| Titolo | Physics of the Human Temporality : Complex Present // by Ihor Lubashevsky, Natalie Plavinska |
| Pubbl/distr/stampa | Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021 |
| ISBN | 3-030-82612-0 |
| Edizione | [1st ed. 2021.] |
| Descrizione fisica | 1 online resource (662 pages) |
| Collana | Understanding Complex Systems, , 1860-0840 |
| Disciplina | 530.01 |
| Soggetti | System theory Social sciences - Data processing Psychology Complex Systems Computer Application in Social and Behavioral Sciences Behavioral Sciences and Psychology |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Part I Problem of Time. Various Aspects -- Time From a Bird's Eye View -- Temporal Structure of Now From a Close-Up View -- Human Temporality: Qualitative Description Interaction of Human Temporality and External World.. Part II Temporality-Time Formalism -- Physics of Experiential Now: Effort of Atomic Action -- Physics of Complex Present: Properties of Action Strategy Cloud -- Beyond Complex Present: Blurring World -- Post Scriptum.-Appendices. . |
| Sommario/riassunto | This book presents a novel account of the human temporal dimension called the "human temporality" and develops a special mathematical formalism for describing such an object as the human mind. One of the characteristic features of the human mind is its temporal extent. For objects of physical reality, only the present exists, which may be conceived as a point-like moment in time. In the human temporality, the past retained in the memory, the imaginary future, and the present coexist and are closely intertwined and impact one another. This book focuses on one of the fragments of the human temporality called the complex present. A detailed analysis of the classical and modern |

concepts has enabled the authors to put forward the idea of the multi-component structure of the present. For the concept of the complex present, the authors proposed a novel account that involves a qualitative description and a special mathematical formalism. This formalism takes into account human goal-oriented behavior and uncertainty in human perception. The present book can be interesting for theoreticians, physicists dealing with modeling systems where the human factor plays a crucial role, philosophers who are interested in applying philosophical concepts to constructing mathematical models, and psychologists whose research is related to modeling mental processes.
