinal Values -- 1.4.3.2 Genetic Resources for the Development of Stress-Tolerant Crops -- 1.4.3.3 Sustainability of Underutilized Crops -- 1.5 Current Status of Research on NUFCs -- 1.6 Biotechnological Approaches for Domestication and Improvement of Orphan Crop Species for Climate Resilience -- 1.6.1 Concept and Importance of Domestication -- 1.6.2 Genome Editing Using CRISPR Technology -- 1.7 Challenges in

Production of NUFCS -- 1.8 Framework for Mainstreaming NUFCS for Sustainable Nutrition Security -- 1.9 Conclusion -- References -- 2: Neglected and Underutilized Crops: Present Status and Future Prospectus -- 2.1 Introduction -- 2.2 Present Status of Neglected and Underutilized Species -- 2.2.1 Status of NUS Around the World -- 2.2.2 Global Scenario of NUS -- 2.2.3 Status of NUS in Europe -- 2.2.4 Status in Sub-Saharan Africa (SSA) -- 2.2.5 Status of NUS in West Asia -- 2.2.6 Status of NUS in Asia -- 2.3 China, Cambodia, Thailand, Vietnam and Southeast Asia -- 2.3.1 India -- 2.3.2 Sri Lanka and Bangladesh -- 2.3.3 Pakistan and Nepal -- 2.4 Global Research Organizations and Events Promoting NUS.

2.5 The Genetic Resources Policy Committee of the Consultative Group on International Agricultural Research (CGIAR) -- 2.6 International Centre for Underutilized Crops (ICUC) -- 2.7 Global Facilitation Unit for Underutilized Species (GFU) -- 2.8 Crops for the Future (CFF) -- 2.9 The African Orphan Crop Consortium (AOCC) -- 2.10 Potential and Future Prospects of NUS -- 2.11 Conclusion -- References -- 3: Germplasm Resources of Major Underutilized Crops -- 3.1 Introduction -- 3.2 Categories of Underutilized Crops -- 3.2.1 Cereals -- 3.2.2 Vegetables -- 3.2.3 Legumes -- 3.2.4 Roots and Tuber Crops -- 3.2.5 Fruits -- 3.2.6 Oilseeds -- 3.3 Major Underutilized Crops and Their Germplasm Resources -- 3.3.1 Millets -- 3.3.2 Buckwheat -- 3.3.3 Grain Amaranths -- 3.3.4 Quinoa -- 3.3.5 Ancient Wheat or Hulled Wheat -- 3.3.6 Teff -- 3.3.7 Bambara Groundnut -- 3.3.8 Faba Bean -- 3.3.9 Moringa -- 3.3.10 Winged Bean -- 3.4 Organizations Involved in Improving and Maintaining Genetic Resources -- 3.4.1 International Centre for Underutilized Crops (ICUC) -- 3.4.2 Global Facilitation Unit (GFU) -- 3.4.3 Convention on Biological Diversity (CBD) -- 3.4.4 Crops for the Future (CFF) -- 3.4.5 The International Plant Genetic Resources Institute (IPGRI) -- 3.4.6 The United Nation Food and Agriculture Organization (FAO) -- 3.5 Constraints in Development of Underutilized Crops -- 3.6 Conclusion -- References -- 4: Underutilized Vegetable Species of Indian Himalayas -- 4.1 Introduction -- 4.2 Status of Underutilized Vegetables in India -- 4.3 Jammu and Kashmir -- 4.3.1 Wand haaq (*Brassica oleracea* var. *acephala*) -- 4.3.2 Khanyari Haaq (*Brassica oleracea* var. *acephala*) -- 4.3.3 Hanz haaq (*Brassica oleracea* var. *acephala*) -- 4.3.4 Wast haaq (*Amaranthus* spp.) -- 4.3.5 Nunnar (*Portulaca oleracea*) -- 4.3.6 Hannd/Han (*Taraxacum officinale*) -- 4.3.7 Sonchal/Swatsal (*Malva sylvestris*). -- 4.3.8 Abuj (*Rumex obtusifolius*) -- 4.3.9 Pamb haaq (*Rheum emodi*) -- 4.3.10 Shamsho (*Capsella bursa-pastoris*) -- 4.3.11 Shangsho (*Lepidium latifolium*) -- 4.3.12 Khala (*Lactuca dolichophylla*) -- 4.3.13 Pran (*Allium cepa* var. *proliferum*) -- 4.3.14 Skotche (*Allium przewalskianum*) -- 4.3.15 Nadru (*Nelumbo nucifera*) -- 4.4 Himachal Pradesh, Uttarakhand and Temperate NE Region -- 4.4.1 Zimu (*Allium tuberosum*) -- 4.4.2 Jangli chulai (*Amaranthus viridis*) and Kantachulai (*Amaranthus spinosus*) -- 4.4.3 Bathua (*Chenopodium album* Linn.) -- 4.4.4 Chala (*Nasturtium officinale*) -- 4.4.5 Piyaji (*Asphodelus tenuifolius*) -- 4.4.6 Lungru/Kasrod (*Diplazium esculentum* Retz.) -- 4.4.7 Duna (*Allium humile* Kunth.) -- 4.4.8 Jambu or Faran (*Allium consanguineum* and *Allium wallichii* Kunth.) -- 4.4.9 Bichhubooti (*Urtica dioica*) -- 4.5 Anti-nutritional Factors -- 4.6 Scope of Underutilized Vegetables in India -- References -- 5: Nutritional and Medicinal Values of Neglected Spice Crops of Indian Himalayas -- 5.1 Introduction -- 5.2 Addressing Underutilization of NUS -- 5.3 Scenario of Production -- 5.3.1 Identification, Selection, and Cultivation -- 5.3.2 Resources and Production -- 5.3.3 Storage and Processing -- 5.3.4 Trade and Retail -- 5.3.5 Consumer -- 5.4 Nutritional and Medicinal

Scope of the Neglected Spice Crops -- 5.4.1 *Capsicum minimum* -- 5.4.2 *Zanthoxylum armatum* -- 5.4.3 *Hedychium spicatum* -- 5.4.4 *Ajuga bracteosa* -- 5.4.5 *Euphorbia hirta* -- 5.4.6 *Dicliptera bupleuroides* -- 5.4.7 *Myrica esculenta* -- 5.4.8 *Berberis aristata* -- 5.4.9 *Flemingia vestita* -- 5.4.10 *Perilla frutescens* -- 5.4.11 *Thymus linearis* -- 5.4.12 *Allium stracheyi* -- 5.4.13 *Angelica glauca* -- 5.4.14 *Piper longum* -- 5.5 Conclusion and a Way Forward from Ecological Niche to Mainstream Purpose -- References -- 6: Genetics and Genomics Resources of Millets: Availability, Advancements, and Applications.

6.1 Introduction -- 6.2 Genetics and Genomic Relationships -- 6.3 Genomic Resources -- 6.4 Advancements -- 6.4.1 Use of Germplasm for Crop Improvement -- 6.4.2 Enhancement of Drought Tolerance -- 6.4.3 Markers with Agronomic Traits, Abiotic and Biotic Stress Confrontation, and Product Quality -- 6.4.4 Molecular Breeding Tools Enhanced by Genomic Sequences -- 6.5 Applications -- 6.6 Conclusion and Future Research Needs -- References -- 7: Genomic Approaches for the Improvement and Conservation of Buckwheat -- 7.1 Introduction -- 7.2 Biotechnological Interventions for Combating Underutilization of Buckwheat -- 7.3 Molecular Marker System and Its Application in Buckwheat -- 7.4 Sequencing Status of Buckwheat -- 7.5 Future Prospectus -- References -- 8: Genetic and Genomic Resources of Chestnut -- 8.1 Introduction -- 8.2 Genetics of Chestnut -- 8.3 Genomic Approach to Disease Resistance in American Chestnut -- 8.4 Conservation of Chestnut Germplasm -- 8.4.1 In Situ Conservation -- 8.4.2 Ex Situ Conservation -- 8.4.3 In Vitro Conservation -- 8.5 Conclusion -- References -- 9: Genetic and Genomic Resources in Rice Bean (*Vigna umbellata* Thunb.): Availability, Advancements, and Applications -- 9.1 Introduction -- 9.2 Genomic Resources: Advancement in Marker Technology -- 9.3 Genetic Resources in Rice Bean -- 9.4 Conclusion and Future Perspective -- References -- 10: Advancements in High-Throughput Omics-Technologies for Understanding the Biology of Neglected and Underutilized Crops -- 10.1 Introduction -- 10.2 Technical Advancement in Transcriptomics to Study NUCs -- 10.2.1 Hybridization-Based Technology -- 10.2.1.1 DNA Microarray/DNA Chips -- 10.2.2 Sequencing-Based Technologies -- 10.2.2.1 Expressed Sequence Tags -- 10.2.3 Serial Analysis of Gene Expression (SAGE) and Cap Analysis Gene Expression (CAGE). 10.2.4 Next-Generation Sequencing (NGS)/RNA Sequencing (RNA-Seq) -- 10.2.5 Transcript Assembly -- 10.2.5.1 Reference-Based Assembly Method -- 10.2.5.2 De Novo Method -- 10.2.5.3 Combined Strategy -- 10.3 Progress Made in Proteomics Technologies to Understand the NUCs -- 10.3.1 Advancements in Protein Extraction and Sample Clean-Up -- 10.3.2 Proteolytic Digestion and Database Searching for Gel-Based and Gel-Free Proteomics Approaches -- 10.4 Technical Advancements in Metabolomics to Facilitate the Metabolome Profiling of NUCs -- 10.5 Softwares and Other Bioinformatics Platforms to Facilitate the Studies on NUCs -- 10.5.1 Softwares for the Functional Annotation and Integration of Omics Data -- 10.5.1.1 Pathview Web: User-Friendly Pathway Visualization and Data Integration -- 10.5.1.2 PaintOmics 3: A Web Resource for the Pathway Analysis and Visualization of Multi-Omics Data -- 10.5.1.3 KaPPA-View: Integrating Transcript and Metabolite Data -- 10.5.1.4 MapMan: A User-Driven Tool to Functionally Annotate the Identified Genes/Proteins in Various Pathways -- 10.5.2 Subcellular Localization -- 10.5.2.1 CELLO: Subcellular Localization Predictive System -- 10.5.2.2 PSORTb (<http://www.psорт.org>) -- 10.5.2.3 TMHMM Server -- 10.5.2.4 SignalP 3.0 (<http://www.cbs.dtu.dk/services/SignalP/>) -- 10.5.2.5 LOctree --

10.5.2.6 PredictProtein (<http://www.predictprotein.org>) -- 10.5.3 Tools for the Detection of Post-translational Modifications -- 10.5.3.1 PhosPhAt: A Database of Phosphorylation Sites in Arabidopsis thaliana and a Plant-Specific Phosphorylation Site Predi... -- 10.5.3.2 Prediction of Glycosylation Sites -- 10.5.3.2.1 Cartoonist -- 10.5.3.2.2 GlycoWorkbench -- 10.5.3.2.3 NetOGlyc-Prediction of Mucin-Type O-Glycosylation Sites Based on Sequence Context and Surface Accessibility -- 10.5.3.2.4 NetNGlyc 1.0 -- References.

11: Understanding the Barriers of Underutilization and Applicability of Biotechnological Tools for Augmenting Spice Crop Produ.
