

1. Record Nr.	UNINA9910502993603321
Autore	Tutumluer Erol
Titolo	Advances in Transportation Geotechnics IV : Proceedings of the 4th International Conference on Transportation Geotechnics Volume 3
Pubbl/distr/stampa	Cham : , : Springer International Publishing AG, , 2021 ©2022
ISBN	3-030-77238-1
Descrizione fisica	1 online resource (1023 pages)
Collana	Lecture Notes in Civil Engineering Ser. ; ; v.166
Altri autori (Persone)	NazarianSoheil Al-Qadilmad Qamhialssam I. A
Soggetti	Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Contents -- About the Editors -- Tunnels -- Investigation on the Dynamic Response of a High-Speed Railway Tunnel Located Beneath an Airport Runway and Uneven Settlement of the Runway -- 1 Introduction -- 2 Background -- 3 Long-Term Settlement of the Runway Due to the Dynamic Train Load -- 3.1 Model -- 3.2 Analysis of Calculation Results -- 4 Influence of Aircraft Load on Service Performance of the Tunnel and the Operation Safety of the High-Speed Trains -- 4.1 Deformation and Stresses of the Tunnel Linings Under Aircraft Loads -- 4.2 Dynamic Response of the Track Due to the Aircraft Load -- 5 Conclusion -- References -- Influence of Shield Slurry Property on Filter Cake Quality in Sand Stratum -- 1 Introduction -- 2 Engineering Background and Slurry Pressure Setting -- 2.1 Engineering Background -- 2.2 Slurry Pressure Setting -- 3 Shield Slurry Preparation -- 3.1 Laboratory Test -- 3.2 Influence of Materials on Shield Slurry -- 4 Slurry Penetration Test Design -- 4.1 Experimental Apparatus -- 4.2 Experimental Materials -- 4.3 Experimental Procedure -- 4.4 Experimental Scheme -- 5 Results of Laboratory Experiment -- 5.1 Final Water Discharge -- 5.2 Water Discharge During Filter Cake Forming Process -- 5.3 Water Discharge Per Second After Filter Cake Formation -- 5.4 Filter Cake Formation Time -- 5.5 The Form of Filter Cake -- 6 Slurry Control Scheme

and Application -- 6.1 Slurry Control Design -- 6.2 Application in Site
-- 7 Conclusions -- References -- Dynamic Response and Long-Term
Settlement of Four Overlapping Tunnels Subject to Train Load -- 1
Introduction -- 2 Engineering Background -- 3 Numerical Calculations
-- 3.1 Description of Calculation Model -- 3.2 Selection of Measuring
Point -- 3.3 Load Application -- 3.4 Verification of the Numerical
Model -- 3.5 Calculation Method for Long-Term Settlement -- 4
Computation Result Analysis.

4.1 Dynamic Response of Overlapping Tunnel -- 4.2 Long-Term
Settlement of Overlapping Tunnel -- 5 Conclusions -- References --
Dynamic Stability of Soft Soil Between Closely and Obliquely Overlapped
Metro Tunnels Subjected to Moving Train Loads -- 1 Introduction -- 2
Numerical Method of Dynamic Response Between Overlapped Tunnels
-- 2.1 The Closely and Obliquely Metro Tunnels -- 2.2 Three-
Dimensional Track-Tunnel-Soil Model -- 2.3 Vehicle-Track Coupled
Model and Cycling Vehicle Load -- 2.4 Verification of the Numerical
Model -- 3 Numerical Results and Discussions -- 3.1 Characteristics
of Dynamic Shear Strain Distribution -- 3.2 Cyclic Threshold Shear
Strain Parameters and Dynamic Stability Analysis -- 3.3 Reinforcement
Measures and Effect Evaluation -- 4 Conclusions -- References --
Research on Calculating Quantity of Utility Tunnel with Revit Secondary
Development -- 1 Introduction -- 2 Methodology -- 2.1 Method
Design -- 2.2 Information Typing -- 2.3 Code Identification -- 2.4
Items Assignment -- 2.5 Developing Plug-In -- 3 Application Analysis
-- 4 Conclusion and Perspective -- References -- The Influence
of Variation in Groundwater Table on Ground Vibrations
from Underground Tunnels -- 1 Introduction -- 2 Formulation -- 3
Numerical Results and Discussion -- 4 Conclusions -- References --
Experimental Studies on Three Types of Vibration Isolators
for Buildings Near Subways -- 1 Introduction -- 2 Designs of the New
Isolators -- 2.1 Stacked Sandbags -- 2.2 The Improved Geosynthetics
Isolator -- 2.3 Laminated Thick Rubber Isolator -- 3 Test Programs --
3.1 Mechanical Property Tests -- 3.2 Field Experiments -- 4 Results
and Discussion -- 4.1 Mechanical Properties -- 4.2 Suppression
Effectiveness of the Field Experiments -- 5 Conclusions -- References
-- Dynamic Response of Floating Slab Track with Variation on Failure
Position of Steel Spring.

1 Introduction -- 2 Numerical Analysis Model and Its Parameters -- 3
Numerical Calculation and Results Analysis -- 3.1 Effect of Failure
Position on Vibration of Track and Tunnel -- 3.2 Effect of Failure
Position on Vibration and Attenuation of Soil -- 4 Conclusions --
References -- The Effect of Boundary Permeability on the Dynamic
Response of the Layered Saturated Ground Subjected
to an Underground Moving Load -- 1 Introduction -- 2 Physic Model
and General Solutions -- 3 The Development of the TRM Method -- 4
Numerical Results -- 5 Conclusions -- References -- The Effect
of Excavation Unloading on the Deformation of Existing Underlying
Shield Tunnel -- 1 Introduction -- 2 Case Analysis -- 2.1 The Vertical
Displacement of Tunnels -- 2.2 The Effect of the Depth of Excavation
-- 2.3 The Effect of the Size of Excavation -- 2.4 The Effect
of the Shape of Excavation -- 2.5 Summary of field observations -- 3
FEM Modelling of Protected Tunnel -- 3.1 Geometric Model -- 3.2 Soil
Model and the Parameters -- 4 Result and Discussion -- 4.1 The Effect
of the Depth of Excavation -- 4.2 The Effect of the Width
of the Excavation -- 4.3 The Effect of Ground Improvement -- 4.4 The
Effect of the Length of Anti-Pulling Pile -- 5 Conclusions -- References
-- Intelligent Construction in Earthworks: Technology and Management
-- Field Testing of Automatic Frequency Control for Intelligent

Compaction of Embankments -- 1 Introduction -- 2 Methods and Materials -- 3 Results and Discussion -- 4 Conclusions -- References -- An Experimental Study on the Estimation of Field Compaction States and Stress-Strain Properties of Unbound Granular Materials from Laboratory Test Results -- 1 Introduction -- 2 Walker-Holtz Method -- 3 Soil Samples and Test Methods -- 4 Results and Discussions (Laboratory Compaction Tests) -- 4.1 Results -- 4.2 Modification of the WH-Method.

4.3 Estimation of d Other than $(d)_{max}$ -- 4.4 $(d)_{max}$ of Field Sample Including Large Gravel Particles -- 5 Results and Discussions (Triaxial Compression Tests) -- 6 Conclusions -- References -- A Stress-Dependent Approach for Estimation of Drum-Soil Contact Area -- 1 Introduction -- 2 Methodology -- 2.1 Contact Width -- 3 Results and Discussion -- 4 Summary and Conclusions -- References -- An Earthworks Quality Assurance Methodology Which Avoids Unreliable Correlations -- 1 Introduction -- 2 Sample Preparation for Testing -- 3 What Do Engineer Want from Testing -- 3.1 Alternative Equipment Used or QA Testing -- 4 Precision and Accuracy of Various Tests -- 5 Dendrograms for Assessing Compaction Relationships -- 6 Density PDF Used to Match Other Test Data -- 7 Conclusions -- References -- Intelligent Construction for Infrastructure-The Framework -- 1 Definition of Intelligent Construction for Infrastructure -- 2 Construction Managed by Systematic Methods -- 3 Construction Machine Learning -- 4 Entering the Big Data Era -- 5 Integration of Intelligent Technologies -- 6 Future of Intelligent Construction -- References -- Geo-statistical Evaluation of the Intelligent Compaction Performance in a Reclaimed Base Project -- 1 Introduction -- 2 Background and Methodology -- 2.1 Project Description and In-Situ Measurements -- 2.2 Compaction Measurement Values (CMVs) -- 2.3 Geo-statistical Analysis -- 3 Results and Discussion -- 3.1 First Reclaim Phase -- 3.2 Second Reclaim Phase -- 3.3 Discussion -- 4 Conclusion -- References -- CCC Systems for Vibratory and Oscillatory Rollers in Theoretical and Experimental Comparison -- 1 Introduction -- 2 Overview of CCC Systems and Previous Investigations -- 2.1 CCC with Vibratory Rollers -- 2.2 CCC with Oscillatory Rollers -- 2.3 Results from Previous Investigations -- 3 Experimental Field Tests on CCC Performance.

3.1 Compaction Device -- 3.2 Test Layout and Measuring Equipment -- 4 Results from Experimental Field Tests -- 5 Conclusions -- References -- Numerical Assessment of Impacts of Vibrating Roller Characteristics on Acceleration Response of Drum Used for Intelligent Compaction -- 1 Introduction -- 2 Development of a Finite Element Model for Simulating Soil-Drum Interaction -- 2.1 Roller Characteristics -- 2.2 Modeling of Soil -- 2.3 Finite Element Model -- 3 Results and Discussion -- 3.1 Effects of Vibration Frequency -- 3.2 Effects of Amplitude -- 3.3 Effects of Roller Weight -- 4 Conclusions -- References -- Evaluating the Influence of Soil Plasticity on the Vibratory Roller-Soil Interaction for Intelligent Compaction -- 1 Introduction -- 2 Three-Dimensional Finite Element Model -- 2.1 Adopted Soil Model -- 2.2 Adopted Roller Characteristics and 3D Model -- 3 Results and Discussion -- 4 Australian Field Experience -- 5 Conclusions -- References -- De-icing Test of the Externally Heated Geothermal Bridge in Texas -- 1 Introduction -- 2 Design and Construction -- 2.1 Test Site Conditions -- 2.2 Design of the Heated Deck and GLHE -- 2.3 Construction of Mock-up Bridge and De-icing System -- 3 System Operation and Performance -- 4 Conclusion -- References -- Climatic Effects on Geomaterial Behavior Related to Mechanics of Unsaturated Transportation Foundations -- Effect of Relative Density on the Drained

Seismic Compression of Unsaturated Backfills -- 1 Introduction -- 2
Effective Stress for Unsaturated Soils -- 3 Sand Properties -- 4 Simple
Shear Device with Suction-Saturation Control -- 5 Preparation
of Unsaturated Specimens with Different Relative Densities -- 6 Testing
Procedure and Testing Program -- 7 Experimental Results
and Discussion -- 8 Conclusion -- References -- Frost Heave
Protection of Concrete Pavement Subgrades -- 1 Introduction.
2 Design Standards as a Measure Against Frost Heaving.
