

1. Record Nr.	UNINA9910506378203321
Titolo	Automotive ergonomics // editors, Heiner Bubb [et al.]
Pubbl/distr/stampa	Wiesbaden, Germany : , : Springer, , [2021] ©2021
ISBN	3-658-33941-1
Descrizione fisica	1 online resource (705 pages)
Disciplina	629.231
Soggetti	Automobiles - Design and construction Ergonomics Human engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Inauguration The Control Loop Paradigm of Ergonomics The Human Being as a Drive rAnatomical and Anthopometric Characteristics of the Driver Human Models System Ergonomics of the Vehicle Anthropometric Vehicle Design Design of Condition Safety Driver Assistance Methods of Ergonomic Vehicle Development Measurement techniques Statistical Methods Outlook
Sommario/riassunto	Ergonomics teaches how to design technology in such a way that it is optimally adapted to the needs, wishes and characteristics of the user. In this context, the concept of the human-machine system has become established. In a systematic way and with a detailed view of the complicated technical and perceptual psychological and methodological connections, this book explains the basics of automotive ergonomics with numerous examples.
