Is an investors' "perfect storm" brewing? If you're not careful, it could sweep your wealth away. Long-dormant inflation looks to be catching fire. A stock market in overdrive may crash and burn for years. And taxes to fund deficits and social programs look to be rising to punishing levels not seen in a generation. This triple threat could mean a financial apocalypse from which many investors won't ever recover. Getting straight talk on smart wealth management has never been more critical. With Social Security and Medicare tracking to go belly-up in a few short years, there will be dire consequences for millions. Already-retired boomers, living far longer than ever expected, will strain government resources and risk running out of money. Who will pay for it all? Without smart planning, your taxes may rise to confiscatory levels, sapping net worth and lifestyle quality. Your retirement lifestyle and legacy for your kids could get crushed. Some may never be able to retire. Investors and savers of every age and stripe will want to pay careful attention to the concentrated wisdom in this book and take proactive steps to protect themselves while there's still time.
